Limited Warranty

We hereby certify that these goods were produced in compliance with all applicable requirements of Section 6, 7, and 12 of the Fair Labor Stds. Act as amended and of regulations and orders of the U.S. Dept. of Labor issued under Section 14 thereof. Allied is only acting as a distributor of products manufactured by other companies. Thus, Allied expressly limits its guarantees and warranties for products sold hereunder to those extended and allowed by the manufacturing company to be passed through to Allied's customers. There are no express or implied warranties which extend beyond the description of the face hereof. Allied disclaims and excludes from any sale of products herein any implied warranties of merchantability, or of fitness or suitability for any particular purpose or use. All goods sold by Allied are purchased by the buyer "AS IS." Since Allied cannot control the manner or use of its products after their sale, Allied will not be responsible for any direct, consequential or indirect damages to the purchaser or any third party or ultimate user of the products. Allied will, at its option, either replace the goods sold or refund the purchase price should a product defect be brought to its attention within a reasonable time after sale.

Welcome All New Customers, Open An Account Today

Allied extends open account privileges to all qualified enterprises that meet our requirements. Allied's terms are net 30 days. Please contact your local representative for details.

Minimum Order

Minimum order is $25.00 Mail in orders and credit card orders minimum $50.00. C.O.D. order minimum is $50.00 (orders for stock only no back orders).

Sales Tax

Allied Electronics, Inc. is required by law to collect all Federal, State, and Local taxes that apply to your shipment. **If you are exempt from tax, an original signed tax exemption certificate must be mailed to Allied. Without a valid signed tax certificate on file, all applicable taxes will be charged.**

Non-Catalog Items

Merchandise not listed in our catalog, if available from our regular suppliers, is subject to minimum order quantities and/or special handling charges. **Special order products are sold on a non-cancelable basis.**

Scheduled Deliveries/Future Ships

All orders for future scheduled deliveries must be confirmed in writing by Purchase Order with specific delivery information. Any changes in delivery schedules must be in writing and agreed upon by Allied and customer and confirmed. Reductions in quantity may result in a cancellation fee.

International Sales and Services (Export Orders)

Minimum export order is $50.00. Write **Allied Electronics International Marketing Dept. at 7410 Pebble, Fort Worth, Texas 76118 U.S.A. (Telex 75-8314, Telephone 817/595-3500, FAX 817/595-6444)** for complete information including, price quotations, handling, documentation and shipping.

Terms for payment on export orders are cash or irrevocable letter of credit. Cash orders in U.S. dollars will be accepted for immediate processing. Please include an extra 20% (10% on orders over $500.00) to cover handling, documentation and shipping charges. We promptly refund any excess of payment over actual charges. Credit terms are available to qualified customers–inquire when placing order.

In some cases, certain items from our suppliers may require a leadtime. To insure faster delivery to you, a divisible letter of credit for two (2) shipments is recommended to allow the majority of your order to be shipped immediately. **All letters of credit must be valid for a minimum of one hundred-fifty (150) days.**

Pricing

Prices shown are subject to change without notice. Orders are billed at the prices in effect at the time of shipment.

Shipping

All shipments are F.O.B. shipping point.

APO and FPO Orders

APO and FPO shipments will be routed Parcel Post Insured, with maximum size 100 inches (length plus girth) and maximum weight 70 lbs. For faster delivery, specify Priority Mail. To estimate shipping charges contact your local Post Office.

Truck Shipments

Trucks are the most economical way to ship items weighing approximately 50 pounds or more. Shipments weighing between 50 to 99 pounds will be charged at the minimum 100 pound rate as specified by truck carriers. Consult your local agent for truck rates.

Air-Freight Shipments

We will ship your order Air-Freight at your expense if you prefer. Contact your local Air Freight Carrier for Air-Freight charges.

Damaged Shipment

Merchandise shipped is carefully packed in compliance with carrier requirements. Claims for loss or damage in transit must be made with the carrier by the customer. All shipments should be unpacked and inspected immediately upon receipt.

Concealed Loss or Damage. If damage is not discovered until shipment is unpacked, make a request for inspection by the carrier's agent and file claim with the carrier.

Visible Loss or Damage. Any external evidence of loss or damage must be noted on the freight bill or carrier's receipt and signed by the carrier's agent. Failure to do this will result in the carrier refusing to honor the claim. For your protection our billing includes insurance for damage or loss in transit.

Shortages

All claims for shortage or shipment errors must be made **WITHIN 10 DAYS** after receipt of shipment.

Returning Merchandise

If you must return all or part of your order, for a reason other than carrier damage, contact your local representative within 30 days of receipt of shipment. Your local representative will provide the Return Authorization Number (and if any restocking charge is required). Return Authorization Numbers are good for only 30 days. All returned merchandise is subject to inspection prior to any credit being processed, merchandise should be returned in original cartons if possible.

Procell® Industrial Alkaline Batteries

- ► Long Shelf Life with Sustained Power
- ► Lasts Up to Five Times Longer Than Regular Zinc Carbon Batteries
- ► Low Battery Replacement Cost . . . Low Use Cost
- ► Distinctive Industrial Label Reduced Pilferage
- ► Operate Reliably in Temperature Extremes of –20°F to 160°F
- ► All Procell Lantern Batteries Sealed in Steel Cases for Durability
- ► Made to Exact Specifications as Duracell Copper Top

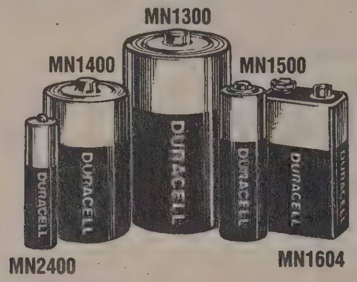
Duracell Long-Life Alkaline Batteries



Extra service and long life. Designed for high drain service applications — outperform, outlast standard operating zinc-carbon batteries by up to 100%. Alkaline cells cost less, too. Compare by dividing the initial costs by the many extra hours of service provided.

Heavy-Duty Plus® Zinc Carbon Batteries

The service capacity of a heavy duty battery is not a fixed number of ampere-hours because the battery functions at different efficiencies depending upon the conditions imposed upon it. The service varies with current drain, operating schedule, and cutoff voltage. It is also affected by the operating temperature and storage conditions of the battery prior to use.

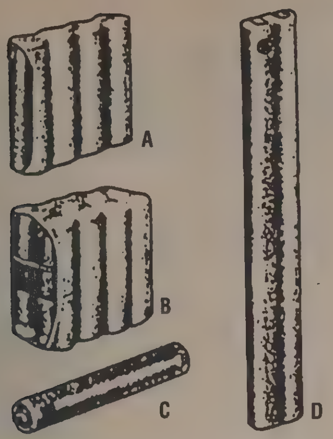
Rechargeable NICD Battery Packs



These replacement battery packs are made up of individual cells that are bonded together and insulated with PVC. They may be stored charged and uncharged. Other configurations are available. Order No. 69485K999 and specify battery type and configuration.

Pure Lead Tin Batteries From Hawker Energy

At high rates of discharge, Hawker Energy's pure-lead tin technology overpowers conventional lead-calcium cells in every category of comparison. Hawker Energy's batteries are smaller, lighter and have a longer service life. They also offer faster recharge, a high discharge rate and are extremely reliable. That superiority means more value for every energy dollar.

You can get pure-lead tin technology only in Cyclon® and Genesis® batteries from Hawker Energy Products. This exceptional technology has been awarded both the *EDN Innovation of the Year* and *The 1993 Missouri Governor's New Product* honors. The advantages of pure-lead tin will enhance your new product design, reduce shipping costs and require less maintenance and far fewer replacements.

These batteries are going to make a powerful difference in your designs.

Lithium Batteries

The Keeper II Series – Power On Demand

Power characteristics allow Keeper II batteries to be permanently mounted as long-lasting primary cells for improved total system reliability. No recharge circuits or components needed. Direct mount P.C. Board; no holder required. Features glass to metal seals, hermetic welds, and unique electro-chemistry for a design life of up to ten years. Highest available voltage characteristics; remains flat for the entire battery life. Other features include higher density than comparable batteries, non-pressurized design for nonvented applications, limited short circuits by internal design, prismatic design for optimum circuit board space utilization, and stainless steel construction for corrosive resistance, hermetic seal, and structural integrity. Short circuits with no adverse effects. Wave solderable within storage temperature limits. Dip solder processable — polarity keyed and pin-outs are 0.1" spacing. Nominal drain rates from –73° to +125°C. UL recognized. Meets Federal shipping regulations.

General Purpose Carbon-Zinc Batteries

Long-life carbon-zinc batteries are most popular for portable power. Available in most standard sizes. For use in industrial, electronic, transistor, and many other applications. Specially sealed to provide protection in handling and against corrosive leakage. Sturdy construction. Long dependable service, even over a wide range of temperatures, plus peak performance at all times.

Rechargeable Nickel-Cadmium Batteries and Chargers

Batteries can be stored charged or uncharged. Capacity of Nickel-Cadmium batteries is expressed in average ampere hours, and stays relatively fixed over a wide range of discharge currents. Rechargeable batteries actually cost less to use per ampere hour than throwaway batteries. End of cycle life is considered to be the point where the battery no longer provides 80% of rated capacity. One hour recharge system available. Call for information.

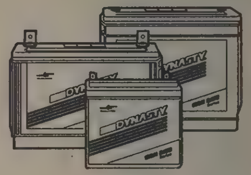
Dynasty® Sealed Maintenance-Free Rechargeable Batteries

DYNASTY®



Dynasty® batteries offer a tough, compact and convenient battery that provides reliable performance and versatility. Dynasty® batteries feature AGM mats in the JC, UPS and TEL Series, and gelled electrolyte in the GC Series. Batteries can operate, store or charge in any position. **Charged Operating Temperature:** –76°F to +140°F. Batteries are rated at 77°F. Capacities increase slightly above 77°F and decrease below 77°F. JC, GC and UPS series are ideal for lighting, security and supervisory back-up power systems and portable equipment. The TEL series is designed for telecom applications.

Dynasty® Battery Chargers

Dual voltage chargers for use with sealed lead-acid batteries. CDM and M series have switchable "fast" or "float" charging. in "fast" mode, fully discharged batteries recharge in 12-16 hours. In "float" mode, charging takes up to 36 hours. Connection reversal annunciation. All models are voltage regulated except FX-6 and FX-12. Short circuit and reverse polarity protected. **Operating Temperature:** –4°F to +122°F.

Rechargeable Battery Packs

Self-contained battery packs provide power for emergency lights, radios, televisions, depth finders, boat lights, communications and test equipment. Operate by connecting to appliance with a standard automobile cigarette lighter appliance plug. Battery pack uses a self-contained charger which plugs into a standard wall outlet. **Charging Time:** 12 V pack — 16-20 hours. **Operating Temperature:** –76°F to +140°F. Includes carrying case and charger. Dimensions (L × W × H): PP6100 — 6.25 × 2.25 × 7.50; PP1260 — 8.25 × 2.88 × 6.50; PP12100 — 6.25 × 4.44 × 6.50; PP12130 — 9.13 × 3.25 × 8.75.

Shielded 9 Volt Battery Straps

- ► **Insulates and Shields 9 Volt Battery Snap-On Connector Contacts**
- ► **Assures Safe Secure Use, Reduces the Potential of Short Circuits and Prevents Tampering with Battery Contacts**
- ► **Protects Circuits and Sensitive Electronic Equipment, Prevents Unwanted Electrical Discharge Due to Unintended Grounding**
- ► **Protects Battery Contacts From Dust, Dirt, and Physical Damage**
- ► **Ideal for Rugged Applications, Constructed of High Impact Molded Plastic with Integral Wire Lead Strain Relief**
- ► **Male and Female Snap-On Contacts Assure a Positive Battery Connection and a Low Contact Resistance**

Specifications. Base: Polypropylene. **Male/Female Contacts:** Brass, nickel plate. **Wires (Red and Black):** #26 AWG, tinned, 0.187 end strip. UL/CSA 1007.

Nickel-Cadmium Batteries

Wide Variety of Cells
- Standard
- Rapid Charge "R"
- High Temperature "H" Memory Backup
- High Capacity "E"

Features
- Rechargeable Sealed Nickel-Cadmium Alkaline Cell
- Long Shelf Life
- High-Rate Charging
- Reliable, Self-Resealing Vent

Applications
- For Cyclic Use
- For Trickle or Float Charge Use

The most notable characteristic of these batteries is their ability to be repeatedly used for extremely long periods of time (very often more than five years). The perfect portable power source for this age of energy conservation, Ni-Cd batteries retain most of their initial performance throughout their service life and are used in an increasing number of ways and fields, including factory, office and home automation systems, information network systems, and others. To satisfy these battery requirements, Panasonic places first priority on high product quality to assure high product reliability. Attention to detail is demanded in this severe quality control system that extends from raw and basic materials procurement to parts and even packaging.

Lithium Batteries

- ▶ High Voltage (3 V)
- ▶ High Energy Density
- ▶ Long Shelf Life
- ▶ Stable Operation
- ▶ .5% Capacity Deterioration Per Year
- ▶ Excellent Durability
- ▶ Flat Discharge Voltage and Stable Internal Impedance
- ▶ High Rate Discharge
- ▶ Wide Operating Temperatures
- ▶ Strong Leakage Resistance
- ▶ Excellent Safety

Versatile, long-life Panasonic lithium batteries for leakproof high-energy sources. Designed for a wide range of electronic applications, from cameras and radios to computer memory backup. Safe and chemically and thermally stable. No corrosive liquid or poisonous gas discharge. Two types available — BR (polycarbon monofluoride) provides flat discharge voltage and stable internal impedance; CR (manganese dioxide) gives high discharge rate and high discharge voltage. Panasonic cells are recognized under UL File No. MH12210.

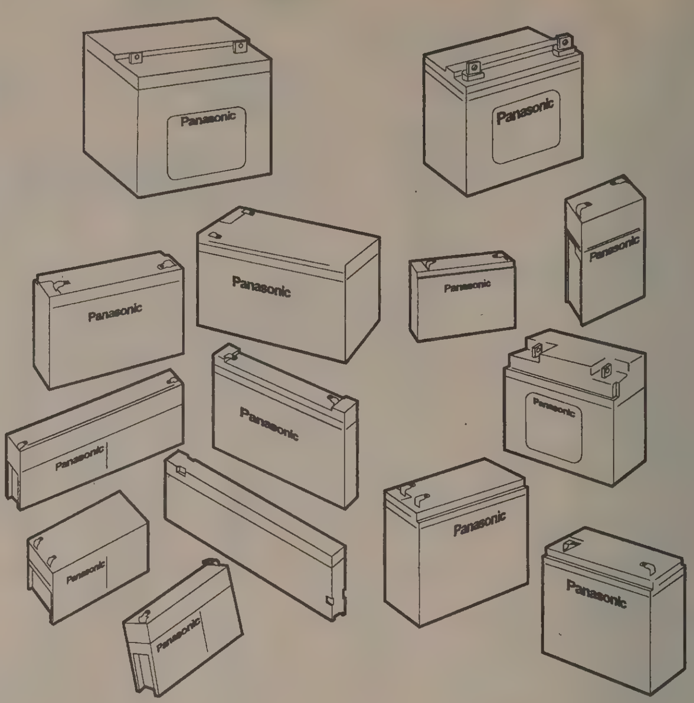
Sealed Lead-Acid Batteries

- High Quality
- Excellent Lead Acid Rechargeable Battery System
- Excellent Deep Discharge Recovery
- Long Service Life — Float or Cyclic
- Starved Electrolyte Leakproof Design
- Maintenance-Free Operation
- 100% Factory Tested
- UL Component Recognition
- No Corrosive Gas Generation
- Use for Portable Equipment
- Charge, Discharge, or Store in any Position
- Use for Power Failure Backup, Emergencies
- No Memory Effect
- Approved as "Dry Cell" for Air Shipment By Dept. of Transportation and IATA
- Popular Video and Cellular Phone Batteries



The LCR-Battery is a new type of sealed lead-acid rechargeable battery system developed by Matsushita Battery Industrial Co., Ltd. The lead-calcium rechargeable (LCR) battery, will stand up to tough operating conditions such as overcharge and deep discharge. In field service, troubles due to abnormal, improper operation or misuse are reduced to a minimum. The LCR battery has stable and reliable capacity. It can be easily maintained to permit proper operation of the equipment that it powers. The battery withstands overcharge, overdischarge, vibration and shock, more readily than competitive products, and is capable of extended storage. To assure this high quality and reliability, **LCR batteries are 100% tested on line for voltage, capacity, and seals, and all vents are 100% visually inspected during the final assembly process.** The LCR battery uses an absorbed electrolyte system. All of the electrolyte is absorbed into the positive and negative plates, and the separator material. Coupled with the use of special sealing epoxies, tongue and groove case and cover construction, and long-sealing paths for posts and connectors, the LCR batteries have exceptional leak resistance, **and can be used in any position.** These batteries save installation space, while providing full and reliable power for the equipment, and many have been designed for rapid recharge, or for high power output. As a result, this power is used for applications ranging from VCRs to vacuums, electric tools, engine-start, UPS systems and computers. LCR batteries have exceptional deep discharge recovery and charge acceptance, even after deep or prolonged discharge.

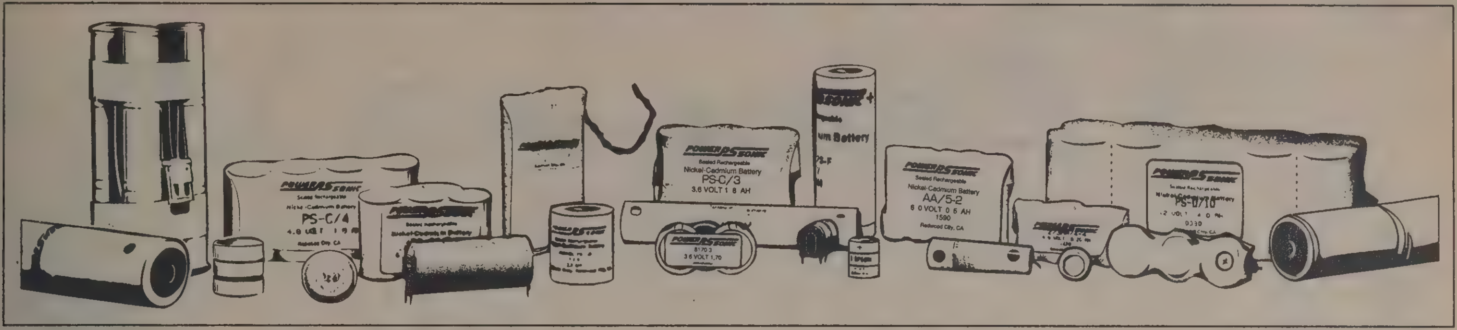
Nickel Cell Assemblies



Features

- Sealed Leak-Proof Construction
- Cell Uniformity
- An Operating Temperature Range
- Life Expectancy
- Sintered Plate Construction
- Low Cell Impedance

Power-Sonic nickel-cadmium batteries are also available as cell assemblies and packs. Both cylindrical and button cells may be packaged in any configuration to meet electrical and dimensional requirements.

When specifying battery assemblies, the following information should be given:

1) Size and type of cell
2) Voltage or number of cells
3) Configuration of cells: e.g., 1 × 4, 2 × 5, stick, etc.
4) Packaging method: taped, shrink-tubing, or molded case
5) Termination: button top, solder tabs, or wire leads with or without connectors
6) Supply drawing of configurations

When ordering a replacement battery pack specify voltage or number of cells, ampere-hour capacity or cell size, and dimensions of the pack.

Economical, Rechargeable Power Combined with the Handling Ease of Dry Batteries

Features

- ► Sealed/Maintenance-Free
- ► High Discharge Rate
- ► Economical
- ► Wide Operating Temperature Range
- ► Design Flexibility
- ► Easy Handling
- ► Long Shelf Life
- ► Rugged Construction
- ► Deep Discharge Recovery
- ► Compact
- ► Long Service Life

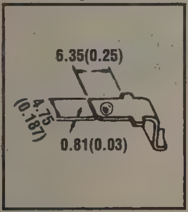
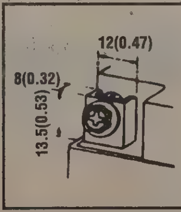
Terminal Type

Figure A



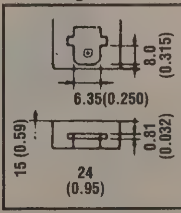
FASTON tabs .187" × .032" mate with AMP. INC. "187" series receptacles or equivalent

Figure B



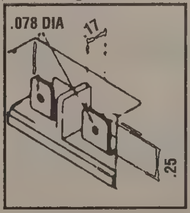
Threaded terminal post with nut and bolt terminal both in 5 mm and 6 mm diameter

Figure C



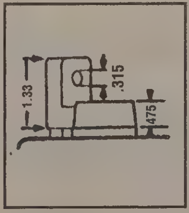
"250" FASTON .250" × .032" mate with AMP. INC. "250" series receptacles or equivalent

Figure D



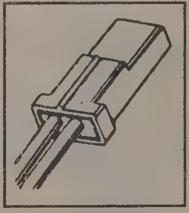
Polarized positive .250" × .032", negative .187" × .032"

Figure E



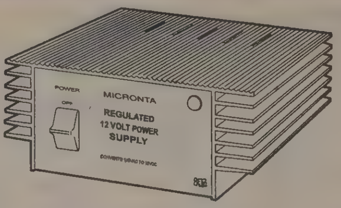
Heavy duty flag terminals

Figure F



Terminated with AMP, INC. part number 1-480318-0 and female pin part number 60619-1

Regulated Power Supply



- ► Plugs Into 120 VAC House Current
- ► Powers Your Mobile CB Radio and Other Car Accessories That Use 12 VDC
- ► Tightly Regulated Voltage Output (Less Than 20 Millivolt Ripple)
- ► Safe to Use with Mobile CBs, Ham Radios, CD Players, Tape Players or Anything Powered with a Vehicle's DC Electrical System
- ► UL Listed
- ► Handy as Bench Power Supply for Electronic Experimenters or Technicians
- ► Push-to-Reset Circuit Breaker
- ► LED "On" Indicator
- ► Massive Heat Sink for Cool Operation
- ► Rated 2.5 Amps Continuous

910-9965. Type 22-504 .... **EACH 39.99**

Premium-Quality Alkalines

- ► Long Shelf Life
- ► High Output at Low Temperatures
- ► Anti-Corrosion Contacts
- ► Cost Less in the Long Run

These exclusive alkalines retain full power during long-term storage and give you top performance even under high current drain. For all standard uses. Non-rechargeable.

Stock No.	Mfr.'s Type	Size	Pkg. Quantity	PER PKG.

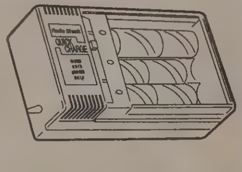
Battery Charger

- ► Automatically Regulated Charging Rate

Type 23-134. Charge up to ten "C", "D" or "AA" batteries at a time in any combination of twos. Also charges up to three 9 V cells. LEDs show when system is charging. UL listed.

910-5180. Type 23-134 .... **EACH 29.99**

Universal Quick Charger



Type 23-233. Charges standard "D", "C", "AA", "AAA", 9 V Ni-Cd batteries in 5 hours. High capacity "D", "C" and "AA" Ni-Cd batteries require longer charging time. Holds six batteries at a time (except 9 V).

910-2333. Type 23-233 .... **EACH 27.99**

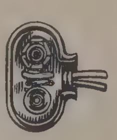
Krypton Flashlights with Batteries

— NEW —

Combo pack includes one "D"-cell flashlight for home or car and one "AA"-cell flashlight for purse or pack, plus heavy-duty batteries for both. Krypton bulbs produce brighter, whiter light than ordinary bulbs.

910-6188. 61-880 .... **EACH 11.99**

T-Type 9-Volt Battery Clips



Type 270-325. Perfect for replacement use in walkie-talkies, radios, tape players and battery-powered portable. ½" spacing. Fits transistor radio and other battery holder connectors. Made of sturdy plastic. Offers long life and excellent resistance to battery acid and physical stresses.

910-5205. Type 270-325 .... **PER PKG./5 1.39**

Battery Checker

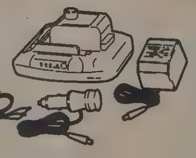
- ► For D/C/9V/AA
- ► AAA/N Sizes

Type 22-096B. For zinc carbon, alkaline, mercury and nickel-cadmium batteries.

910-2137. Type 22-096B. White .... **EACH 8.99**

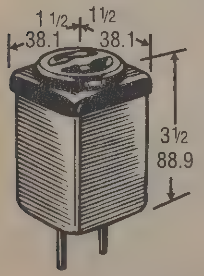
New Deluxe Charger

— NEW —



For 4.8, 6.0, 7.2, and 9.6-volt cellular, camcorder, notebook computer battery packs. Polarity, temperature protection. With AC and DC adapters. Battery not included.

910-2350. 23-250 .... **EACH 49.99**



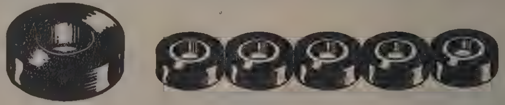
Foreign Travel Converter-Adapter

- ► Convert 220/240 Volts to 120 VAC 50/60 Hz

Type 273-1402. Allows use of 120 VAC irons, broilers, heating pads, etc. from 220/240 volts. Rated at 1000 watts. Built-in thermostat automatically prevents overheating and overloading. 3½" x 1½" x 1½". 3 Oz.

910-5255. Type 273-1402 .... **EACH 17.99**

10,000 Volt Dielectric Vinyl Electrical Tape



Type 64-2350. Protect your electrical connections. Hundreds of industrial, household, shop and auto uses. **Size:** ¾" × 66'.

910-5950. Type 64-2350 .... **EACH 1.99**

Type 64-5960. Handy 5-pack of PVC electrical tape. 5 popular colors for practically any job. Each roll ¾" × 12'.

910-5960. Type 64-2340 .... **PER PK./5 2.49**

*Battery Socket for the FB2325H2.

- Longest Life — 15 Years or More — Due to Their Low Self-Discharge Characteristics, and Hermetically-Sealed Construction
- Highest Cell Voltage — More Than Twice the Voltage of Other Batteries (3.6 V)
- Widest Operating Temperature Range: –55°C to +85°C
- Proven Performance and High Reliability — Used Successfully in the Harshest Environments
- Optimum Cost-Efficiency — Saving Space and Reducing Weight; Lowest Cost Per Unit of Energy
- Highest Energy Density

U9VL Battery

This unique lithium 9-volt battery is more powerful than any other 9-volt battery in the world. The Ultralife U9VL lasts up to 4 times longer than alkaline 9-volt batteries, 10 times longer than carbon-zinc or NiCd 9-volt batteries. Because it's lithium, the U9VL has every advantage: the highest energy-density, most reliability, longest shelf life (up to 10 years), widest operating temperature range (–40°C to 50°C), and lightest weight. Plus, the U9VL has a patented safety mechanism built in that prevents overheating and leakage due to accidental short circuiting or charging.

Ultralife makes a commitment to total quality in its high-technology lithium energy products. Made in the USA at Ultralife's state-of-the-art automated plant, the U9VL is tested to meet the strictest quality and safety standards. Ultralife batteries even carry the component recognition mark of Underwriters Laboratories (UL) — the benchmark of quality.

Specifications. Width: .674". **Height:** 1.933". **Length:** 1.039". **Weight:** 1.35 oz. **mAh Rating:** 1200. **Primary Applications:** Smoke Detectors, Security Devices, Medical Instruments, Meters, Radios, and Toys.

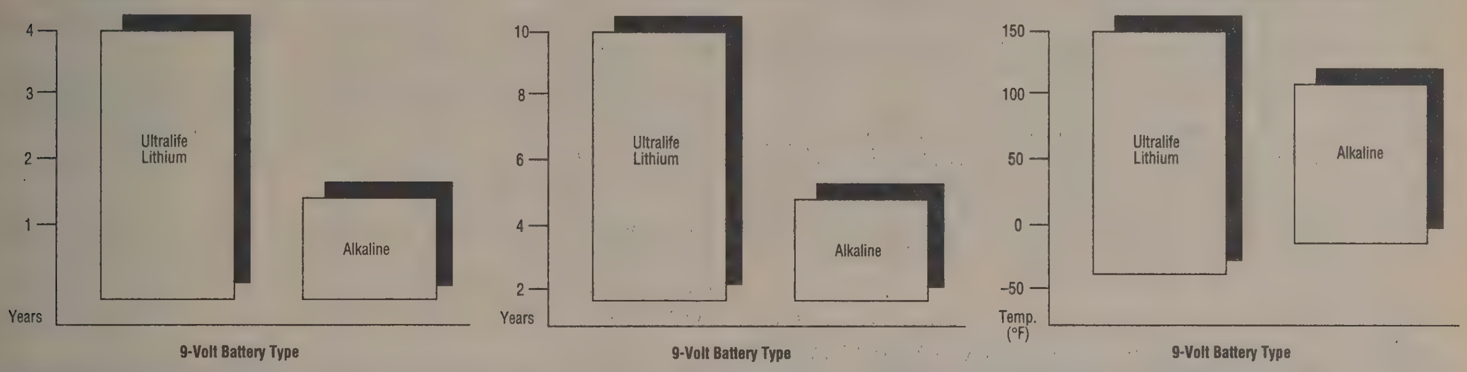
The U9VL Lithium 9-Volt Battery is the Ultimate Power Source for Wireless Security System Installations



Battery Life In A Typical Wireless Transmitter — **Battery Life In Storage** — **Battery Operating Temperature Range**

High-Energy Lithium Photo/Computer Batteries

The advanced Ultralife Lithium technology that created the world's longest-lasting 9-volt battery is now available in photographic batteries.

The new high-energy Ultralife Lithium Photo Batteries fit all cameras and flashes that use 3 V or 6 V lithium batteries. They also provide back-up power for many personal computers.

These batteries deliver exceptionally high energy over the widest temperature range. They also have a remarkably long shelf life, staying fresh in storage up to 10 years. And the Ultralife Lithium chemistry is environmentally friendly — 100% free of toxic metals. UL recognized.

215-0035. UB2CR5..........EACH **6.92**

U3VL Battery

The Ultralife U3VL lithium 3-volt battery is ideal for applications requiring a power source with long life, maximum reliability, and minimum maintenance. With state-of-the-art lithium technology, the U3VL packs an incredible 3,600 mAh capacity into a remarkably compact housing (the flat, rectangular U3VL is about the same size as a normal 9-volt battery).

Because it is lithium, the U3VL has not only a tremendous energy density, but also a long shelf life (up to 10 years), a superior operating temperature range (from –40°C all the way up to 50°C), and environmentally friendly components (no mercury or other heavy metals). Plus, lithium is much lighter than alkaline and other chemistries, so it is the best battery to use for weight-critical applications. And lithium has an exceptionally flat voltage profile, so you can count on steady performance.

Specifications. Width: .660". **Height:** 1.764". **Length:** 1.017". **Weight:** 1.23 oz. **mAh Rating:** 3600. **Primary Applications:** Microprocessors, Memory Back-Up, Security Devices and Meters.

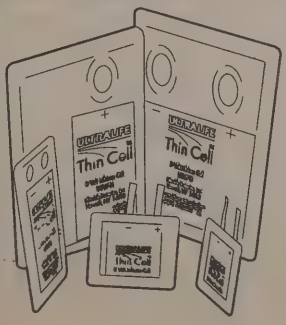
Ultra Life Thin Cells

— NEW —

- **High Specific Energy Cells Can Exceed 300 Wh/kg**
- **High Capacity: From 27 mAh to 2300 mAh Per Cell**
- **High Open Circuit Voltage: 3.2 Volts Per Cell**
- **Long Shelf Life: >10 Years**
- **Wide Operating Temperature Range: –20°C to +50°C**
- **Thin Prismatic Construction: As Thin as 0.5 mm (20 mils)**
- **Environmentally Friendly and Safe: No Toxic Materials**



With a z-dimension of as thin as 0.020 inch (0.5 mm) and an advanced-technology lithium chemistry, Ultralife Thin Cells provide a unique combination of performance and design flexibility.

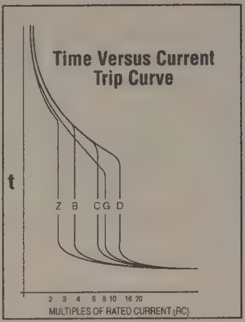
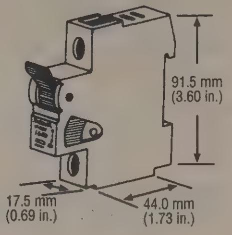
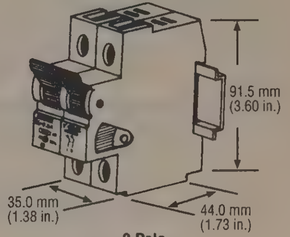
V-EA Circuit Breakers, DIN Rail Mount

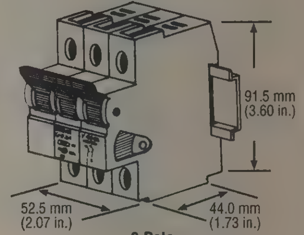




1 Pole



2 Pole



3 Pole

UL® Recognized as noted for group applications of motors and other loads in addition to general purpose applications. Altech/ABL SURSUM V-EA miniature DIN rail mount circuit breakers provide an opportunity for major cost and installation time savings and superior circuit protection.

The V-EA provides disconnect, overload protection, fast half-cycle short-circuit protection and current and energy let-through limiting. It is horsepower-rated for AC across-the-line motor starting and ampere-rated for general purpose applications.

Five trip characteristics are UL® Recognized. All trip characteristics are internationally defined and accepted. The "G" characteristic matches USA and Canadian thermal/magnetic trip norms. All rated currents (RC) have the same housing dimensions and terminal sizes. The V-EA can be loaded with full rated current (100% breaker). Recognized with Line/Load reversibility, i.e., power feed can be field or factory wired to the screw-cage clamp terminals at the "top", range 8 AWG to 3 AWG, or at the "bottom", range 18 AWG to 2 AWG. The V-EA/U is intended for OEM industrial applications, and the V-EA/UC is intended for industrial and commercial applications directly under the jurisdiction of USA and Canadian electrical codes.

World Class Approvals
UL® Recognized. UL1077, group and standard circuits, ampere rated at rated current for general purpose applications and horsepower rated for motor control applications, maximum 480Y/277 VAC (480 V phase-to-phase, 277 VAC to ground/neutral) trip characteristics B, C, D, G and Z..

One Pole and One Pole Plus Neutral. Rated current 0.3 A through 4.0 A, interrupt capacity 35 kA at 277 VAC with any upstream branch-circuit protection.

One Pole and One Pole Plus Neutral. Rated currents 5.0 A through 50 A, interrupt capacity 10 kA with upstream branch circuit fuse sized 350 A or less.

Two Pole and Three Pole. Rated currents 0.3 A through 25 A, standard interrupt capacity 10 kA with upstream branch circuit fuse sized maximum four time V-EA rated current, group interrupt capacity 8.7 kA with upstream branch-circuit protection fuse sized 350 A or less.

Pending UL® Listing. UL 508 for Series V-EA/UC, 1 pole, 2 pole and 3 pole, rated currents 30 A through 50 A. Expected November 1996.

CSA Certification. CAN/CSA-C22.2 No. 14 for Series V-EA/UC, 1 pole, 2 pole and 3 pole, rated currents 30 A through 50 A.

International: For various trip characteristics and rated currents, CENELEC/VDE, Germanischer Lloyds, SEV, SEMKO, NEMKO. CE mark on request.

*Locked Rotor Current Rating in lieu of Horsepower Rating. †UL and CSA Pending. Single Phase and "Two Phase" HP for 2 Pole V-EA are greater than or equal to Three Phase HP.

B Characteristic

"B" Thermal 1 hour trip zone 1.13 to 1.45 times V-EA rated current (RC); Magnetic 100 ms trip boundary 3 to 5 times RC. The "B" and "C" characteristics are for special applications requiring magnetic trips at lower overcurrent levels than the "G" or "D". Its thermal trip is delayed more than USA and Canadian norms, which allows less derating in higher temperature applications. Conductors may need to be sized larger to avoid excessive heating in overload conditions. "B" Trip Curve: CENELEC characteristic for residential and similar applications. European residential branch-circuits start at 6 amperes. For residential applications, special order "VDE" stamp required. CENELEC/VDE certifications can be provided.

V-EA Circuit Breakers, DIN Rail Mount

"G" Characteristic

Magnetic 100 ms trip boundary is at 8 to 10 times rated current (RC) (i.e., hold for at least 100 ms at 8 times RC, trip in less than 100 ms at 10 times RC). At short-circuit currents, the V-EA typically trips in less than 1 ms and clears in less than 8 ms (half-cycle breaker).

Meets USA trip time-versus-current norms. The V-EA-G will thermally trip in about one hour at 125% of its RC, trip in less than one hour at 135% of RC, trip in less than 10 seconds at 600% of RC, hold for at least one hour at 105% of RC, and carry 100% of RC continuously (all at cold-start from 20°C to 25°C). When at operating temperature the times will be 25% to 50% of those given for cold-starts.

IEC/CEE general industrial trip characteristic. Meets USA and Canadian thermal and magnetic trip norms. It is suitable for most general industrial applications within its ratings. Most CENELEC and PacificBasin countries are signatories.

"Z" Characteristic

Thermal one hour trip zone 1.05 to 1.35 times rated current (RC); Magnetic 100 ms trip zone 2 to 3 times RC. Semiconductor Protection. The "Z" characteristic is intended for protection of loads that can withstand only very low I²t energy exposure (e.g. some electronic circuits). The Magnetic trip is very fast. The Thermal trip is the same as the "G" and meets USA, Canadian norms. Trip Curve. Specialty defined characteristic, primarily for Semiconductor protection (test applications).

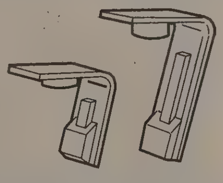
Accessories

V-EA Touch Protectors



The V-EA protects against electrical shock during manual actuation in accordance with VDE 0106/Part 100 and VDE 0470/Part 1, with "finger safe" terminal-screw heads and "back of hand" safe terminals. If additional "touch" protection is desired, separate touch protector covers can easily be snapped on to the V-EA top and/or bottom terminals.

"C" Characteristic

Thermal one hour trip zone 1.13 to 1.45 times V-EA rated current (RC); Magnetic 100 ms trip boundary 5 to 10 times RC. Trip Curve. Secondary CENELEC characteristic for residential and similar applications. Used for higher-inrush circuits, such as motor loads. As with "B", specify "VDE stamp required" for European residential applications.

"D" Characteristic

Thermal one hour trip zone 1.13 to 1.45 times rated current (RC); Magnetic 100 ms trip boundary 10 to 16 times RC. CENELEC high-inrush industrial. The "D" characteristic meets USA and Canadian magnetic trip norms for high-inrush applications (transformers, high efficiency motors, etc.) Thermal trips are the same as the "B". Trip Curve. CENELEC industrial curve, particularly for motor and similar applications. No VDE required (not for residential use).

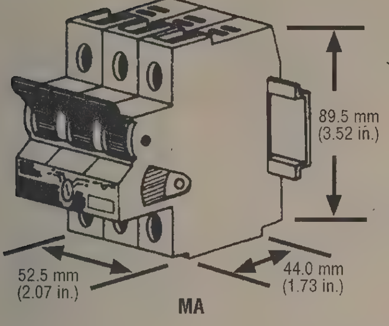
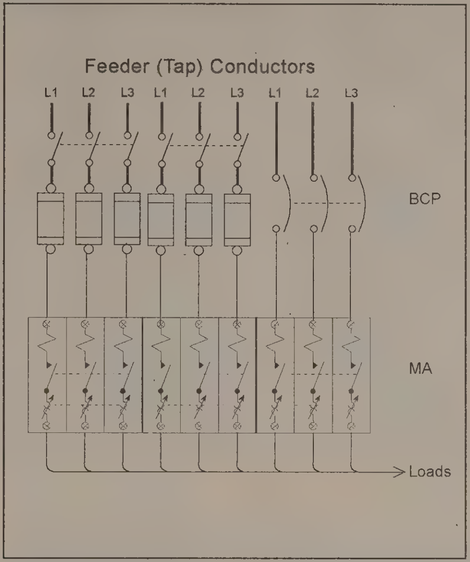
MA Three Phase Adjustable Circuit Breakers — 35 mm DIN Rail Mount

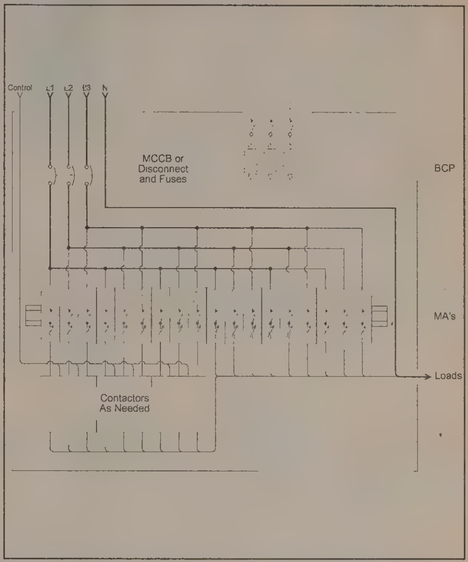


MA

Standard Circuit



Group Circuit



The Altech/ABL SURSUM MA holds through starting and inrush currents of three phase transformers, lighting, power supplies and motors (including the new high efficiency motors) yet provides tight overload protection, fast half-cycle short-circuit protection, and current/energy let-through protection.

The MA is UL 508 Listed and UL® certified to CAN/CSA-C22.2 No. 14 (C-UL) as a manual motor controller with group ratings, and functions as a 3-phase disconnect, overload protector and controller in one compact DIN rail mounted package. It is a thermal/magnetic circuit breaker in the IEC style with thermal overload trip curves calibrated for USA norms. With the adjustment dial set at the full-load-amps (FLA) of the load, the MA/U cold-start trips in about one hour at an overload of 115% FLA and in less than 10 seconds at 600% FLA, and hot-start trips in less than two minutes at 150% FLA (i.e., Class 10 A overload device). The MA/U is therefore suitable overload protection for all motor applications covered under NFPA70 - National Electrical Code® 430-32 (a)(1), including those with service factors less than 1.15 or temperature rise over 40°C. With screw-cage clamp terminals which accept 18 AWG to 3 AWG wire factory or field, the MA is particularly well suited for group applications and single motor taps under NEC® 430-53 (c) and (d).

FI Earth Leakage Circuit Breakers — 35 mm DIN Rail Mount

Compact DIN rail mount Earth Leakage Circuit Breakers detect and interrupt ground faults. They are VDE approved for the European system of protecting people, animals, equipment and property from dangerous line-to-ground and shock hazard currents.

Trip-capable on decayed line voltage, marked approval of DIN/VDE, marked "Snowflake" temperature range, marked trip sensitivity to pulsed as well as sinusoidal fault currents, integral test circuit, insensitive to vibration, etc.

US applications include ground fault protection of equipment (GFPE) using the 10 mA and 30 mA fault current ratings, especially when high distributed capacitance or other leakage cause excessive nuisance trips at lower fault currents. Applications for the 300 mA rating are equipment protection and fire prevention by limiting the energy of a fault to less than the minimum ignition energy for many materials.

The FI is not intended to repeatedly make/break currents above rated line current. Breaking capacity is 1500 A for rated line currents through 40 A and 2000 A for 63 A line. Limit let-through to 30,000 A²s for FI-2 and 80,000 A²s for FI-4, or use gL fuses for 10 kA withstand capacity: 16 A line = 63 A fuse; 25 A and 40 A line = 80 A fuse; 63 A line = 100 A fuse.

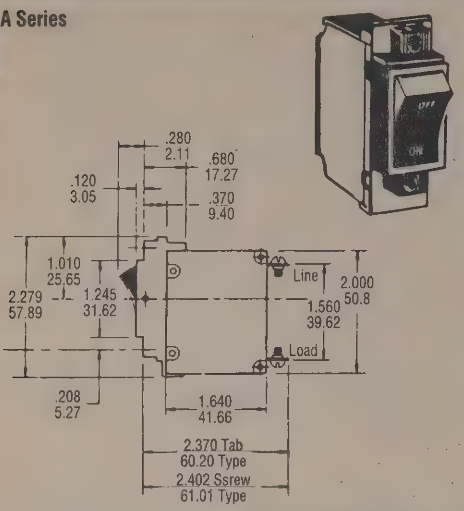
A Series



VISI-Rocker Circuit Protection

Unique molded-in two-color rocker actuator indicates "tripped" mode when breaker is on or off (per illustrations) series trip, 6-32 threaded mounting inserts, push on .250" tab terminals. Rated at 250 VAC/65 VDC. Series trip curve-34 (AC-DC tpe) trip point is 135%. Recognized by UL, Inc. and CSA certified.

BA and CA Series Circuit Breakers

All "B" and "C" series magnetic circuit breakers are recognized by UL, Inc. and are CSA certified and VDE approved.

All products are of a series trip construction, with 6-32 threaded mounting inserts, dual "I-O/ON-OFF" markings on a black toggle actuator, and come with .250" tab (Q.C.) terminals on the "B" series, and 10-32 threaded stud terminals on the "C" series. All units are supplied with an all purpose medium, AC-DC delay curve #34, rated at 227 VAC/65 VDC with trip times as shown below.

Percentage Of Rated Current With Trip Time In Seconds: 135% — 1.8-100; 200% — .60-20; 400%—.15-3; 600% — .03-1.3; 800% — .004-.60; 1000% — .004-.1.

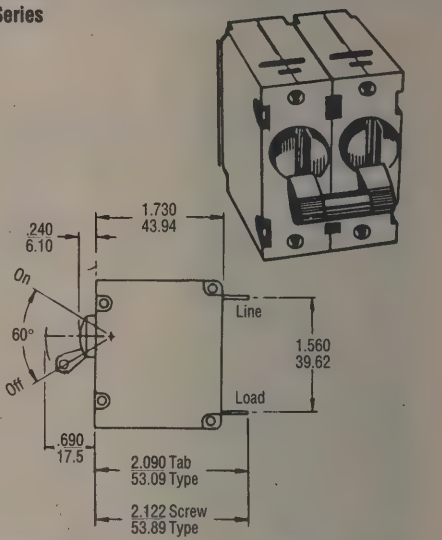
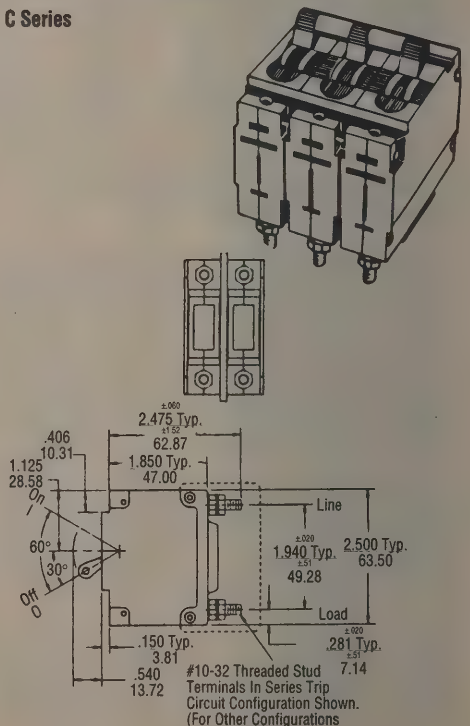
B Series

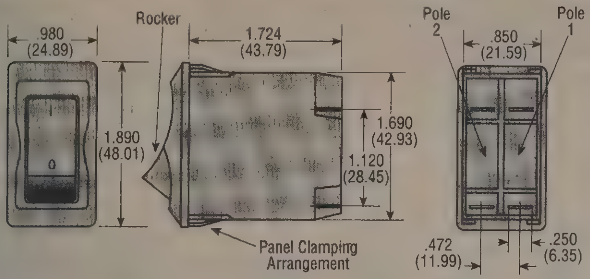


C Series



#10-32 Threaded Stud Terminals In Series Trip Circuit Configuration Shown. (For Other Configurations See PR2002-7181).

Model W33 Rocker Thermal Circuit Breaker



Switchable Rocker Actuated Thermal Circuit Breaker in convenient, snap-in mounting. Trip-free operation. Calibrated to continuously carry 100% of rated load. It may trip between 101% and 135% of rated load, but must trip at 135% within 1 hour at +25°C. **Dielectric Strength:** over 2,000 volts RMS. **Maximum Operating Voltages:** 50 VDC, 250 VAC to 400 Hz. **Interrupt Capacity:** 1,000 amps at 50 VDC; 250 VAC, 60 Hz; 125/250 VAC, 400 Hz; 1,500 amps at 125/250 VAC, 60 Hz. 1/4" Quick-Connect/Solder Terminals. **International Marking:** I/O. **Poles:** S type — Pole 1 – switch only, Pole 2 – series trip overload sensing; T type — Poles 1 and 2 – series trip overload sensing. UL Recognized, CSA Certified. Designed to meet requirements of IEC and VDE.

*120 VAC (Neon with Resistor).

Mini-Mag Hydraulic-Magnetic Circuit Breakers

Rugged construction protects to 30 amps, to 277 volts, 60 Hz AC. Accurately calibrated to carry 100% of rated load and to trip at between 101% and 125% of load. Trip time at 200% of rated load is from 2.2 to 20 seconds. On heavy overloads, a spring-loaded iron piston moves instantly for immediate circuit interruption. Operation unaffected by ambient conditions. Terminals are .250" Quick Disconnect type. **Humidity Resistance:** per MIL-STD-202. **Dielectric Strength:** 1500 VAC 60 Hz. **Reset Time:** Instantaneous. **Voltage Drop:** less than 1.5 V at 1 A or more. **Shock and Vibration:** tested per MIL-STD-202. **Operating Temperature:** –40°C to +85°C. **Insulation Resistance:** 100 megs at 500 VDC. Fungus resistant. **Interruption Capacity:** 5-20 A — 5,000 amps; 30 A — 2,500 amps. **Shipping Weight:** 2.5 oz. per pole. UL recognized and CSA certified.

Multifuse PTC Resettable Overcurrent Protectors

Multifuse products are made from a conductive plastic formed into thin sheets with electrodes attached to either side. The conductive plastic is manufactured from a non-conductive crystalline polymer and a highly conductive carbon black. The electrodes ensure even distribution of power through the device and provide a surface for leads to be attached. The conductive carbon black filler material is dispersed in the polymer. When the polymer is at room temperature, there are numerous carbon chains forming conductive paths through the material. Under a fault condition, I²R heating causes the plastic material's temperature to rise, resulting in a phase transformation of the polymer matrix to an amorphous stricture. This is accompanied with a small expansion. As the conductive particles move apart, most of them no longer conduct current and the resistance of the device increases sharply. The device will remain in this condition until the fault is cleared, allowing the carbon chains to reform as the polymer re-crystallizes. The resistance quickly returns to its original value. While fuses work well only once, replacement is not an option in many applications due to inconvenience, warranty cost or damaged reputations. Applications for resettable devices include computers and PDAs, motors, audio equipment, test and measurement equipment, security and fire alarms, medical, POS equipment, industrial controls, automotive and marine electronics, and battery-operated toys. **Maximum Voltage:** 30 volts. **Maximum Current:** 40 amps. Manufacturer's literature available upon request.

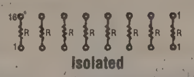
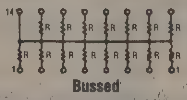
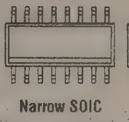
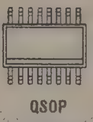
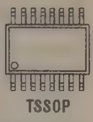
MiniNet Resistor Networks











This new series of miniature MiniNet Resistor Networks is based on a Tantalum Nitride (TN) thin film deposited on a silicon substrate to create the smallest resistor networks available. One of the key factors to consider when selecting these networks is the long-term stability of thin film metalization and lower noise levels compared to thick film ink systems. They offer excellent matching, are the most precise, lowest noise, excellent TTRC and the best TCR available. They are made using IC processing techniques, resulting in networks that are even smaller than an equal number of chips resistors. Package dimensions are based on JEDEC standards. Packages include QSOP (Quarter Sized Outline Package), TSSOP (Thin Shrink Small Outline Package) and Narrow SOIC (Narrow Small Outline Integrated Circuit). With 25 mil. lead spacing for the QSOP, they can be put very close to IC outputs minimizing transmission line mismatching problems. The TSSOP has 25.6 mil. lead spacing and Narrow SOIC has 50 mil. lead spacing. These networks are ideal for applications where space is at a premium. Applications include computers (portable, handheld, notebooks, workstations), telecom (DBS receivers, networks, routers), wireless (pagers, radio, PCN handheld, cellular, LAN), instrumentation (test equipment, controls, sensors), medical (implants, mobile, portable). Manufacturer's literature available upon request.

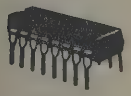
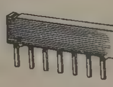
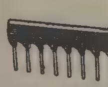
Single and Dual In-Line Resistor Networks



Model 4100

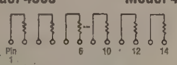


Model 4300

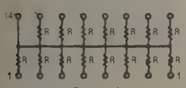


Model 4600

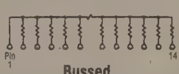
Isolated



Isolated



Bussed



Bussed

The model 4600 is a conformal coated and the model 4300 is a molded single in-line package resistor networks. Their low profile is compatible with DIPs. They are recommended for rosin flux and solvent clean or no clean flux processes. The 4100 series is a molded dual in-line network. Gold Epoxy provides excellent marking contrast for permanent laser marking on all three series. All are compatible with automatic insertion equipment. All are also available in additional values, dual terminators, additional pin count and additional profiles. Call for quote. Manufacturer's literature available upon request.

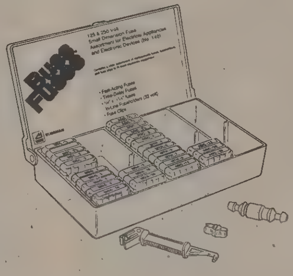
Type 140 Fuse Kit



- ► 125 and 250 Volt Small Dimension Fuse Assortment
- ► Fast Acting and Time Delay Fuses
- ► ¼" × 1¼" Fuses
- ► In-Line Fuseholders
- ► Fuse Clips

Type 140 fuse kit contains the most commonly used fuses. Applications and cross-reference data that comes with the kit helps identify correct fuse replacements. Inventory strips for convenient reordering. 31 different products including 140 fuses in a range of ½ to 30 A, plus 2 fuseholders, fuseclips and one fuse puller. Spaces allow customizing contents by user. Sturdy nylon box with sturdy hinge and positive closure make it ideal for factory or service truck use.

740-9140. Type 140 .... **EACH 145.02**

MDA Time-Delay ¼" × 1¼" Fuses

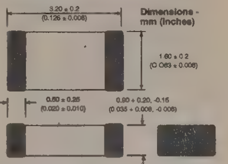
SMT Subminiature Surface Mount Chip Fuses



Bussmann SMT Chip Fuses utilize metal film and ultrasonic wire bond technologies for superior fusing action and enhanced reliability. The fuse element is bonded to a ceramic substrate and encapsulated with glass, providing excellent short circuit performance and environmental integrity. The end terminations are over-plated with nickel and tin-lead. **Catalog Symbol:** 3216FF. **Voltage Rating:** 32 VAC, 63 VDC. **Interrupting Rating:** 50 amp AC/DC. **Physical Size:** EIA SOCM-3216AC 3.2 × 1.6 × 0.90 mm (0.126 × 0.063 × 0.035"). **Agency Approvals:** UL Recognized (All Ratings) File E19180, Guide JDYX2; CSA Certified (1.5-3 A) File 53787, Class 1422-01; CSA Component Acceptance (250-750 mA, 1 A) File 53787, Class 1422-30. **Time Current Characteristics. Fast Acting Fuse:** Will carry 100% of rated current for a minimum of 4 hours, and will open within 5 seconds at 250% of rated current.

HTB International Fuseholders

The 32 Models of the Buss HTB fuseholder offer complete design flexibility. Their reduced size permits maximum space utilization. Their appearance is compatible with aesthetically designed equipment. Designed to UL, CSA and IEC (SEMKO and VDE) standards. The HTB-4 offers high profile while the HTB-2 offers a low profile mounting option. The HTB-6 mounts through rear of panel permitting wire connections to be made to holder before mounting in panel. The HTB-8 provides fast, easy and secure mounting without tools or hardware. Terminal options include in-line or right angle solder 3⁄16" quick-connect and in-line or right angle ¼" quick-connect. The HTB will accept both ¼" × 1¼" and 5 mm × 20 mm fuses simply by changing the carriers. 250 volts.

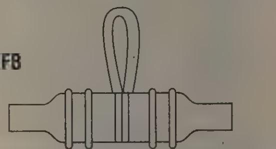
HFB-HHB In-Line Fuseholders

Both HFB and HHB feature easy assembly. Rated 30 amps, 32 volts. High visibility yellow bodies with raised letters. Accept #12'-#18' wires.

HFB



HFB for harsh environments — water, salt spray, ultraviolet, ozone — 40°C to 150°C temp. range.

HHB

HHB universal holder for normal environments. Accepts ¼" × ⅞", ¼" × 1" and ¼" × 1¼" fuses.

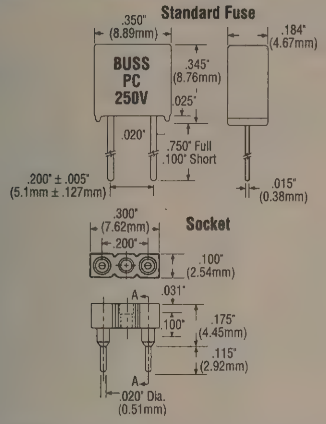
PC-Tron® PC Board Fuses



The PC-Tron™ subminiature fuse offers high short circuit performance which until now could only be found in much larger glass tube fuses. Due to its unique construction the PC-Tron™ limits the I²t (energy let-thru) to very low levels. .2" lead spacing. Auto insertable. Standard wave soldering technique will not affect performance. Optional socket available. Long lead .75" or short lead .10" length. Surface mount versions also available.

Interrupting Rating	10,000 amperes @ 125 VAC; ½—5 amps 50 amperes @ 250 VAC; ½—3 amps

GMT Telecommunication Fuse

HLT

GMT

For multiple panel mounting in small spaces. Color-coded, spring-loaded flag indicates amp rating, performing visual indication when alarm circuit activates. Opening time @ 150% load, 5 mins. (max.). Amp ratings are 125 Vac, or 60 Vdc. **Size:** ¼" × 1 15/32". HLT holder fits all GMT fuses. Multipole holders available.

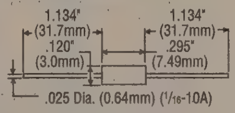
Microtron® Fuses — PC Board



Specifications. Typical Opening Times: 5 sec. max. @ 250%. **Body Material:** High temperature plastic with a U.L. 94VO rating. **Lead Pull Force:** 7 lb. minimum. **Agency Approvals:** U.L. Recognition and CSA Certification. **Units Per Reel:** 2500. **Packaging:** Per E.I.A. Standard RS-296-D. All materials are sulfur free to maintain component solderability. **Interrupting Ratings:** Up to 5 A — 125 VAC - 50 A, 125 VDC - 300 A; 5.1 - 10 A — 60 VAC - 50 A, 90 VDC - 300 A. The Microtron Fuses are designed to safely interrupt 50 amps at 125 VAC. Maximum short circuit current of 300 amps at 125 VAC.

FRN-R and FRS-R Fusetron® Dual-Element Time-Delay Class R Fuses

These fuses are ideal for use in rejection fuse clips or ordinary fuse clips. Fuses will fit existing fused equipment. Fusetron® fuse has a link element which handles only heavy overloads and short-circuits and a thermal cutout element for light overloads. Interrupting rating of 200,000 amperes rms symmetrical. UL listed, CSA certified.

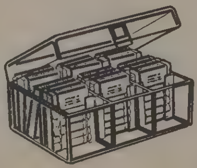
Fuse Kits



Fuse Kit
Fuse caddy offers an assortment of the most popular industrial 3AG slow blow and regular fuses in an attractive plastic case. Kit contains 15 boxes of 5 fuses each in ½, 1, 1½*, 2, 3, and 5 amp. *Slow blow only.
845-9403. Type 094037..**EACH 56.92**

Complete Electronic Kit
The most complete circuit protection kit available. Ideal for schools, hospitals, plants, R&D labs, and maintenance departments. Two hundred eighty of our most popular fuses in a wide assortment of 3AG, 2AG, 5 × 20 mm glass and 3AB ceramic fuses. Also includes 10 variations of fuse clips, fuse blocks, and panel mount and in-line fuseholders. Packaged in a rugged clear plastic box with cross reference information and inventory strips. **Box Dimensions:** 7 5⁄16" × 5 5⁄16" × 1⅞" deep.
845-9404. Type 094376..**EACH 377.24**

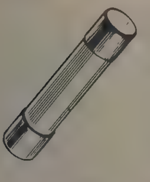
Economy Kit
This kit uses the same case as above but includes 150 of our most popular 3AG and 5 × 20 mm fuses and five variations of fuseholders, clips and blocks. This leaves space for the users to fill in with their most popular fuses and holders.
845-9405. Type 094377..**EACH 141.36**

PC Mount Kit
This kit also uses the same case as Model 094376 except it contains only PC mountable fuses, fuseholders, fuseblocks, and fuse clips. The kit includes an assortment of 200 picofuses, microfuses, 3AG, 5 × 20 mm, and 2AG pigtail fuses. Also included are 10 variations of PC mount fuseholders, fuse blocks, and fuse clips. Perfect kit for engineering departments and R&D labs.
845-9406. Type 094378..**EACH 361.51**

Complete Automotive Fuse Kit
The most complete automotive fuse kit available! This kit includes 200 glass, blade and ceramic fuses for use in all American, European and Japanese vehicles. Also included are 10 variations of fuse blocks and in-line fuseholders. This kit is ideal for automotive maintenance departments. Packaged in a sturdy, clear plastic box, 11⅝" × 6¾" × 1⅝" deep.
845-9407. Type 094379..**EACH 101.53**

Appliance Service Kit
This kit includes 150 of our most popular fuses used in the appliance market. Also included is an additional assortment of 12 items consisting of appliance switches, indicator lights, fuseholders and fuseblocks. This kit is ideal for the appliance repair industry. **Box Dimensions:** 7 5⁄16" × 5 5⁄16" × 1⅝" deep. Extra space is available for adding more items.
845-9408. Type 094380..**EACH 188.56**

3AB Slo-Blo® Type Fuses



Ceramic body construction permits higher interrupting ratings and voltage ratings. Ideal for applications where high current loads are expected. 250 Volts. ¼" × 1¼". **Approvals:** Listed by Underwriters Laboratories and Certified by CSA from ¼ through 10 amperes. Recognized under the Components Program of Underwriters Laboratories from 12 through 30 amperes. **Electrical Characteristics. % of Ampere Rating/Opening Time:** 110% — 4 hrs. min., 135% — 1 hr max., 200% — 5 sec. min.

Subminiature Microfuses

Very fast-acting. Ideal for printed circuits. Features low resistance and high reliability in ultrafast blowing characteristics. Series 279000 has 1" leads for wiring into circuit. Short circuit interrupting capacity 125 volts, 10,000 amps AC. Series 273000 has .170 leads for plugging into subminiature fuse holder. **Blowing Specifications:** 100% — 4 hours minimum; 200% — 5 second maximum; transparent glass cap. 125 V rating. UL Recognized. CSA Certified.

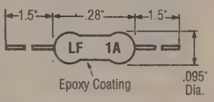
Axial-Lead PICO II™ Subminiature Fuses



For subminiature circuit protection where short circuit currents may be as high as 300 amperes. Low resistance values, high-speed action, insulated terminations, encapsulated epoxy-coated body. Will withstand vibrations of 10-55 Hz per method 201 of MIL-STD-202, and of 55-2000 Hz at 10 Gs per method 204, test condition C, of MIL-STD-202, and shock of 100 Gs for 6 milliseconds per method 213, test condition I of MIL-STD-202. **Operating Ambient Temperature:** –55°C to 125°C. At –55°C current carrying capacity is 110% of rating; at 25°C, 100% of rating; at 125°C, 80% of rating. Fuses will withstand an axial pull of 7 pounds. **Voltage Rating:** 125 V on 1/16-10 amps; 32 V on 12-15 amps. **Body Length:** .280". **Lead Length:** 1.50". **Body Diameter:** .095". **Lead Diameter:** .025" on 1/16-10 amps; .032 on 12-15 amps.

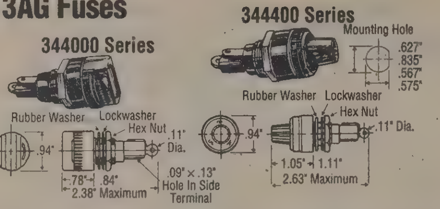
100-499 .... **EACH 7.77**

Blown-Fuse Indicating Panel Mount Type For 3AG Fuses



QPL①

Approvals: Recognized under the Components Program of Underwriters Laboratories and Certified by CSA.

Specifications. Electrical: Rated at 20 amperes at lamp voltage as shown below. Dielectric withstanding voltage exceeds 1500 volts. All fuseholders are supplied with a resistor. When designing indicating type fuseholders into a circuit, consideration should be given to the resistance of fractional amperage fuses and the parallel resistance of the indicator lamp and its resistor. **Mounting:** Withstands 15 lb.-in. mounting torque. Maximum panel thickness is .250". **Molded Parts:** Black thermoset (UL 94V0), except lens is thermoplastic (UL 94V2). See Table below for lens color. **Knob:** Bayonet style. **Terminals:** Copper and copper alloy. Tin-plated. **Ambient Temperature:** –40°C to +60°C. **Hardware:** Neoprene washer, lockwasher and hex nut unassembled.

Omni-Block™ Fuse Mountings

One piece self-aligning fuse clip/terminal design. Breakaway poles for easier stocking and ordering. Protective pole barriers surround each clip to provide greater protection against clip damage and electrical shock. Low profile design. UL recognized and CSA certified at 300 V. Molded of glass filled polyester. UL 94VO flammability rating. **Clip/Terminal:** High tensile spring brass, electro-tin plated. Standard gray color.

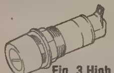

Fig. 3 High Profile Screwdriver Slot Knob

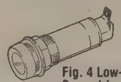

Fig. 4 Low-Profile Screwdriver Slot Knob

Shock-safe design per IEC Standards 65 and 257. Universal fuseholder body accepts 3AG, 5 × 20 mm, and 2AG fuse sizes depending on knob selected. Choice of three terminal styles — dual purpose 3/16" solder/quick-connect, 3/16" NEMA quick-connect, and 1/4" NEMA/DIN quick-connect. UL recognized, CSA certified, VDE approved and SEMKO approved.

For 3AG Fuses

The 2AG fuse provides the same performance characteristics as the universal standard 3AG design in less than one-third the space.

These subminiature fuses offer top quality, reliability, and space-saving protection for your new designs. Available with pigtail leads for direct soldering or for use with #111501 mating PCB fuse clips. The 2AG Series is UL and CSA approved.

Nano²™ Fuses

Nano²™ Very Fast-Acting Type Fuses

Recognized under the Components Program of Underwriters Laboratories and Certified by CSA. Approved by MITI from 1 through 5 amperes. **Operating Temperature:** –55°C to 125°C. **Shock:** MIL-STD-202, Method 213, Test Condition 1 (100 Gs peak for 6 milliseconds). **Vibration:** MIL-STD-202, Method 201 (10-55 Hz, .06 in. total excursion). **Salt Spray:** MIL-STD-202, Method 101, Test Conditions B (48 hours). **Insulation Resistance (After Opening):** MIL-STD-202, Method 302, Test Condition A, (10,000 ohms minimum.) **Resistance to Soldering Heat:** MIL-STD-202, Method 210, Test Conditions F (20 sec. at 260°C). **Thermal Shock:** MIL-STC-202, Method 107, Test Condition B (–65° to 125°C). **Moisture Resistance:** MIL-STD-202, Method 106, High Humidity (90-98 RH), Heat (65°C). **Materials:** Ceramic Body/Tin-Lead Alloy Plated Brass Caps. **Soldering Parameters. Wave Solder:** 500°F (260°C), 10 sec. **Infrared:** 500°F (260°C), 30 sec. **Solderability:** MIL-STD-202, Method 208. **Voltage Rating:** 125. **Agency File Numbers:** UL E10480, CSA LR 29862.

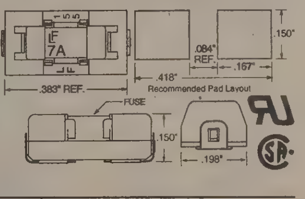
Note: Measured at 10% rated current, 25°C. Measured at 100% rated current, 25°C. Total operating I²t at 50 A and 32 V. Current is limited to less than 50 A at 32 V due to internal fuse resistance.

Omni-Blok® SMF Fuse Block Molded Base and Fuse



Recognized under the Components Program of Underwriters Laboratories and Certified by CSA. **Electricals:** 7 amperes, 125 volts. **Molded Parts:** Thermoplastic (94 VO). **Terminals:** Tin/Lead Alloy Plated Beryllium Copper. **Ambient Temperature:** —55°C to 125°C. **Shock:** MIL-STD-202, Method 213, Test Condition 1 (100 Gs peak for 6 milliseconds). **Vibration:** MIL-STD-202, Method 201 (10-55Hz). **Thermal Shock:** MIL-STD-202, Method 107, Condition A (200 cycles — 30 minutes at –55°C, 30 minutes at 125°C). **Soldering Parameters (Fuse Installed). Infrared:** 500°F (260°C), 30 sec.; 445°F (230°C), 30 sec; **Solderability:** MIL-STD-202, Method 208. Each base comes with fuse.

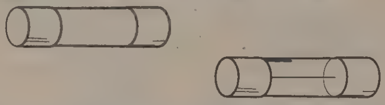
5 × 20 mm Fuses — Low and High Breaking



According to IEC 127, rated 250 V. **Type FSF.** UL recognized, CSA accepted 32 mA-10 A, SEMKO, VDE, BEAB approved 32 mA-6.3 A. **Type FST.** UL recognized, CSA accepted 32 mA-16 A; BSI approved 125 mA-6.3 A; CB, BEAB, SEMKO, VDE approved 32 mA-6.3 A. **Breaking Capacity:** 35 A/250 V. **Type SP.** UL recognized, CSA accepted 500 mA-16 A, VDE, SEMKO, SEV approved 500 mA-6.3 A. Type SP 0001.1001-1012 becomes type SPT 0001.2501-2512 for time-lag high breaking fuses. All available pigtailed.

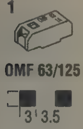
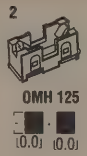
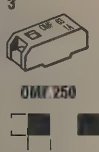
Surface Mount Fuse and Holder

1


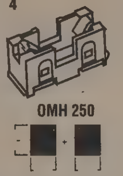
OMF 63/125

2


OMH 125

3


OMF 250

4


OMH 250

OMF 63 V, 125 V and 250 V fast-acting surface mount fuses. OMF 63 V and 125 V blow in less than 10 milliseconds at 400%. Breaking capacity is 50 A AC/DC for the OMF 63 V; 300 A AC/400 A DC for the OMF 125 V. OMF 250 V blows in 300 seconds maximum at 200%. Breaking capacity is 100 A/250 V AC/DC. Made from UL 94V-0 thermoplastic for reflow, vapor-phase and wave soldering. Available in bulk (100 pcs.) OMH 125 V 031.7701.11 and 250 V 031.7702.11 fuseholder optional.

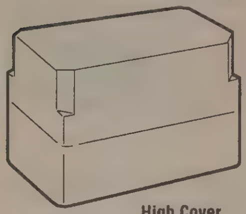
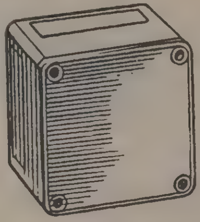
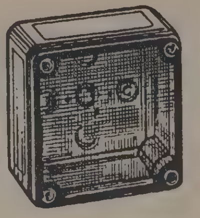
Industrial TK Series Enclosures



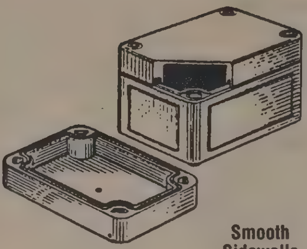
High Cover



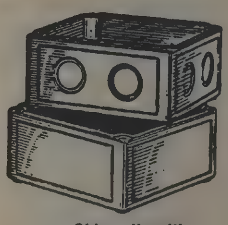
Standard Gray Cover



Transparent Cover



Smooth Sidewalls



Sidewalls with Knockouts

Whenever electrical and electronic components need to be housed in dustproof and watertight, completely insulated and corrosion-free enclosures, Altech/Spelsberg TK series enclosures offer solutions. Enhance the value of your products with their appealing design in a variety of sizes with standard gray or transparent covers in different heights. The exceptional possibilities of subsequent processing (drilling, milling, bonding, lacquering, fitting components) permit virtually all special requirements to be met.

Polycarbonate (PC) — Smooth Sidewalls, without Knockouts, NEMA 4X (IP66)
(PC) knockouts available.

DIN Rail Mount Enclosures

"Get the international look." Package your products and devices in attractive enclosures that come complete with four to 144 ready-to-wire terminals and integral PC board guides. Terminal-to-board connections can be made by wire jumpers, solder tabs and, on some enclosures, with card edge connectors or machine solderable terminals to reduce production time. These enclosures can be easily customized with logos or other imprints. Internationally accepted, they are molded of UL 94VO materials.

- ► 6 to 32 Terminals
- ► Housing Material: Polycarbonate
- ► Cover Material: ABS
- ► Standard Color: Gray
- ► Terminals Rated 25 A (Pluggable to 10 A)
- ► Terminal Covers Optional

Cost effective kits have snap-on covers for easy insertion and removal of PC boards. Pressure plate terminals, fixed and pluggable terminal-to-board connections.

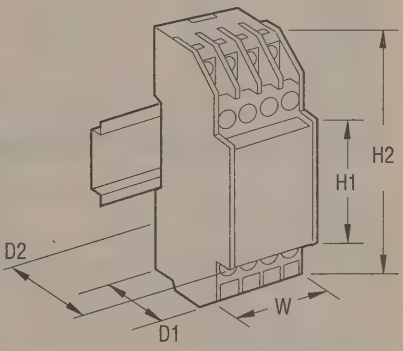
KU4080

- ► 8 to 64 Terminals
- ► Integral Printed Circuit Board Guides
- ► Housing Material: Polycarbonate
- ► Standard Color: Gray
- ► Terminals Rated 10 A



Versatile enclosures provide ample internal space for wiring and electronic components. Kits consist of snap-in double level terminals, cover and base, with integral PC board guides. Machine solderable pins, pressure plate terminals. Fit standard 45 mm DIN cutout in larger enclosures like Altech's EK Series nonmetallic enclosures.

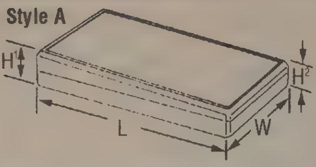
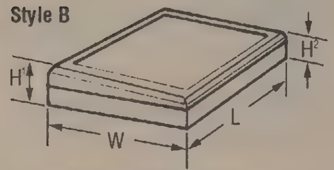
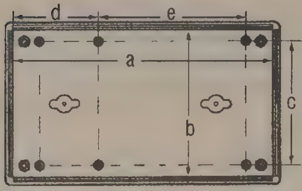
Style A



Style B





Slanted Series Electronic Enclosures

Convenient, easy to customize small ABS enclosure with a slanted top in two designs and three bottom heights. Style A has a 15° incline and Style B has an 8° incline. Top and bottom shells are joined by four self-cutting screws. Multiple mounting provisions for PC boards are provided. The inclined top surface is recessed to accept an aluminum panel of up to 1 mm (.04") thickness. **Standard Color:** Gray.

Aluminum Series Electronic Enclosures

Small to medium size enclosures made of aluminum sheet metal, consisting of an anodized aluminum base with integral front and back panels and a black aluminum cover with integral front and side walls. The base and cover are joined together with four self-cutting screws on both front and back. Supplied as a kit, including screws. Surfaces are protected with a peel-off film.

EMI/RFI Series Electronic Enclosures

Use for RF frequency components such as filters, amplifiers, receivers, etc. and to keep radiation close to its source. ER-371 to ER-374 include dividers and have snap-on covers. ER-433 to ER-454 have deep drawn bottom shells and are used to hermetically seal RF emitting components. Cover is loose fitting; use adhesive or potting compound to attach securely. Both series are made of hot tin plated sheet metal.

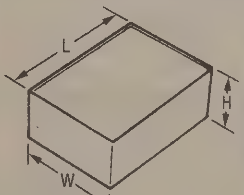
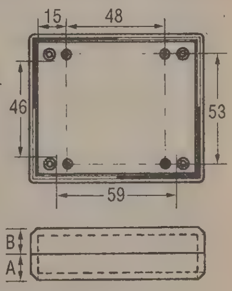
Hand Held Series Electronic Enclosures





Consist of two half shells which are held together by 4 self-cutting screws. Four or more mounting provisions for PC boards are molded to bottom shell. Most HH Series enclosures are supplied with a .5 mm (.01") aluminum panel that fits into a recessed area in the cover. Supplied as a kit.

Front Panel Series Electronic Enclosures

- ► Standard Color: Gray; Black Available
- ► Non-Skid Feet

Consists of two ABS half shells plus front and rear 1 mm (.04") thick aluminum panels which are inserted vertically. Enclosures are complete with integral PC board guides and four PC board mounting provisions. Assembled with two self-cutting screws. Supplied as a complete kit with protective covers on aluminum surface. Some FP Series enclosures are equipped with a battery compartment. Easy to customize.

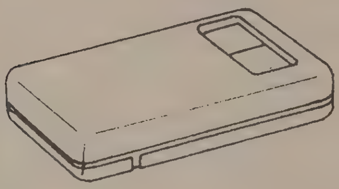
Mini Pocket Series Electronic Enclosures



Available in three sizes with up to four push buttons with or without a clear front panel for infrared signals or a clear top plastic readout. Choose from gray or black ABS housings with blue, red or yellow push buttons. Two half shells assembled with one self-cutting screw. Styles 1 and 3 have four internal mounting provisions for PC boards. Stainless Steel clips are available.

Liquid Tight Strain Reliefs (Cord Grips)

Altech Corp.

Seal cable entries and keep contaminants such as liquids, gases and solid materials from entering into enclosures. Provide strain relief to reduce stress on components and termination points. Available in Polyamide (PA) and Nickel Plated Brass (BN). For additional functions and colors, please contact Altech directly.

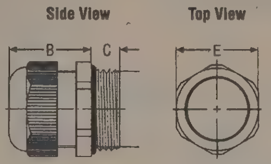
Standard Liquid Tight Strain Reliefs

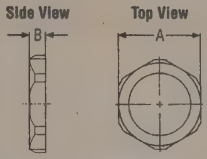
Suitable for most applications, widely used.

Straight-Through

Polyamide (PA)

- PG7 to PG48 and NPT3/8" to NPT3/4" Sizes with Integral Sealing Ridges
- PG29 to PG48 Sizes Have an Additional Preinstalled Polyethylene Seal Ring
- Standard Color: Light Gray





Cord Grips, Polyamide (PA) with Neoprene (NE) Sealing Sleeve

Economizer Cabinet Racks

- 14 Gauge Welded Steel Frame
- Sides Removable From Outside
- Rear Door Included
- 8$\frac{1}{2}$" Dia. Opening In Bottom Panel For Cable Access
- Steel or Plexiglass Front Door Available: Order Separately
- 1 Pair of Adjustable Panel Rails Included
- Finish: Royal Blue or Sand Texture
- Available In 5 Panel Heights and 3 Depths
- Add-A-Racks Available
- Ventilated Version Available

Design Features. Furnished complete with sides, rear door and one pair of panel mounting rails. **Panel Mounting Rails:** 12 gauge steel. Fully adjustable, tapped 10-32 in front on E.I.A. universal spacing. Separate .281" diameter holes provided for mounting accessories. **Rear Door:** 20 gauge steel. Opens 180° to completely clear rear panel space. Can be hinged left or right. Key lock is standard. **Side Panels:** 20 gauge steel. Removable from outside for easy access. **Bottom:** Pierced for RC-7758 casters. Four 1.109" knockouts for cable access. Available in standard Bud finishes at no extra charge. (Also available in 24" width from factory).

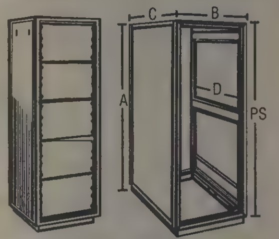
All American Rack

- ► **14 Gauge Welded Steel Frame**
- ► **Sides Removable From Outside, No Screws**
- ► **Rear Door Included**
- ► **Steel and Plexiglass Front Door Available: Order Separately**
- ► **Open Bottom**
- ► **2 Pair Adjustable Panel Mounting Rails Included**
- ► **Finish: White Textured Frame With Sand Textured Sides, Rear Door, and Top**
- ► **Available In 5 Panel Heights and 2 Depths**
- ► **Add-A-Rack Available**



The All-American Rack features a unique combination of steel and aluminum components which provide an optimum blend of strength and economy. The frame is constructed of heavy-duty aluminum extrusions with die-cast aluminum corner brackets and steel supports. The sides, top and doors can be removed from the outside in seconds to provide complete interior accessibility. Available in five panel heights and a choice of 24" or 30" depths, the All-American Rack also offers a wide range of accessories including plexiglass doors for front or rear. An Add-A-Rack system, used to combine two or more racks into one integral system, is also available. For complete engineering data, Form No. AA-87, and to order, contact your local Allied facility.

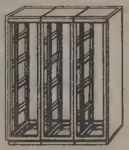
Add-A-Rack System



For Series 60, Series 30 and Series 2000 Cabinet Racks

Used to combine two or more enclosures into one integral system. **Design Features.** Assembly consists of a welded frame, top, bottom and rear door. Aluminum extrusions are included for Series 2000. **Bonus Features.** The advantage of using this system is economy. When developing a band of enclosures, costs can be dramatically reduced by using one complete unit and several Add-A-Rack assemblies to obtain the optimum width. **Finishes:** Order the same color as the cabinet rack.

Wall Mount Relay Rack

These racks provide open relay and distribution rack provisions when floor mounting space is not available. They feature 19" wide panel space, with mounting holes tapped with #12-24 thread on EIA universal spacing on both front and rear flanges, and are constructed of standard natural finish aluminum with heavy gauge aluminum wall mounting brackets. Includes all assembly and panel mounting hardware except for wall attachment fasteners.

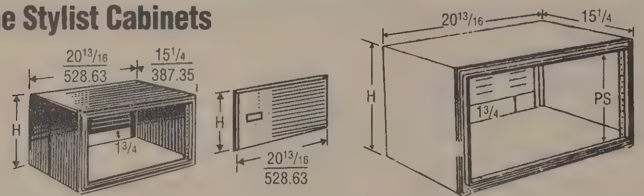
The Stylist Cabinets



Heavy-Load-Bearing Cabinets
Decorative aluminum extrusion trim with black insert frames the front of the cleanly designed cabinet. Square corners enhance the unit's contemporary styling and, in turn, enhance the appearance and marketability of your product. **Design Features.** 16 gauge steel. Rear fitted with louvered panel; 1¾" high opening for cable access. Front and rear openings accept 19" panels or Stylist doors. Self-adhesive feet furnished. **Bonus Features.** Full-width box flanges at top and bottom eliminate tilt and sway even when unit is loaded to its full 500-pound capacity. Cold-rolled steel structure is self supporting, no internal framework. Bustle-type door allows placement of panel behind door for meters, knobs, etc. **Finishes:** Royal blue textured (RB) or gray textured (GT).

Telecom/Open Relay Racks

Ideal for installations where easy access to components is a top priority. Each built for years of solid, trouble-free service, as well as obvious ease of service where frequency attention is desired (i.e. telephone switching systems, etc.)

RR-1263 Series

Design Features: Exceptionally strong structure made up of chassis-type base and supporting angles. Uprights, 7/64"; steel channels, 3" deep; top plate, 1 1/8" × 3 1/8". Rails tapped 10-32 on E.I.A. universal spacing. Base is 19 31/32" × 22" and drilled for RC-7758 casters. Shipped knocked down. **Finishes:** Metallic gray (MG) and black textured (BT).

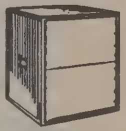
Classic II Portable Cabinets and Cabinet Doors



Whether used independently or as a companion to the Classic II cabinet rack, the design of this distinctive cabinet harmonizes perfectly with the most sophisticated systems. While it's portable, it is equally effective for permanent installations. **Design Features:** Top, bottom and side panels .060 aluminum. Frame, 6063-T5 aluminum extrusions. Accommodates 19" panels. Doors and panels not included but are available. 1/8" aluminum alloy doors attach to mounting rails. Black thermoplastic flush-type latch. **Bonus Features:** Recessed brushed chrome handles are attached to two steel flanges extending the length of the cabinet. This added support assures carrying safety. Two 16 gauge steel vertically adjustable chassis supports included. Shipped completely assembled. **Finishes:** Royal Blue (RB) or Gray Textured (GT).

Fig. B

Fig. C

Fig. A. The Showcase. The design of this Bud unit makes it perfect for your portable instrumentation, yet the versatile, lightweight Showcase will do an effective job as a desktop instrument case, in systems or racks. Compounding its versatility is the fact that the Showcase comes in 10 sizes. **Design Features.** Top, sides and bottom, .050 aluminum; front panel, .090; rear panel, .050. Extruded aluminum frame. Side gussets provide added strength. Strong, flexible handle is recessed and secured firmly into top for safe handling. Ventilation slots under handle. **Bonus Features.** Use with chassis or PC boards. Front panel and chassis may be loaded from front or rear. Comes with front and rear panels and bail. **Finishes:** Two color combinations — black textured (BT) body with white frame or royal blue textured (RB) with white frame. Indicate color when ordering.

Fig. B. The TR Series. With the TR, you'll give your instrumentation a look that sets it far apart from the conventional. Its styling and versatility makes the TR ideal for your application whether it be a portable enclosure, a desk top instrument case or in systems. **Design Features.** Top and bottom, .050 aluminum; front panel, .090 aluminum. Extruded aluminum frame. Corner gussets for added support. Carrying handle may be used as tilting bail. Front panel, self-adhesive rubber feet and handle/bail included. **Bonus Features.** Since chassis is reversible, two configurations are possible with one unit. Top and bottom easily removed for access to dust-free interior. Will accommodate an accessory chassis or ¹/16" thick PC boards. **Finish:** Royal Blue textured (RB) body with white frame, and bail.

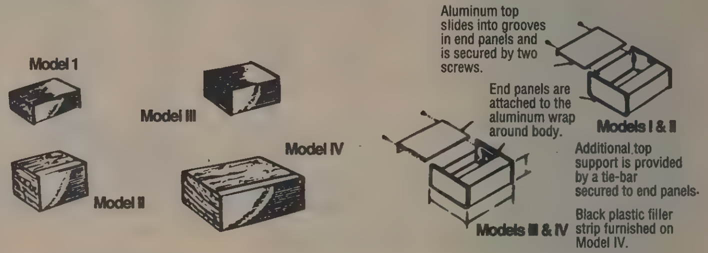
Contempo Series Small Cabinets



Model I
Model III
Model IV
Model II
Aluminum top slides into grooves in end panels and is secured by two screws.
End panels are attached to the aluminum wrap around body.
Models I & II
Additional top support is provided by a tie-bar secured to end panels.
Black plastic filler strip furnished on Model IV.
Models III & IV

Small Cabinets

Here's a versatile line of Bud enclosures you can use for any number of applications, and their versatility is equalled by functional, modern styling. **Design Features.** Body, .062 aluminum; end panels, ⁵/16" molded cycolac plastic. **Bonus Features.** 22 sizes in four styles. Supplied with tie-bar, screws and four self-adhesive rubber feet. Top slides into grooves in end panels and is secured with two screws. Black plastic filler supplied on model IV only. **Finish:** The letter "B" in the prefix designates black pebble end panels with smooth gray body. The letter "W" in the prefix designates woodgrain finish on end panels and top, with smooth eggshell white body.

Special Capabilities for Custom Enclosures

When precision products need to look their innovative best, take a look at Bud. High quality special enclosures create a distinctively functional advantage for sophisticated technical products. Bud, the best known and most preferred line of standard cabinets and enclosures for the electronics industry, has some very special fabrication capabilities that make unique products look as good as they perform.

The Bud reputation for customer service means more than quality products. From design assistance through fabrication and finishing to silk screening and engraving, Bud concentrates of the efficient, economical solution to unique application problems. Bud, the single source for factory value added, extends the industry's finest service policy through a national network of trained sales representatives and Allied. When precision products need to look their innovative best, depend on Bud.

Custom fabrication is standard at Bud. With nearly 3000 standard products in the Bud line, many times our engineers can modify a standard enclosure to meet your special needs. This can even further reduce costs and speed delivery. And, with Bud's extensive tool and die inventory, customers rarely pay tooling charges normally associated with custom fabrication.

Aluminum 2-Piece Miniboxes

Self-contained units for use where shielding as well as protection from dust and dirt is desired. May be used for phono amplifiers, VHF and UHF converters, low-pass TVI filters, test and measurement units, etc. Two-piece construction permits installation of components or wiring modifications. Flanges assure low RF leakage and provide high rigidity. Choice of snap-lock fastening or screw fastening; all hardware supplied. Made of high-quality aluminum — Smooth Gray (SG) or Natural Finish (NF). Easy to cut, punch and drill.

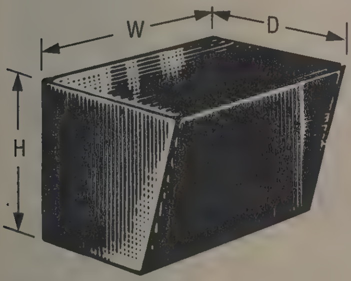
Cowl-Type Miniboxes



Projecting cover on this enclosure reduces glare on front panel from overhead light source. It also supplies protection for controls and dials. Cover has two box braces to which bottom is attached, with sheet metal screws. Made of .040 aluminum alloy. Available in either Natural Aluminum or Metallic Gray finish. See tables below.

Tilt-A-View Cabinets

Present selective angles of viewing for accurate reading of meters, dials and recorders. Viewpoints are obtained with the slanted front face and vertical rear face. The 2" detachable legs allow changing the position of the cabinet to a desired angle. Two-piece 18-gauge steel construction. Lower and upper portions of cabinet fastened with sheet metal screws. Gray textured cover (GT) with white textured body (WH).

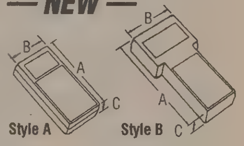
GRABBERS™ Hand Held Plastic Boxes — *NEW* —



These handheld enclosures are ideal for portable test and recording equipment. Made of UL94V-0 rated ABS material. The two styles available are Style A which is rectangular and Style B which is T-shaped.

Versions within each style include a display area with or without an LCD cutout, and with or without a 9-volt/AA battery compartment. **Finish:** Light gray. **Optional Accessories:** Wallmount/tilt stand and cover sealing neoprene gasket.

NEMA 4X Sealed Polycarbonate and ABS Enclosures

- Designed to IP 65 of IEC 529 and NEMA 4X
- Wall Mounting Holes and Cover Attaching Screws Are Outside the Sealing Area, Preventing Ingress of Moisture and Dust
- Internal Bosses Allow Mounting of PCBs Horizontally or for Connection of Terminals, Etc., into Threaded Brass Inserts
- Internal Guide Slots for Mounting PCB Assemblies Vertically
- Cover Screws Are M-4 Stainless Steel, Non-Magnetic and Fasten into Threaded Brass Inserts
- The Polycarbonate Material Has an Operating Temperature of –40°C to +100°C
- ABS Material Has an Operating Temperature of –20°C to +80°C

These polycarbonate and high-impact ABS molded enclosures meet NEMA 4X specifications and are ideal for use in the electrical and electronic industries. Available in six sizes, these molded enclosures are offered in three different versions:

- Light Gray Polycarbonate Body and Clear Polycarbonate Cover
- Light Gray Polycarbonate Body and Cover
- Dark Gray ABS Body and Cover

Polycarbonate, an engineering thermoplastic, features good electrical insulation and heat resistance. The high-impact ABS material is easily drilled and punched. These enclosures are ideal for circuit enclosures and junction boxes. **Wall Thickness:** .118".

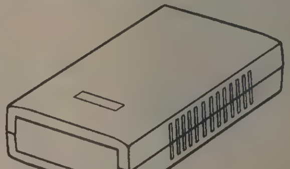
Polystyrene and ABS Molded Enclosures

- Designed to IP 54 of IEC 529
- Two Part Design with Tongue and Groove Joint Between Top and Bottom Covers and Specially Designed End Panels of the Same Material
- Internal Guide Slots Provided for Vertical Mounting of PCBs
- Internal Bosses Provided for Horizontal Mounting of PCBs
- Top and Bottom Covers Are Lightly Textured Providing a Scratch-Resistant, High Quality Finish
- Four M-3 Screws Are Countersunk in the Bottom Cover and Thread into Brass Inserts to Secure the Top Cover and End Panels
- Polystyrene Top and Bottom Covers Are Molded in Dark Gray with End Panels in Light Gray
- ABS Top and Bottom Covers Are Molded in Light Gray with End Panels in Dark Gray



This line of molded enclosures is ideally suited for instrumentation and telecommunications equipment from hand-held to desk top sizes. Available in twelve sizes in either high-impact polystyrene, which is flame retardant to UL94-VO, or high-impact ABS.

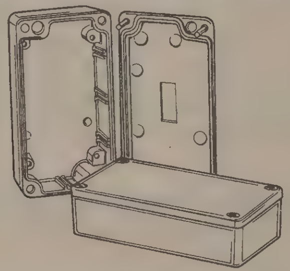
Sealed Die-Cast Aluminum Enclosures



- Designed to IP 65 of IEC 529 and NEMA 4
- Wall Mounting Holes and Cover Attaching Screws Are Outside the Sealing Area Thus Preventing Ingress of Moisture and Dust
- Cover Incorporates a Recessed Neoprene Gasket
- Internal Guide Slots for Mounting PCB Assemblies Vertically
- Internal Bosses for Mounting PCBs Horizontally or for Connecting Terminals, Ground, Etc.
- Screw Holes for Cover Mounting Are Roll Threaded and Screws Are Captivated and Recessed

Die cast in aluminum alloy and resistant to atmospheric and marine corrosion, these enclosures are ideal for housing sensitive electronic assemblies and pneumatic, hydraulic and electrical devices in both commercial and industrial environments. **Specifications. Body and Cover:** Aluminum Alloy #A380. **Gasket:** Neoprene. **Cover Screws:** M-4 Stainless Steel, non-magnetic. **Ground Screw and Washer:** Copper-plated. **Finish:** Natural finish or Gray (add suffix G).

NOTE: Handle/Bail Kits available for PC-11402 and PC-11404 on special request.

Design Features for Style C

- ▶ Impact Resistant ABS with Aluminum Front and Rear Panels
- ▶ Internal Steel Channels Provide Extra Strength and Ease of Assembly
- ▶ Formed Guide Tabs Accept Vertical or Horizontal Circuit Boards
- ▶ Finish: Black with Clear Anodized Aluminum Front and Rear Panels
- ▶ Shipped Assembled

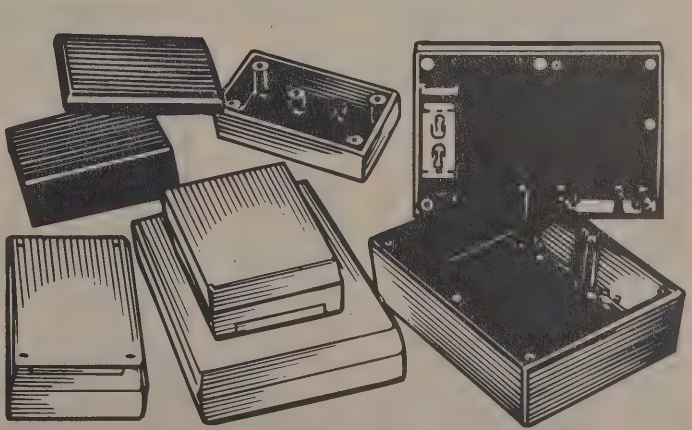
PlastiBox

Available in 3 styles and a variety of sizes, these functional utility enclosures are made from UL rated high-impact ABS with scratch resistant finish. All PlastiBox models come with vertical card guides and are bossed for mounting horizontal circuit cards.



Three styles Are Offered To Meet Your Specific Needs:
- ▶ Textured Body with Smooth Top for Silk Screening Capabilities — Prefix PS
- ▶ Textured Body with Textured Top — Prefix PT
- ▶ Textured Body with Smooth Top and 9-Volt Battery Compartment — Prefix PBS

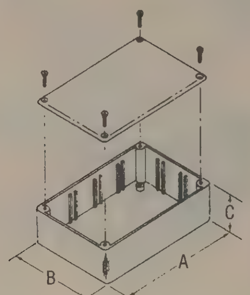
All models are available in 2 molded-in colors, black and gray. All PlastiBox models come with four Non-Skid Feet which mount on bottom of enclosure for table top use. Allied stock is gray. Black available from factory.

Bud Plastic Enclosures — The Utilibox Series

Bud's Utilibox Series is the ultimate value in plastic utility boxes. Now available in 3 styles and 13 sizes.

Style A



- KJB Cycolac Thermoplastic with Flammability Rating of 94-VO at .080" Thickness and Continuous Use Temperature of 70°C
- Card Guides Accept .062" Thick Cards
- Comes with Close Fitting Interlocking Lid and Assembly Hardware
- Finish — Black Is Standard; Special Colors and Finishes Are Available Upon Request

Stock No.	Mfr.'s Type	Dimensions In.*			Weight Ozs.	EACH

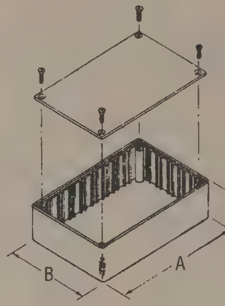
With Mounting Brackets

Two styles of mounting brackets, depending on size of Utilibox needed. To order, add suffix -MB to Utilibox catalog number. Brackets are fastened to Utilibox at the factory and shipped as one unit.

Style B



- Impact Resistant ABS
- Cover Panel — .050" Aluminum
- Card Guides Spaced at .53" Centers Allow Flexibility of Component Placement or Creation of Compartments for Potting; Guides Accept .062" Thick Cards
- Finish — Black Body with Anodized Aluminum Cover Panel
- Shipped Assembled

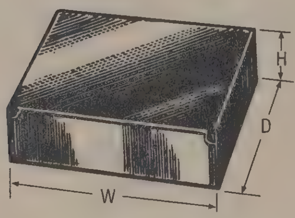
With Mounting Brackets

Optional molded-in mounting brackets are available for all sizes of Style C. To order, add suffix -MB to catalog number.

Aluminum Chassis



Aluminum Chassis

Offer outstanding strength and rigidity for construction of amplifiers, meters and other components. Made from one piece of sheet metal. Welded on government-approved spot welders developed for aluminum. All sides folded in at the bottom for additional support assuring strength and durability. Natural finish aluminum alloy 5005 H-14. .040" Aluminum.

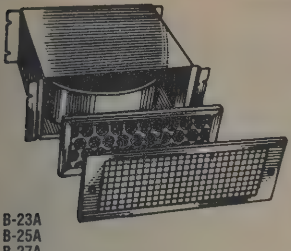
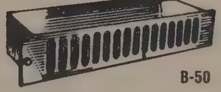
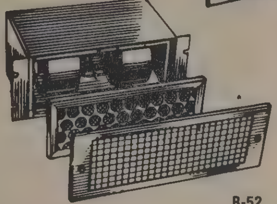
Blowers



B-23A
B-25A
B-27A



B-50



B-52
B-54

Design Features. Panel Heights: 3 1/2", 5 1/4" and 7". All units are 19" panel width with standard EIA notching for rack mounting. Dust filters removed through front panel, no tools needed. All U.L. approved. Guaranteed for 20,000 hours continuous service. 115 volts.

Model B-23A. Two-speed blower requires minimum panel space. Pressurizes or evacuates cabinet as desired. 1400/1150 RPM, 150/60 watt-shaded pole motor. Permanently lubricated ball-bearings. 24" long, 3-wire power cord. 18 lbs.

Model B-25A. Two-speed motor delivers turbulent air distribution to eliminate hot spots in cabinet. Recommended for minimum back pressure. 1135/675 RPM, 410/225 watt-shaded pole motor. Permanently lubricated ball-bearings. 24" long, 3-wire power cord. 30 lbs.

Model B-27A. Two-speed packaged blower. Noise level lower than found in comparable models with equal CFM. Recommended for use where densely packed electronic components require maximum cooling. 1350/850 RPM, 580/370 watt-shaded pole motor. Permanently lubricated ball-bearings. 24" long, 3-wire power cord. 34 lbs.

Model B-52. Designed for applications requiring higher back pressure. Two extra-wide, small-diameter centrifugal blower wheels supply a large volume of clean filtered air to pressurize enclosure. 3000 RPM shaded-pole motor. 70 watts. Permanently lubricated ball-bearings. 24" long, 2-wire power cord. 16 lbs.

Model B-54. Quiet, efficient with dual, slow-speed, low-velocity centrifugal blower wheels. Noise level below average DB level found in most business offices. 1550 RPM, fan-cooled, rubber-mounted 95 watt shaded-pole motor. Permanently lubricated ball-bearings. 24" long, 3-wire power cord. 22 lbs.

Model B-50. Requires only 3 1/2" panel height. Low audible noise level. Air stream delivered vertically through a 12 1/2" wide opening. Air velocity and pressure cool densely packed electronic equipment. 3100 RPM shaded-pole motor. 80 watts. Permanently lubricated ball-bearings. 24" long, 3-wire power cord. 13 lbs.

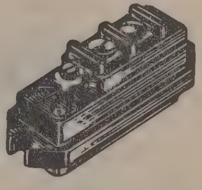
Accessories —
Tem-Stat Temperature Controls



Prevent shut-downs caused by over-heating of electronic or electrical equipment in enclosures. Units react quickly to gradual or sudden temperature changes. **TS-15.** Contacts close when temperature reaches designated setting. Contacts remain closed until there is a 10° ±5°F drop in temperature. **TS-22.** Contacts open when temperature reaches designated setting. Contacts remain open until there is a 10° ±5°F drop in temperature. Can also be used for temperature control in convection and radiant heating applications. U.L. and C.S.A. listed. **Temperature Range:** 80°-170°F. **Temperature Accuracy:** ±8°F.

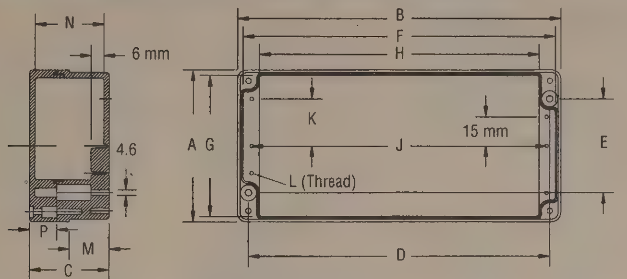
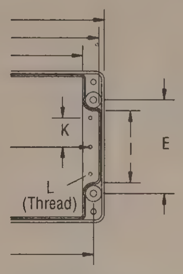
RFI/EFI — Watertight Rolec Diecast Aluminum "Conform" Enclosure

— NEW —



Model 082 and 083



Model 123 and 162

A high quality diecast aluminum enclosure with a patented internal metal to metal, tongue and groove joining system for excellent EMI and RFI protection. This system provides inherently better shielding by eliminating the problems associated with conductive gaskets and allows the use of our neoprene gasketing to ensure an IP65, NEMA 4 seal. Finished in a stone grey, baked enamel paint.

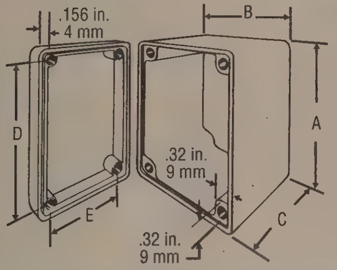
1590 Diecast Aluminum Boxes



These diecast aluminum alloy boxes with tumbled surface come drilled and tapped with countersunk lid and four 6-32 × 1/2 phillips screws (models "D" and "E" have two additional center posts and six screws). These boxes are excellent for RF/audio connectors because of their RF shielding capabilities due to an interlocking flange in the lid. The aluminum alloy allows for easy drilling and punching with the durability of metal.

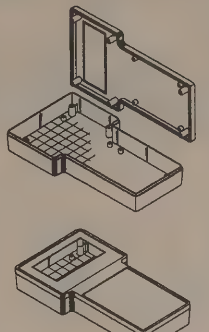
1592 T-Case Hand Held Display Cases



The "T" case is available with two different types of displays. The solid display has an area of 4.8" × 3.4" that will accommodate display boards up to 4.6" × 2.37". The clear polycarbonate lens has an area of 4.0" × 1.77" and a plain mylar mask kit which allows the installation of a wide variety of display boards with the protection of the clear lens and dressed by the mylar frame. The lens can be easily glued snugly into the case and provides protection from dust and dirt. The back of the case has been designed to accommodate a magnetic strip which will allow an operator to affix the case to a suitable work surface. The finish is a light texture which will resist wear but allow high quality silk screening or pad printing. The "T" case is molded in flame-retardant ABS with a UL rating of VO and is stocked in grey or black.

Series 2000 Single Door Enclosures

The Series 2000 enclosures offers the latest in enclosure technology and design for improved aesthetics, convenience and value. Available in two finishes, these enclosures provide flexibility for electrical and electronic applications with UL and CSA listings. Perfect for equipment protection from dust, dirt, oil, water and other contaminants. Simply pick the series that matches your protection level. Also available in 304 stainless steel — call Allied for details.

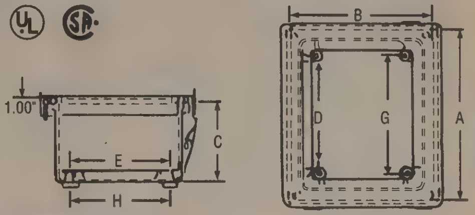
NEMA Type Enclosures and NEMA Wallmount Enclosures

PJ Series Non-Metallic Enclosures NEMA Type 4, 4X



Designed to insulate and house electrical and electronic controls, instruments or components. Enclosure is constructed of strain molded fiberglass reinforced polyester with a matching cover. Features JIC sizing, continuous steel hinge where provided, captive stainless steel cover screws and stainless steel mounted hardware. These enclosures are especially well suited to higher temperature or corrosive environments. Fiberglass material is easily punched, drilled or sawed.

REFK Economy Racks

A knock-down cabinet that couldn't be simpler to assemble — only one bolt in each corner locks the cabinet sides to the top or bottom. The strength comes from the interlocking structure. The two combination panel-accessory rails are fully adjustable. Four adjustable leveling glides are standard on all models. All cabinets are shipped complete except for front and back doors or panels. **Color:** GY2 gray or CG1 contempra gray. **Depth:** 24.5".

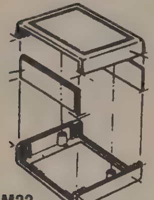
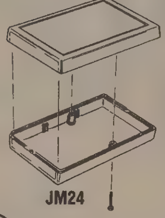
PacTec is the recognized leader in electronics packaging for technology. All enclosure kits are molded in medium impact, ABS, 94HB — 1/8" thick material. PacTec provides built in mounting features which save design and assembly steps and extra hardware. All standard kits are individually packaged and include all necessary component parts and all necessary assembly hardware to build a prototype unit. The standard kits are available in Black and PC Bone; Gray and Tan are available by request on some items. To order a desired color, insert the number of the color where the "N" appears in the Allied stock number — 1=Black; 2=PC Bone; 3=Tan and 4=Gray. All products are available in UL94 V-0 flame retardant material, and can be shielded for EMI/RFI. PacTec enclosures are easily and economically modified using our unique insert tooling methods, or machined secondarily by request as a special order. All PacTec products can be screen printed for custom identification, or have a custom membrane switch or overlay provided.

PacTec has released over 80 new models. PacTec is the company that originated the concept of standard plastic enclosure designs that can be modified and customized. PacTec offers expert design and packaging engineering assistance to help users obtain a custom appearance and special features, for a reasonable cost. Contact your local Allied representative for details and a copy of the latest PacTec Catalog.

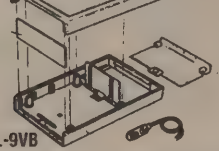
HM/JM Series



JM22



JM24



HML-9VB

For applications in the 2 sq." to 10 sq." the JM and HM are an ideal choice. The JM22, 42 series consists of four pieces — top and bottom cover, front and rear panel. JM24 is 2 pieces — top and bottom cover. The HM and HML series are 3 pieces — top and bottom cover, and 1 panel. The covers and panels can be inexpensively custom molded or modified to your specifications. **Additional Options Available:** Belt clip.

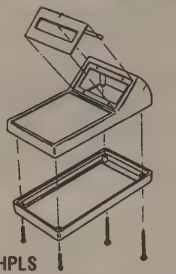
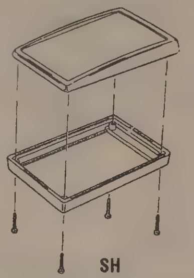
HPS/HPLS Series



HPLS



SH

For applications requiring 20"-30" sq. in PCB space. The HPS, HPLS and SH kits are composed of 3 pieces. The HP and HPLS include display panel. **Additional Options Available:** Expander piece for extra height, display panel bezels, belt clips and wrist straps.

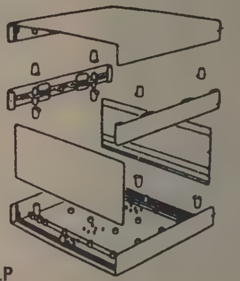
C and CL Series



CLLP

C, CL and CLLP enclosures are modular units with expandable sides. By changing the side expanders, filler panels, spacers and panels, you can build more than 64 different models from a C, CL or CLLP unit. There are handles (H) and bail (B) variations for each basic case. **Additional Options Available:** Vents.

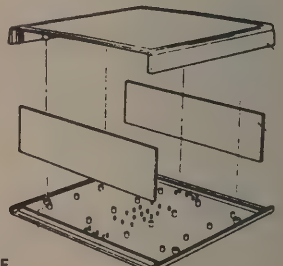
CF Series



CF

CF Series are composed of 4 pieces — top cover, bottom cover and 2 end panels. This series offers options which include: bail tilt stands, and a standard venting pattern. Additionally extra height expanders, which provide further .125", is available for all CF models. The series is best suitable for 76" sq. in PCB applications.

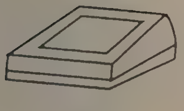
Electronic Enclosure Kits

PACTEC Corp.

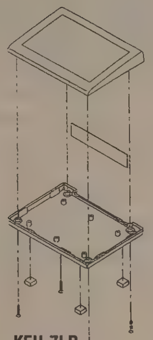
PacTec is the recognized leader in electronics packaging for technology. All enclosure kits are molded in medium impact, ABS, 94HB — 1/8" thick material. PacTec provides built in mounting features which save design and assembly steps and extra hardware. All standard kits are individually packaged and include all necessary component parts and all necessary assembly hardware to build a prototype unit. The standard kits are available in Black and PC Bone; Gray and Tan are available by request on some items. To order a desired color, insert the number of the color where the "N" appears in the Allied stock number — 1=Black; 2=PC Bone; 3=Tan and 4=Gray. All products are available in UL94 V-0 flame retardant material, and can be shielded for EMI/RFI. PacTec enclosures are easily and economically modified using our unique insert tooling methods, or machined secondarily by request as a special order. All PacTec products can be screen printed for custom identification, or have a custom membrane switch or overlay provided.

PacTec has released over 80 new models. PacTec is the company that originated the concept of standard plastic enclosure designs that can be modified and customized. PacTec offers expert design and packaging engineering assistance to help users obtain a custom appearance and special features, for a reasonable cost. Contact your local Allied representative for details and a copy of the latest PacTec Catalog.

KE/KEU Series



KEU-7/10



KEU-7LP

KE, KEU Sloped top stylized keyboard enclosures are composed of four pieces — top cover, bottom cover, aluminum keyboard panel and rear aluminum I/O panel. Newly designed 'LP' versions have a molded in, recessed keyboard panel and a matching color I/O panel in KJW 94 VO material.

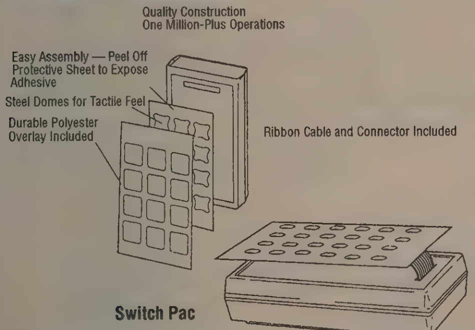
Switch Pac Series



Quality Construction
One Million-Plus Operations
Easy Assembly — Peel Off Protective Sheet to Expose Adhesive
Steel Domes for Tactile Feel
Durable Polyester Overlay Included
Ribbon Cable and Connector Included

Switch Pac

Switch Pacs include 1 enclosure with 9VB compartment, standard membrane switch with ribbon connector, blank overlay, and a user diagram. Membrane switches utilize a durable steel dome design for tactile feel, and are made to withstand one million operations. Switches include flexible ribbon cable and connector. The polyester overlay is ready for you to create switch legends, graphics, transfer type, screen printing, typewriting or hand printing. Custom printed overlays and switches are available through Allied.

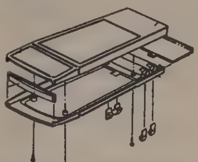
WM/RC Series



RC37-2AA

The RC unit is a low profile, hand held device with a ruby lens for remote control type applications. The RC unit consists of 3 pieces — top and bottom cover, standard front panel or ruby lens. The WM Series is a new vertical and horizontal wall mountable housing, snap together top with a recess for a display area.

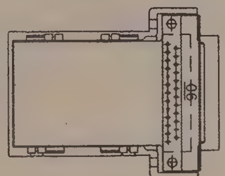
CN Series — Snap Together



Connector/Interface housings feature top and bottom covers that snap together, molded-in connector openings, and customization options for top, bottom, sides and ends. PacTec offers 27 variations of these standard connector enclosures. The height for the body of the housings is .080", the body width is 1.67" and the length varies depending on end.

Mod-U-Line Venting

Moduline cabinets can be ordered with 3 venting options. Specify a vented top panel use part number suffix "**VT**". Use "**VB**" to order an MCLS with vented bottom panel. When both top and bottom panels are to be vented, use suffix "**VTB**". In each case a 1" wide strip of ventilation holes .125" dia. on .25" centers is provided. Ventilation can be provided to customer specifications.

Modifications

PFT does a significant amount of modifications to its standard moduline chassis and modubox instrument cases.

- ▶ 25 Piece Min. Quantity
- ▶ Cut Outs, Rounds, Squares
- ▶ Connector Openings
- ▶ Press in Studs, Standoffs
- ▶ Weld in Studs, Standoffs
- ▶ Silkscreening
- ▶ Special Paint Capability
- ▶ Dimensional Changes
- ▶ Lead Times Generally 5-6 Weeks After Receipt of Order

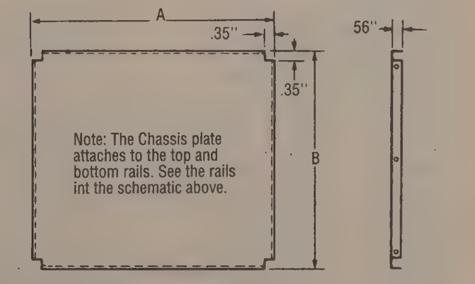
724-1131	CP1714	16.63	12.12	26.15



Note: The Chassis plate attaches to the top and bottom rails. See the rails int the schematic above.

NOTE: The chassis plate is typically used as a substrate to mount power supplies and printed circuit boards.

PFT, Inc. manufactures economical, high-quality desk top and wall mount cabinets, vertical enclosures, chassis products, small instrument boxes, and a variety of data comm products.

PFT has the capability to complete modifications, including hole punching, silkscreening, or size changes. Modifications can be completed on quantities as few as 25 pieces.

Cable Management Rack

- **Drilled and Tapped with 10/32" or 12/24" Mounting Holes per EIA Universal Spacing on Both Front and Rear Flanges**
- **Designed for 19" Rack Equipment, 45 Rack Units in An Overall Height of 84 Inches**
- **All Aluminum construction with Black Polyurethane Finish**
- **Double Bolted Design at Front and Rear; Top and Bottom for Extra Rigidity and to Assure Squareness**
- **A PFT Proprietary Designed Hanger Which Allows for 45 Degree Rotation**
- **All Assembly Hardware Plus Accessory Pack that Includes: 20 Cable Ties, 16 Cable Hangers, 40 Cuphead Screws, Grommeting for Cutouts and Plastic Plugs for 2" Diameter Holes**
- **Lance Mechanism for Attaching Ties Inside the Channel**
- **Cable Tie Slots on Rear of Unit for Additional Cable Management Capability**
- **Large Round Cable Access Cutouts on Rear of Unit**
- **Round Cable Access Holes on Front of Unit**

Now available from PFT — a unique Cable Management Rack that combines all the attributes of a relay rack, raceway and cable routing into one complete unit. This rack features PFT's new proprietary cable management hanger, which is mountable in 45 degree increments.

This all aluminum Cable Management Rack allows mounting of a variety of standard 19" wide patch panels, hubs, concentrators and other data comm equipment in a single rack with built in cable ties, cable hangers and provisions for organized routing of wire and cable. Each rack is shipped knock down for exceptional freight savings in a single carton.

Model CMS1977A. 19" × 77" Cable Management Rack featuring 10/32" tapped mounting holes. **Finish:** black.

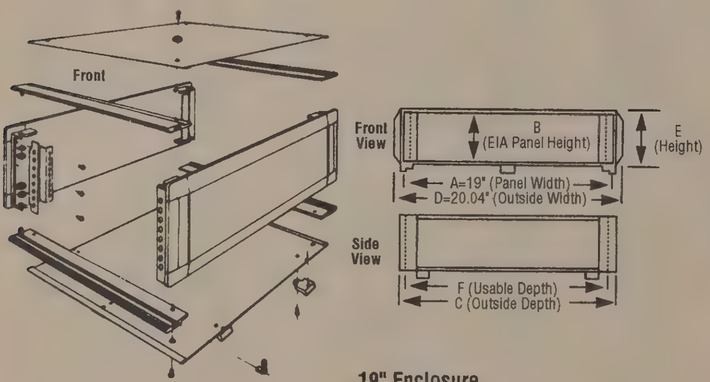
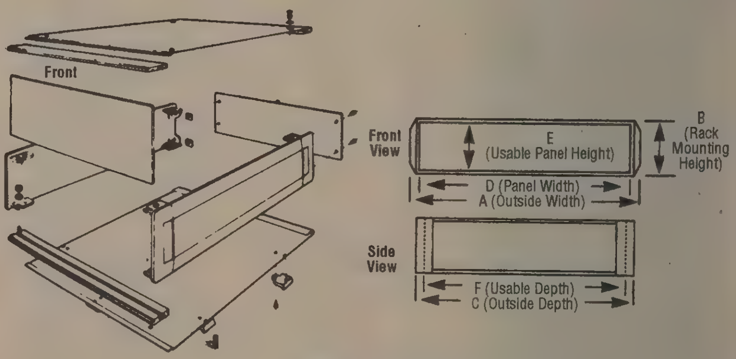
VIP Mini Cab Series

— NEW —



19" Enclosure



6 Way Enclosure

ZERO PFT's VIP Series is ideal for housing electronic equipment and instrumentation. The VIP Series are available in many sizes and colors and can be customized by adding a variety of standard accessories. With the VIP Series, you'll have front office good looks, plus the durability you need for field and laboratory applications. All VIP Series are designed lightweight and strong, using die castings, extrusions and fabricated aluminum sections.

19" Enclosures

- **Self-Retracting Handles**
- **Shipped Pre-Assembled**
- **Top and Bottom Ventilation**
- **Tit Stands Optional**
- **UPS Shippable**

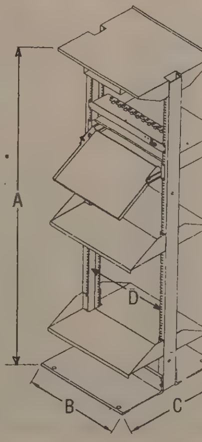
Mod-U-Serv

Mod-U-Serv

- ► **Upright Channels are Drilled and Tapped with Universal EIA Spacing**
- ► **12-24 Tapped Mounting Holes**
- ► **23" Free Standing Base for Extra Stability**
- ► **Constructed of an Extruded Aluminum Base and Upright Channels with Steel Shelves**
- ► **Baked on Paint Finish**
- ► **Shipped Knockdown in One Carton**
- ► **Exceptional Freight Savings**
- ► **Organizes Servers or Towers**
- ► **Full Line of Accessories Available**
- ► **All Shelves Fully Adjustable**

Heavy duty extruded aluminum construction in a pre-designed configuration is ideal for mounting and protecting sensitive communication equipment such as monitors, CPUs, file servers, keyboards, etc. The 23" rack mount width has plenty of room to house the most popular sizes and styles of gear.



MST2356DI. Each Unit Includes: 1 monitor shelf with switch compartment; 8 CPU shelves which mount back to back; 1 surge protected rack mount outlet strip; 1 sliding keyboard shelf; 2 heavy duty extruded aluminum bases (extra deep to allow a freestanding unit); 2 heavy duty extruded aluminum drilled and tapped upright channels. **MST2356TI. Each Unit Includes:** 1 monitor shelf with switch compartment; 4 CPU shelves which mount back to back; 1 surge protected rack mount outlet strip; 1 sliding keyboard shelf; 2 heavy duty extruded aluminum drilled and tapped upright channels; 2 heavy duty extruded aluminum bases (extra deep to allow a free standing unit).

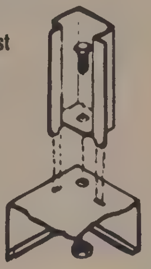
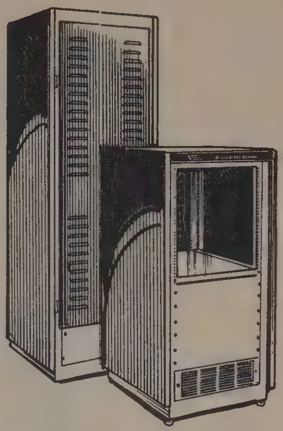
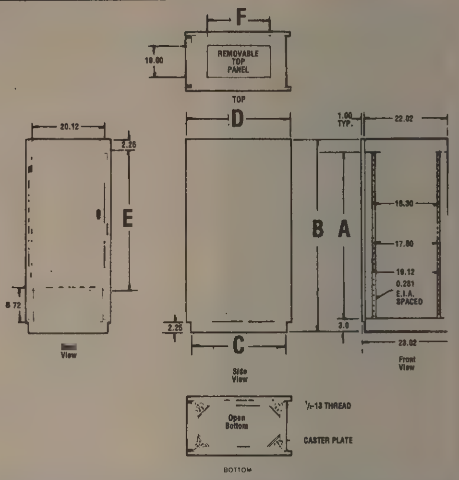
PFT Special Features

- Rack Ships Knockdown in Four Cartons
- Frame Is 14 Gauge Steel; Corner Posts Are 13 Gauge Steel
- Removable Side Panels Made from 18 Gauge Steel
- Lift-Off Rear Door; 18 Gauge Steel Mounts L.H. Side of Frame
- Royal Blue Texture Finish on Rear Door and Side Panels
- Ash White Texture Finish on the Frame
- Multi-Bay Capability
- Knockdown Concept Saves Up to 66% on Freight Cost







Unique Corner Post Design.
PFT combines two unique design features to provide strength and rigidity associated only with expensive welded units. Interlocking tab and slot construction in the corner joints omits torsional movement of the corner posts. A heavy-gauge mounting plate is welded (slightly recessed) into the top and bottom of each corner post. Thus, when the corner bolt is tightened, the cabinet base (or top) flexes slightly, ensuring that the joint is always preloaded in tension, providing additional rigidity.

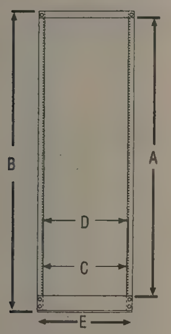
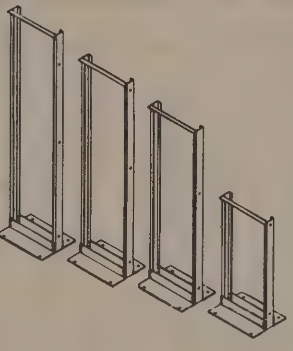
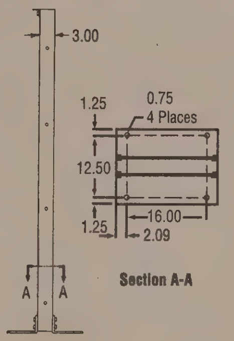
Modular Relay Racks







Section A-A

PFT Special Features

- ► Heavy Duty Aluminum Extrusion Construction Utilizing 6061-T6 Aluminum Alloy
- ► 10-32 Dia. Tapped Holes On Front and Rear Flanges
- ► EIA Hole Spacing Full Height Of Vertical Uprights
- ► Available In Smooth Black Oven Baked Finish
- ► Designed For Multi-Bay Configurations
- ► Able To Ship Via UPS for Economical Freight Costs
- ► Designed to Accommodate A Variety Of PFT Accessories

Each PFT Modular Relay Rack Consists Of:

- ► 2 Fully Tapped Vertical Uprights
- ► 2 Mounting Bases (Front and Rear)
- ► Top Angle
- ► Assembly Hardware

Now available from PFT — Modular Relay Racks that are UPS shippable! These all aluminum open frame racks are available in 19" and 24" rack mount widths with standard EIA hole spacing. PFT Modular Relay Racks are ideal for mounting electronic and test equipment, patch panels, shelves, data-communications and telecommunications products as well as other cabling and rack mount products. PFT Modular Relay Racks offer an economical alternative to your rack mount needs at a fraction of the cost of a fully enclosed vertical enclosure. These racks are ideal when a fully enclosed cabinet is not required. All PFT Modular Relay Racks are shipped unassembled for a significant freight savings. Assembly is easily accomplished in a matter of minutes using standard socket or adjustable wrenches. Racks are designed to bolt to the floor for extra stability.

How To Order. Step One: Select the width, height and depth Modular Rack desired. **Step Two:** Refer to the dimensional chart below to obtain Allied part # and cost. **Step Three:** Refer to accessory items needed to compliment your Modular Relay Rack.

Note: Equipment must be installed 2" deep into cabinet to allow for door mounting hardware. All dimensions approximate.

PFT Modubox Enclosures

- EPA Approved Polyurethane Finishes
- Venting, Cutouts, Other Modifications, and Silkscreening Available

Construction. Modubox enclosures are of high quality construction. Each enclosure has two parts — a sturdy texture painted wrapper of .090" aluminum and a smooth finished insert of .062" aluminum. The inserts are typically modified with cut-outs and silkscreening. Part numbers reflect the basic shapes offered. **MBK:** Modubox Keyboard style. **MBS:** Modubox Sloped front style. **MBL:** Modubox Linear (rectangular) style. Part numbers follow the rough outside dimensions. For example, an MBS030706BW is a sloped front Modubox 3" high, 7" wide, and 6" deep with a blue wrapper and white insert.

Solid-state circuitry for brushless electronic commutation. Features stainless steel ball bearings, 100% dielectric (tested at 600 VAC/1 sec., 500 microamps maximum leakage), low noise, electronic locked rotor protection, and polarity protection. UL recognized and CSA certified. **Operating Temperature Range:** –10 to +60°C. 12/24 VDC nominal. **Venturi:** PBT with glass; black; meets UL94V-0. **Propeller:** PBT; black; meets UL94V-0. Designed to EMI standards per FCC Part 15, Subpart J of Docket 20780, Class A and B radiated and conducted emissions, and per VDE Specification 0871/6.78 for category A and B requirements. **FLIGHT 60.** 8 to 21 CFM (3.7 to 9.9 L/Sec.); 2.36" square × 1.00" deep; 3.5 oz. (.10 kg). **FLIGHT 80.** 20 to 40 CFM (9 to 19 L/Sec.); 3.15" square × 1.00" deep; 4.3 oz. SPRINT® DC Fans

Sprint fans feature low noise, electronic locked rotor protection or impedance protection, and polarity protection. 12 to 39 CFM (8.0 to 18 L/Sec.); 12 or 24 VDC nominal. For ambients of –10°C to +70°C. Encased in a black plastic UL94V-0 housing. Meets FCC and VDE EMI requirements. 3.15" square × 1.25" deep; 6.3 oz. (.18 kg). 2.812" mounting hole centers. Features sleeve bearing models, with stainless steel ball bearing models available.

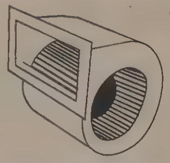
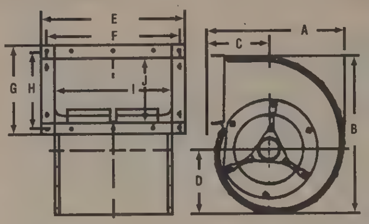
Dual Inlet Centrifugal Blowers





Dual inlet blowers offer a large discharge from a quiet, compact unit. The external rotor motor is inside the forward curved impeller. 115 VAC, 50/60 Hz. See wiring diagram A.

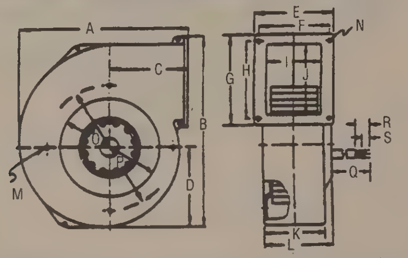
Single Inlet Centrifugal Blowers



ebm's single inlet blowers are supplied with an external rotor motor located inside the forward curved impeller which provides users with an efficient, reliable, space saving design. Easy mounting is provided using the discharge flange or four tapped holes around the inlet. The housing is electrically grounded to the motor. 115 VAC, 50/60 Hz.

Backward Curved Motorized Impellers

The narrow profile of backward curved motorized impellers provides excellent space utilization. The impellers can be used in either evacuating or pressurizing applications and can be mounted horizontally or vertically. Impellers do not require a scrollhousing although an inlet ring is recommended on air inflow. 115 VAC, 50/60 Hz. See wiring diagram A.

900 Series AC Fans

Fans are made of plastic with plastic impeller. Leads stripped and tinned. Mount either face using two .146" (3.7 mm) holes. 900 are air intake-over struts. 950 and 970 are air exhaust-over struts. Phase shift capacitors required and must be ordered separately.

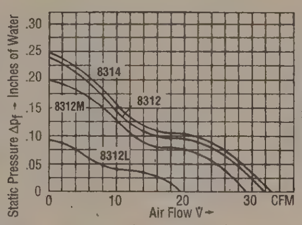
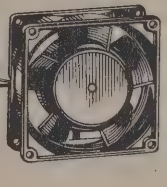
8300 Series Multifans





Fan of fiberglass reinforced plastic. PBTP housing, PA impeller. Electronically commutated DC motor. Clockwise rotation viewed from rotor, air output over struts. Elec. connection via 2 leads AWG 22, TR 64, 12 in. (310 mm). **Mass:** 6.1 oz. (170 g). Ball bearing. **Dimensions:** 3.13" × 3.13" × 1.26" (80 mm × 80 mm × 32 mm).

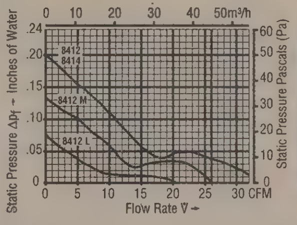
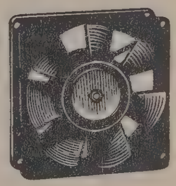
8400 Series Fans





Fan of fiberglass reinforced plastic. PBTP housing, PA impeller. Electronically commutated external rotor DC motor, with electronic protection against blocking and reverse polarity. Air exhaust over struts. Counterclockwise rotation viewed from rotor. Elec. connection via 2 leads AWG 22, TR 64, 310 mm (12.2 in.). **Mass:** 145 g. **Dimensions:** 3¹/₈" × 3¹/₈" × 1" (80 mm × 80 mm × 25 mm).

Plastic Fan Filter Assemblies

Fig. A

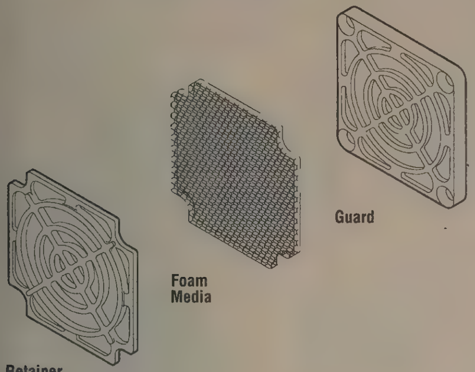

Fig. B

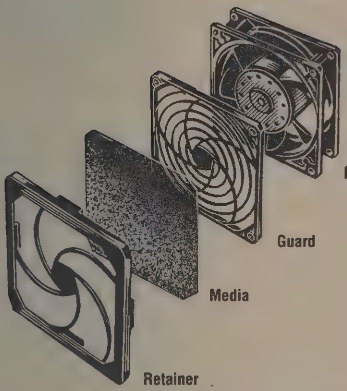

Fan-S offers a unique fan filter package consisting of a guard, foam filter media and media retainer, manufactured with UL listed 94-VO material for 80 mm - $3\frac{1}{8}$", 92 mm - $3\frac{5}{8}$" and 120 mm - $4\frac{1}{2}$" tubeaxial fans for the removal of dust and contaminating particles. Installation is quick and simple: four mounting screws secure the guard portion, then snap on the retainer and filter media with no extra hardware or brackets required.

The two major features of our filter package are safety and low down time. When the filter media requires maintenance, simply taking the retainer off, the media is exposed for cleaning or replacement thus leaving the guard attached to the fan assuring employee protection and eliminating possible damage of the fan component during handling. This leaves the fan operational during servicing thus eliminating down time.

40 mm — $1\frac{1}{2}$" — Fig. A

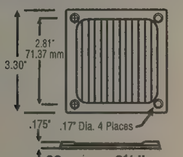
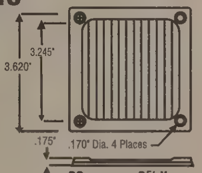
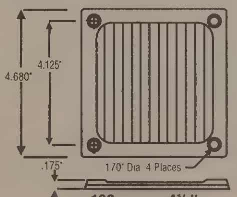
Aluminum Fan Filters



80 mm — $3\frac{1}{8}$"



92 mm — $3\frac{5}{8}$"



120 mm — $4\frac{1}{2}$"

These tested and proven filters provide maximum airflow with effective filtering. Mill and irridite finishes are offered to enhance EMI/RFI shielding as well as an anodized finish for aesthetic purposes. The tightly woven aluminum convoluted mesh screen is encased in a formed aluminum frame built for ruggedness and durability. The units are easily washed in a solvent or degreaser and can be mounted directly to the fan or to a panel.

The 08 series wire form fan guards are designed for use with tubeaxial fan sizes 40 mm - 1½", 50 mm - 2", 60 mm - 2½", 80 mm - 3⅛", 92 mm - 3⅝", 120 mm - 4½", 127 mm - 5", 150 mm - 6" and 254 mm - 10". Our 3/16" and ¼" maximum ring spacing designs were developed to assist our customers in complying with domestic and international safety agency requirements that are in effect today or that may develop in the future. We maintain the highest level of quality control by insuring that we use only the highest grade of materials that must pass a very stringent level of incoming inspection prior to being accepted to our manufacturing inventory. All wire form fan guards are inspected during the manufacturing process to assure compliance to our rigid specifications. They receive an additional final inspection prior to shipment that insures compliance with both mechanical and esthetic parameters. **Specifications.** All guards are designed to ensure safe operation and comply with U.L., CSA and VDE requirements. Nickel chrome plating is standard finish for all wire formed guards. All wire form fan guards listed above are also available in zinc or black electro deposit.

The 09 Series of plastic fan guards offer customers maximum airflow while meeting compliance to safety regulations. The guard attaches to either side of the tubeaxial fan without creating pure tones due to blade passing frequencies. Each guard was tooled with ring spacing that is in compliance with UL ¼" probe requirements. The material is UL rated 94 VO high impact plastic.

AC and DC Cooling Fans

GLOBE MOTORS

The Globe Motors commercial cooling fan product line provides cooling solutions for industrial applications from office copiers, micro-computers and laboratory instrumentation to industrial control cabinets.

Through the use of CAD/CAM and strict statistical process controls (SPC), our fans have a life expectancy of 60,000 hours and a 0.005% field failure rate (50 parts per million).

Special care has been taken to design-in long operating life and low acoustical noise. All fans use precision, life-lubricated ball bearings.

Whirlwind 10" AC Fan

Designed for maximum performance with minimum noise. Sizes range from 4.69" square to 10" round with air flow ranges from 60 CFM to 560 CFM. Features include rugged cast aluminum venturis, impellers are made from thermoplastic with UL94VO rating. All fans are impedance or thermal protected and are UL and CSA approved. The 4.69" fans feature the Patented World Famous Unit Bearing design which will provide extremely quiet operation well in excess of 10 years. The 6" and 10" fans feature long life ball bearing design.

Quiet Force 4.5" AC Fans

- ► Ball Bearing Life Sleeve Bearing Prices
- ► Patented Unique Unit Bearing Design
- ► Normal Life Expectancy in Excess of 10 Years
- ► Rugged Die Cast Zinc Frame
- ► Polycarbonate Molded Impeller
- ► Ultra Quiet Operation
- ► All Supplied with .110 Quick Connect Terminals

- ► **Aluminum Die Cast Frames**
- ► **Low Noise**
- ► **60,000 Hour Life Expectancy**
- ► **UL, CSA, TUV, and VDE Standards**
- ► **Super Efficient**

Orion heavy duty AC fans are in use worldwide in all types of applications. Designed and manufactured to exacting UL/CSA TUV and VDE standards. They have been designed for a life expectancy in excess of 60,000 hours.

*B=Ball bearing; T=Terminal; W=Wire; AP=Aluminum painted; AN=Aluminum die cast. †Also available with 6.8" round as special order. ‡With induction capacitor motor.

Globe Motor Division

Globe Motor Division approved modification centers in Dallas, Texas and San Jose, California are staffed with Globe factory-trained personnel, some of whom have been meeting customer needs for more than 20 years.

This experience allows us to provide additional services in the following areas:

- **Computerized Motor Performance Data Under Load and Temperature Conditions**
- **Machine Shop Capabilities**
- **Inventory Support For Small and Large Product Needs**
- **Custom Configuration Of Any Globe Motor**
- **Design Assistance**

While serving customers through 32 nationwide locations, we also provide engineering assistance though our Motorvation Hot Lines at **1-800-541-4105** or (in Texas only) **214-343-5000.**

Give us a call. Hundreds of satisfied customers do each day. We're the company that cares about your needs.

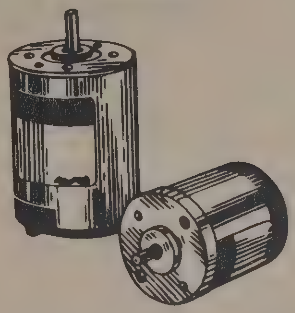
Motors for Industrial Applications

- **For Computer Peripherals, Machine Tools, Instrumentation, Robotics, Office Equipment and Medical Equipment**

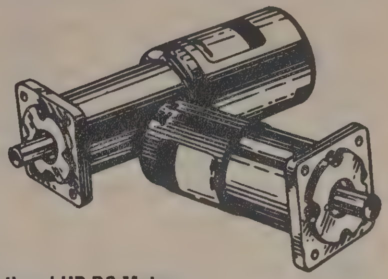
Manufacturers of everything from handheld tools to robotics are finding Globe is a competitive source for quality miniature motors, gearmotors and blowers.

When you need precise, reliable motion in minimum space, Globe can give you the design options and the quality you need to meet rigid material and testing standards.

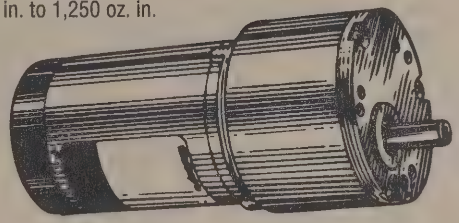
Strategically located distribution modification/assembly centers can make thousands of variations from our basic motor modules, including options in EMI filters, special mounting, tachometers, special couplings and lubrication. With 48-hour delivery of standard units direct from our distributors.



**Fractional HP DC
Planetary Gearmotors**
Standard Gear Ratios: from 4:1 to 46,656:1
Continuous Torque: from .75 oz. in. to 1,250 oz. in.

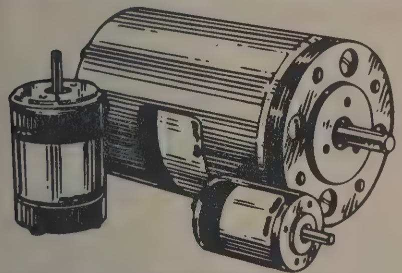


Fractional HP DC Motors
Continuous Torque: from .25 oz. in. to 43.0 oz. in.
Diameter: from 1.3" to 2.6"
VDC: 4, 6, 12, 24, 50, 115

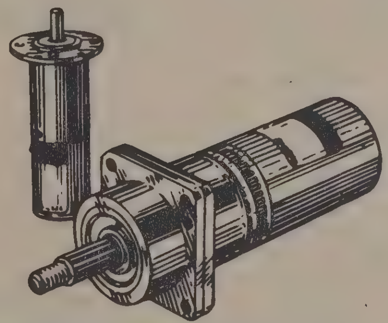


IM-13 Spur Gearmotors
Standard Gear Reduction: from 3.97:1 to 1,276:1
Continuous Torque: from 3.0 oz. in. to 60.0 oz. in.

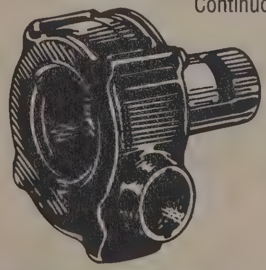
Motors for Military Applications

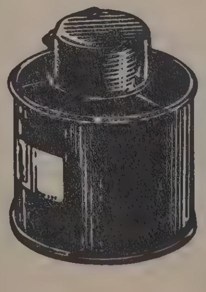


Fractional HP DC PM Motors
Continuous Torque: from 0.20 oz. in. to 16.0 oz. in.
Diameter: from .75" to 2.25"
VDC: 5, 12, 27, 50, 115



Fractional HP DC PM Gearmotors
Standard Gear Ratios: From 3.82:1 to 36,873:1
Continuous Torque: from 1.0 oz. in. to 550 lb. in.





Miniature Fans and Blowers
CFM: from 6 CFM to 600 CFM

- **For Missile Guidance and Control Systems, Missile Fin Actuation, Aircraft Instruments, Control Systems, Aircraft Actuation Systems, Land Track Vehicles-In-Line Fuel Pumps — Transfer and Bilge Pumps — Cabin Ventilation**

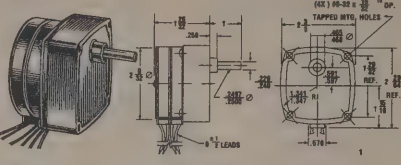
Globe can help you meet rigorous quality, material and testing standards for motors, gearmotors, and blowers.

We can give you custom capabilities and options in actuators (linear and rotary), pumps with leakproof magnetic couplings, torquers, and blowers.

Strategically-located distribution modification/assembly centers can make thousands of variations from our basic motor modules, including options in EMI filters, special mounting, tachometers, special couplings and lubrications, with 48-hour delivery of standard units direct from our distributors.

Stepping, Geared, SAS Series Motors

Geared SAS Series motors have step angles ranging from 0.0125 to 0.75 and torque ratings from 200 ounce inches (maximum gear train loading) to 35 ounce inches. All at 200 p/s. Gear trains are industrial quality throughout. Dual sleeve bearings. **Input Power:** 8 Watts. **Winding Resistance:** 36 ohms. **Weight:** 16 oz.



Stock No.	Mfr.'s Type	Step Angle	Output Speed @ 200 p/s (rpm)	Torque @ 200 p/s* (Oz.-In.)	Steps Per Rev.	EACH

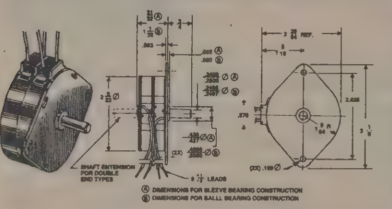
*Torque measured at nominal voltage with L/R drive. †Max. gear train loading.

Stepping, Direct Drive, SAS Series Motors



SHAFT EXTENSION FOR DOUBLE END TYPES
LEADS
Ⓐ DIMENSIONS FOR SLEEVE BEARING CONSTRUCTION
Ⓑ DIMENSIONS FOR BALL BEARING CONSTRUCTION

Industrial quality, economical SAS Series direct stepping motors have excellent torque/size ratio: 7.5 ounce inches at 4-5 p/s. Unipolar operation at 12 VDC is standard. Step angle is 7.5°. Dual sleeve bearings. 48 steps per revolution. **2-Phase Holding Torque (oz-in):** 10.5. **Winding Resistance:** 36 Ohms. **Weight:** 8 oz.

Stock No.	Mfr.'s Type	Steps Angle	Rated Torque @ 4-5 p/s (Oz.-In.)	Input Power (Watts)	Rotor Inertia (Oz.-In.)	EACH

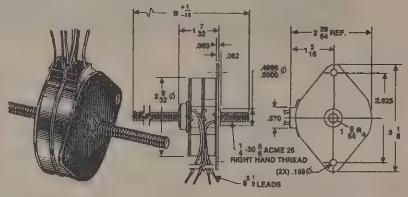
Stepping, Linear Actuator, SLS Series Actuator

Stepping SLS Linear actuator has a reversible, permanent magnet rotor with unipolar operations. Rotor assembly features sintered bronze nut for extended life. Nut accepts ¼" diameter, .048 pitch Acme screw that provides linear motion for pushing, pulling, lifting and positioning applications. Standard 8" screw with maximum travel of 6.75" and maximum thrust of 15 pounds. Ball bearings. **Winding Resistance:** 25 ohms. **Weight:** 10.5 oz. (with screw).



Stock No.	Mfr.'s Type	Steps Inch	Max. Rec. Load	Input Power (Watts)	Nominal Voltage (DC)	EACH

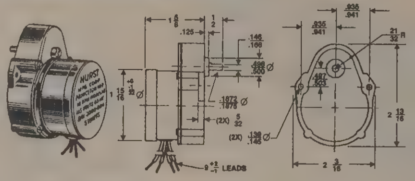
542-0030	SLS4014-002	1000	15 lbs.	11.5	12	**101.81**	**93.33**

Stepping, Geared, AS and ABS Series Motors

Geared AS and ABS stepping motors have a die cast housing, hardened steel gears and pinions running on ground, and hardened steel studs. No plastic or fiber parts are used. These dependable motors are used in precision instruments and computer peripherals. **Winding Resistance:** Models 3004-1001 and -008, 100 ohms; Models 3008-005, 53 ohms.



Stock No.	Mfr.'s Type	Steps Angle	Output Speed @ 200 p/s (rpm)	Torque @ 200 p/s* (Oz.-In.)	Input Power (Watts)	EACH

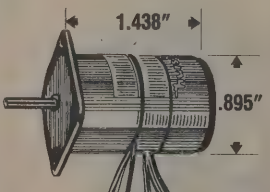
542-0050	AS3004-008	1.800°	60.00	5	3.5	**52.48**	**48.11**

*Torque measured at nominal voltage with L/R drive. †Max. gear train loading.

SUPERSMALL Synchronous Motor

This instrument-grade, SUPERSMALL, synchronous motor is reversible and operates at 720 rpm on 115 VAC, 60 Hz. It weighs just 2.1 ounces and is less than an inch in diameter.

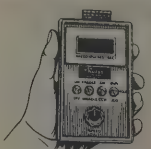


The new BA Series synchronous motor is a practical solution to control problems in equipment where space is at a premium. It also is suited to products employing variable frequency AC controls. **Note:** Capacitor is furnished with motor, 115 V.

Model: BA. **Speed at Output Shaft:** 720 rpm. **Rated Torque:** 0.625 oz-in. **Input Power:** 1.5 watts. **Capacitor Value:** 0.15 ±10%, 400 VDC. **Full Load Temperature Rise:** 30°C. **Weight:** 2.1 oz. **Shaft Bearing:** Sleeve.

542-0200. Type BA 4201-001. **1-24**	**EACH 45.25**
25-Up	**EACH 41.48**

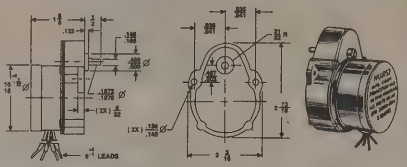
Stepping Motor Control with Display



Model EPC-015. General purpose controller with step frequency display. Operates from a single external 6-24 VDC power display. Will drive 4-phase stepping motors requiring up to 1.0 Amp per phase. Also includes adjustable step frequency, and phase driver disable control. Continuous, single step, or jog operation. Bi-directional control.

542-0060. **1-24**	**EACH 233.58**
25-Up	**EACH 214.12**

Synchronous, Geared, A and AB Series Motors



Permanent magnet, reversible, A and AB Series synchronous motors have gear trains engineered for heavy-duty industrial use. Both pinion and gear teeth are case hardened for wear resistance and rotate upon hardened and ground steel studs. No plastic or fiber parts are used. Capacitor furnished. **Weight:** 11 oz.

Stock No.	Mfr.'s Type	Shaft Speed (rpm)	Rated Torque (Oz.-In.)	Input Power (Watts)	Cap. Value (mfd)	EACH

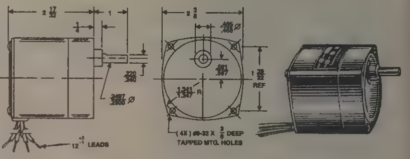
Synchronous, Geared, T Series Motors

Enclosed in a rugged die cast housing. T Series permanent magnet, reversible, synchronous motors have a rated torque of 233 ounce-inches (maximum gear train loading) at 2 rpm. Sleeve bearings. 24 poles. When operated at 60 Hz, rotor speed is 300 rpm. Capacitor is furnished. 115 V, 60 Hz.



Stock No.	Mfr.'s Type	Shaft Speed (rpm)	Rated Torque (Oz.-In.)	Input Power (Watts)	Cap. Value (mfd)	EACH

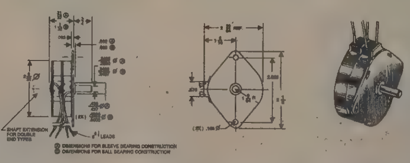
Synchronous, Direct Drive, SA Series Motors



Compact, low cost SA Series direct drive, reversible AC, synchronous motors have a rotor speed of 300 rpm when operated at 60 Hz. Sleeve bearings. Full load temperature rise is 28°C. These permanent magnet motors are ideal for use where space is at a premium and dependable, long-life service is demanded. Capacitor furnished. **Weight:** 8 oz.

Stock No.	Mfr.'s Type	Shaft Speed (rpm)	Rated Torque (Oz.-In.)	Input Power (Watts)	Cap. Value (mfd)	EACH

Hysteresis Synchronous, Geared, Reversible, DA Series

Heavy duty DA Series gearmotors maintain timing accuracy and are available in shaft speeds from 1 to 120 rpm. Recommended for applications requiring high gear torque rating. Rated pull-out torque is as great as 100 ounce inches (maximum gear train loading) at 1 rpm. Capacitor furnished. All motors are 115V, 60 Hz models. **Temperature Rise:** 40°C above ambient. **Weight:** 14 oz.

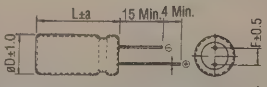
Radial Lead Electrolytic Capacitors



Compact, electrolytic capacitors for original equipment or replacement use in all kinds of communications equipment. **Operating Temperature:** –40° to +85°C. **Capacitance Tolerance:** ±20%. **Life:** 2000 hours at +85°C. **Rated Working Voltage Range:** 10 VDC to 100 VDC. **Capacitance Range:** 0.47 mfd to 10,000 mfd. Straight leads. Solvent proof type, long life. Also available are 105°C devices and 7 mm height devices, call Allied for more information.

Lead Spacing and Dia. — L ≤ 20.0 a = 1.5, L > 20.0 a = 2

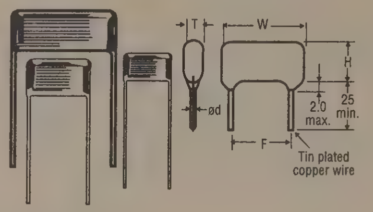
Type MDD Film Capacitors



- **Non-Inductive Construction**
- **Non-Combustible, Epoxy Coated**
- **Capacitance Tolerance: ±10%**
- **250 VDC Rated (130 VAC), 400 VDC (200 VAC), and 630 VDC (250 VAC)**
- **MDD Series Crosses to Panasonic ECQ-EXXXXKZ, S Series**

These resin coated metallized polyester film capacitors are rated 250 VDC and 130 VAC at 60 Hz. **Capacitance Tolerance:** ±10%. **Operating Temperature:** –40°C to +85°C. Non-inductive construction. Non-combustible and epoxy coated. **Insulation Resistance:** Less than 0.33 µF ≥10,000 MΩ × µF. **Dissipation Factor:** ≤1% at 1 kHz. **Stress Voltage Test:** Rated voltage × 1.5 for one minute.

250 VDC (130 VAC at 60 Hz)

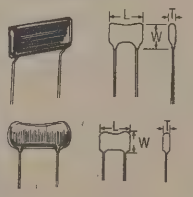
Dipped Mica Dielectric Capacitors



Dipped Mica Dielectric Capacitors in miniature styles (CD6 and CD7) use in delay lines and IF transformers. Other styles are larger and higher rated capacitors. All types feature a dipping process to impart high moisture and humidity resistance. All leads are copper weld for improved solderability. They are available in a wide range of sizes and ratings to meet application requirements. Units are marked with Manufacturers name or symbol, nominal capacitance in pF and percent tolerance, and DC working voltage. Miniature units (CD6 and CD7) are marked with capacitance in pF and tolerance letter designation. All have operating temperature range of –55°C to +125°C.

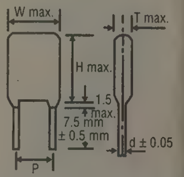
Epoxy Coated Polyester Film Capacitors



Design and Construction. Dielectric: Polyester film (polyethylene terepthalate film). **Electrode:** Aluminum foil — inductive wind — welded tabs. **Winding:** Fully automatic. **Terminals:** Copper plated steel wire with solder coat (straight leads). **Coverage:** Coated with epoxy resin (dipping method).

Rated Values and Characteristics
Nominal Capacitance: 0.001 mfd. to 0.47 mfd.
Capacitance Tolerance: ±10%. **Rated DC Voltage:** 100 V. **Temperature Range:** –40°C to +85°C. **Test Voltage:** 200% of rated DC voltage for 60 sec. **Insulation Resistance:** More than 9,000 M ohms, avg. 100,00 M ohms at 20°C. **Dissipation Factor (Tan Theta):** Below 0.8%, avg. 0.4% at 1,000 Hz, 20°C.

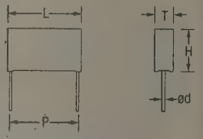
Type CF-KC Capacitors



UL, CSA, VDE, SEMCO SEV, EI/FIMKO, DEMKO and NEMKO recognized for across-the-line, antenna-isolation and line-bypass capacitors. These metallized plastic film capacitors are non-inductively wound in a plastic case and sealed in resin. The radial leads are tin plated copper. Markings are on the top and side in approved standards. **Temperature Range:** –40°C to +85°C. **Rated Voltage:** 250 VAC. **Tolerance:** 20%. **Dissipation Factor:** 0.01 or less at 25°C (1 KHz).

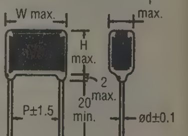
Type CF-MH Film Capacitors

- **UL, CSA and European Safety Standard Film Capacitors**



UL, CSA, VDE, and SEMCO recognized for across-the-line. Type CF-MH capacitors are constructed of metallized plastic film enclosed in a noncombustible resin. **Temperature Range:** –40°C to +85°C. **Capacitance Range:** 0.01 µF to 0.22 µF. **Capacitance Tolerance:** ±20%. **Rated Voltage:** 250 VAC (50, 60 Hz). **Withstand Voltage:** Between terminals — 1000 VAC for 1 min; Between terminals and enclosure — 2000 VAC for 1 min. **Insulation Resistance:** Between terminals — more than 12,000 MΩ at 100 VDC after 1 min. **Dissipation Factor:** 1% or less than 1% (1 KHz 25°C).

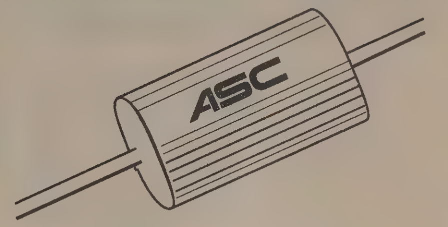
X363 Metallized Polypropylene



- ► Long Stable Life
- ► Lowest Dissipation Factor
- ► Very High Insulation Resistance
- ► Fully Rated At 105°C

Non-inductive wound metallized polypropylene construction. Case is polyester tape wrap and epoxy end fill. Leads are solder coated or tinned solid wire. Excellent stability plus outstanding electrical properties make the X363 ideal for use in timing and integrating circuitry in instrumentation. The X363 exhibits negligible capacitance drift and electrical property degradation under environmental conditions normally requiring hermetically sealed encasements with other dielectrics. Temperature must be limited to 105°C. The X363 is ideal where close tolerance is required because of inherent stability with service conditions and life. The inherent long life characteristics and reliable performance capability of the X363 render it suitable for a wide variety of military applications where hermetic sealing or temperature capability higher than 105°C are not requirements. Markings include logo, capacitance, tolerance, and voltage. When space permits, capacitor type and EIA date code will be marked. 5% tolerance.

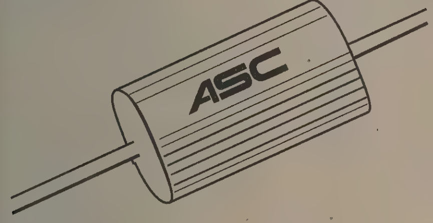
X465 Metallized Polycarbonate



- ► Round Axial Wrap And Fill Construction
- ► Cost Effective
- ► Miniature Size And Light Weight
- ► Rated Up To 125°C Without Derating

Non-inductive wound metallized polycarbonate construction with polyester tape wrap and epoxy end fill case. Leads are either solder coated or tinned solid wire. The X465 is ideal for circuits requiring NPO type characteristics. Rated up to 125°C without derating. Low dissipation factor makes polycarbonate ideal for pulse circuit applications up to 250 KHz. Stability and retrace capabilities of polycarbonate make this an excellent choice where long term precision is a requirement, such as timing, precision and other circuits requiring long term stability. Markings to include logo, capacitance, tolerance, voltage. Where space permits, capacitor type and EIA date code will be marked. 5% tolerance.

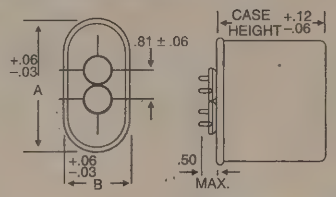
X387S Metallized Polypropylene



- ► Motor Run Capacitors
- ► Extremely Low Losses and Heat Dissipation
- ► Non-PCB Oil Filled
- ► Self-Healing Ability
- ► UL Approved Internal Protection Device

ASC oil-filled capacitors employ high quality metallized polypropylene film dielectric. They are non-PCB oil-filled in metal cases designed for industrial applications, motor run applications in refrigeration and air conditioning equipment, power factor correction, power supplies, and general purpose AC applications. Non-inductive wound metallized polypropylene, oil-filled (non-toxic, disposable) construction. Non-corrosive seamless can, with double roll lock steel cover, suitable for outdoor applications. Terminals are tin plated, ¼ inch quick disconnect tines. Marking include logo, capacitance, tolerance, voltage, capacitor type, EIA date code. 10% tolerance.

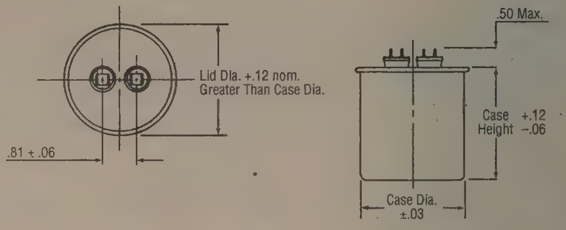
X386S Metallized Polypropylene



- ► Standard Operating Temperature Range: –40°C to +70°C
- ► Non-PCB Oil Filled
- ► Self-Healing Ability for Enhanced Reliability and Long Life
- ► Extremely Low Loss and Heat Dissipation
- ► Other Capacitance Values, Dual Capacitance Values, Tolerances, and Operating Temperature Ranges Available Upon Request
- ► UL Approved Internal Protective Device and CSA Approved

ASC oil-filled capacitors employ high quality metallized polypropylene film dielectric. They are non-PCB oil filled in metal cases designed for industrial applications, motor run applications in refrigeration and air conditioning equipment, power factor correction, power supplies, and general purpose AC applications. They use non-inductive wound metallized polypropylene and oil-filled construction. Short circuits are virtually eliminated due to the self-healing properties of the metallized polypropylene film. They are non-toxic and disposable. Non-corrosive seamless can, with double roll lock aluminum cover, suitable for outdoor applications. Terminals are four ¼" quick tines. 50% size and weight reduction over conventional designs. 10% tolerance. Other capacitance values, tolerances, temperature ranges, and dual capacitors available upon request. Call for price, delivery and minimums.

Hardware

- ► Round or Oval Bracket Style
- ► Economical and Easy to Use
- ► Made to Hold Above Capacitors Securely in Place

Designed in either oval or round bracket styles, these clamps will hold motor run capacitors securely and accurately in place. Made of coated steel, they will withstand vibration, corrosion, and dirty environments.

V_{WM} — Maximum steady-state DC operating voltage the varistor can maintain and not exceed 50 μA leakage current. V_B — Voltage across the device measured at 1 mA DC current. V_C — Maximum peak voltage across the varistor measured at a specified pulse current and waveform(transient energy rating of 0.1 J=2 A, 8/20 μS pulse current and waveform; transient energy rating of 0.2 J=5 A, 8/20 μS pulse current and waveform; transient energy rating of ≥0.4 J=10 A, 8/20 μS pulse current and waveform); I_{peak} — Maximum peak current which may be applied with the specified waveform without device failure; E_{trans} — Maximum energy which may be dissipated with the specified waveform without device failure; C — Device capacitance measured with zero volt bias 0.5 Vrms and 1 kHz. L — Device inductance measured with a current edge rate of 100 mA/nS.

Surface Mount Ceramic Capacitor Kits

Large Surface Mount Ceramic Capacitor Kit

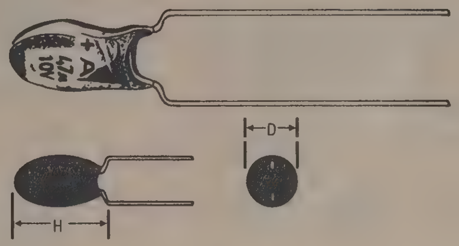
Resin Dipped Radial Capacitors



TAP Series Solid Tantalum Resin Dipped Capacitors

TAP is a professional device manufactured with a flame retardant coating and featuring ultra low leakage current and impedance, very small physical sizes and exceptional temperature stability. It is designed and conditioned to operate to +85°C without derating. The 15 case sizes with wide capacitance and working voltage ranges means the TAP can accommodate almost any requirement. Also available on Tape and Reel for auto insertion.

General Information AVX SR Series

- Conformally Coated Radial Leaded MLC
- Temperature Coefficients: NPO, X7R, Z5U
- 50 V, 100 V (200 V, 300 V, 400 V, and 500 V Available on Request)
- Case Material: Epoxy (Flame Retardant to UL Bulletin 492, Par. 280)
- Lead Material: Solderable
- Cross to Kemet C3XX Series

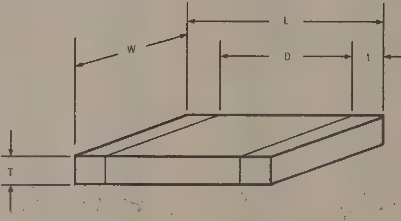
AVX Ceramic Chip Capacitors



AVX ceramic surface mount capacitors, available in NPO, X7R and Z5U, have historically been one of the most reliable electronic components available. NPO and Z7R have temperature coefficients of –55°C to +125°C. NPO is the most popular formulation of the "temperature-compensating" EIA Class I ceramic materials. They show little capacitance change with frequency and dielectric absorption is typically less than 0.6% which is similar to mica and most films. The X7R is the most popular intermediate dielectric-constant formulation that is called "temperature-stable" in ceramics and fall into EIA Class II materials. Capacitance for X7R varies under the influence of electrical operating conditions such as voltage, frequency and time (approximately 5% change in 10 years). Z5U formulations are "general purpose" ceramics which are meant for use in limited temperature applications where small size and cost are important. They provide the highest capacitance density possible in a given size for the three most popular formulations. They show wide variations in electrical operating conditions. Despite their capacitance instability, Z5U formulations are very popular because of their small size, low ESL, low ESR and excellent frequency response. These features are particularly important for decoupling applications where only a minimum capacitance value is required.

Size	Dimensions (mm)				
	Length	Width	Thickness (Max.)	Terminal Width	
				Min.	Max.

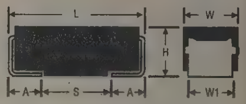
AVX Tantalum Chip Capacitors



AVX offers solid tantalum capacitors in a wide range of sizes, styles and ratings to meet any design needs. The four case sizes offered here are the most popular and conform to EIA standard EIA-535BAAC. The TAJ Series is qualified as MIL-style CWR11. The TAJ Series is temperature rated at –55°C to +85°C.

How to Order (Commercial):

TAJ	B	335	M	016	R
Mfr.'s Type	Case Code	Cap Code	Tol. %	Volt DC	Packaging

Case Code	Dimensions					
	L	W	H	W1	A	S (min.)
A	3.2	1.6	1.6	1.2	0.8	1.1
B	3.5	2.8	1.9	2.2	0.8	1.4
C	6.0	3.2	2.6	2.2	1.3	2.9
D	7.3	4.3	2.9	2.4	1.3	4.4

W1 dimensions applies to the termination width for "A" dimension area only.

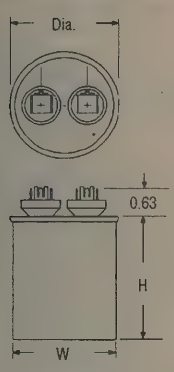
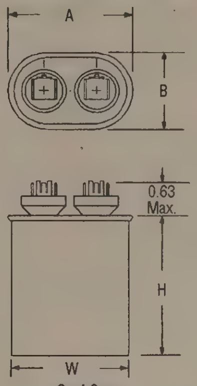
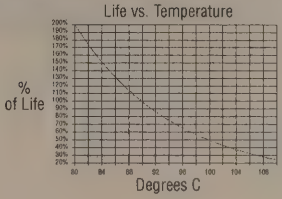
HID Lighting Capacitors — GEM III

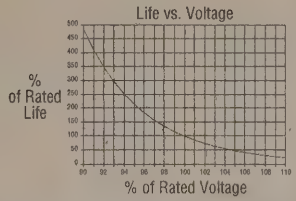


Round Case



Oval Case





Specifications. Available Capacitance Range: 5 to 60 µF. Capacitance Tolerance: ±3%. Leakage Current: 30 µA maximum. **Frequency:** 50/60 Hz. **Operating Temperature:** –40°C to +90°C. **Storage Temperature:** –40°C to +90°C. **Operating Life:** 60,000 hours with 90% survival. **Dissipation Factor:** 0.1% maximum.

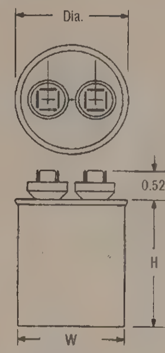
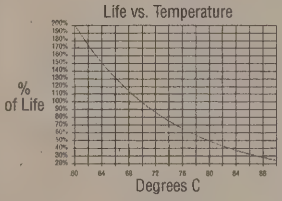
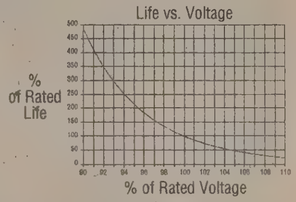
GEM Series







► Metallized Film Capacitor **► UL Recognized**

Specifications. Available Capacitance Range: 2 to 120 µF. **Frequency:** 50/60 Hz. **Operating Temperature:** –40°C to +70°C. **Storage Temperature:** –40°C to +90°C. **Operating Life:** 60,000 hours with 94% survival. **Dissipation Factor:** 0.1% maximum. Part numbers that begin with 97F8 are Industrial capacitors and part numbers that begin with 97F5 and 97F9 are Motor Run capacitors.

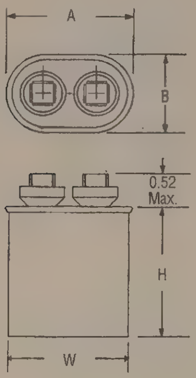
GEM Series



- ► Metallized Film Capacitor
- ► UL Recognized
- ► See Page 113 for Life Graphs

Specifications. Available Capacitance Range: 370 and 440 volts — 2 to 120 µF; 600 volts — 1.5 to 45 µF; 660 volts — 1.0 to 35 mF. **Frequency:** 50/60 Hz. **Operating Temperature:** –40°C to +70°C. **Storage Temperature:** –40°C to +90°C. **Operating Life:** 60,000 hours with 94% survival. **Dissipation Factor:** 0.1% maximum. Part numbers that begin with 97F8 or 27L6 are Industrial capacitors and part numbers that begin with 97F5 and 97F9 are Motor Run capacitors.

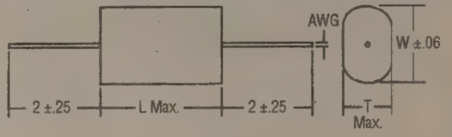
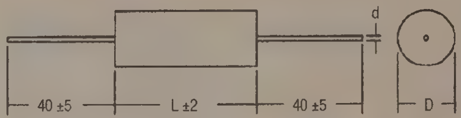
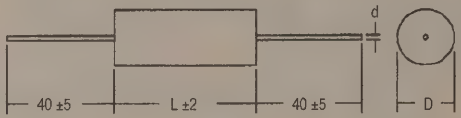
Snubber, High-Current DC and Switching Axial-Leaded Capacitors



40L Series

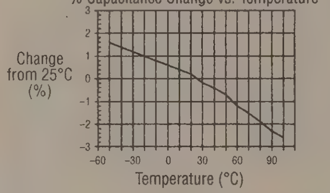


41L Series

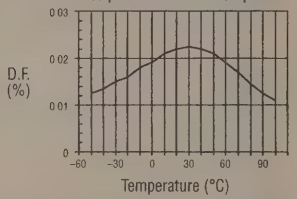


42L Series

% Capacitance Change vs. Temperature



% Dissipation Factor vs. Temperature



Specifications

40L Series. Available Capacitance Range: 0.47 to 6.8 µF. **Capacitance Tolerance:** ±10%. **Capacitance Variation with Temperature:** ±3% from –55°C to +105°C. **Operating Temperature:** –55°C to +105°C. **Storage Temperature:** –55°C to +105°C. **Dissipation Factor:** 0.1% maximum. **41L Series. Available Capacitance Range:** 0.68 to 3.0 µF. **Capacitance Tolerance:** ±5%. **Rated Voltage (VDC):** 250 V, 400 V, 600 V, 700 V. **Leads:** Tinned solid copper wire (medium lead content 5%). **Package Construction:** Polyester wrapping with epoxy resin end fill. **Flame Retardant:** Polyester coating as UL 510; epoxy resin as UL 94V1. **Operating Temperature:** –40°C to +70°C. **Storage Temperature:** –40°C to +85°C. **Dissipation Factor:** 5 × 10⁻⁴ at 1 KHz and 25°C. **42L Series. Available Capacitance Range:** 0.01 to 2.6 µF. **Capacitance Tolerance:** ±5%. **Rated Voltage (VDC):** 850 V, 1200 V, 2000 V, 3000 V. **Leads:** Tinned solid copper wire (medium lead content 5%). **Package Construction:** Polyester wrapping with epoxy resin end fill. **Flame Retardant:** Polyester coating as UL 510; epoxy resin as UL 94V1. **Operating Temperature:** –40°C to +70°C. **Storage Temperature:** –40°C to +85°C. **Dissipation Factor:** 5 × 10⁻⁴ at 1 KHz and 25°C.

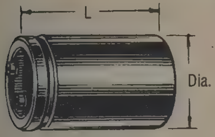
Computer Grade Capacitors



CGS Computer Grade Capacitors

High performance computer grade capacitor. Long life expectancy available in high or low post configurations. **Operating Temperature:** –40°C to + 85°C. Low ESR high ripple capabilities. **Voltage Range:** 10 WVDC 450 WVDC. **Tolerance:** –10% +75% up to 150 WVDC, –10% +50%, 200-450 WVDC.

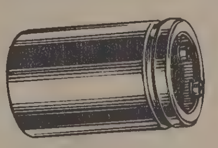
High Capacitance Computer Grade Capacitors



These computer grade capacitors have very high capacitance and high reliability. They are suitable for use in most AC drives and UPS applications. They have high ripple current. **Operating Temperature:** –40 to +85°C. **Tolerance:** –10% to +50%.

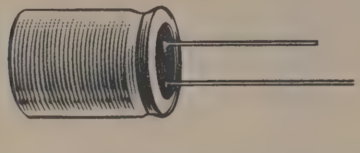
TH

Type SKR Miniature Aluminum Electrolytic Capacitors



The SKR series is a radial lead, high CV miniature aluminum electrolytic capacitor which is smaller in case size than other general use products. This series is suitable for those electronic products requiring small size. It is suitable for consumer electronic equipment, such as stereo radios, TV sets, etc. The aluminum case is enclosed in a vinyl sleeve. **Tolerance:** ±20%. **Operating Temperature Range:** –40 ~ +85°C.

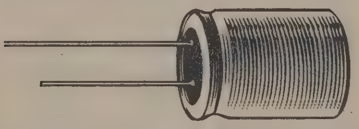
Type TKR Miniature High Temperature Electrolytic Capacitors



The TKR series is a radial lead, high temperature, general use miniature electrolytic capacitor. The TKR series is suitable for consumer electronic equipment, telecommunication equipment and general industry products requiring high temperatures. The aluminum case is enclosed in a vinyl sleeve. **Tolerance:** ±20%. **Operating Temperature Range:** –40 ~ +105°C.

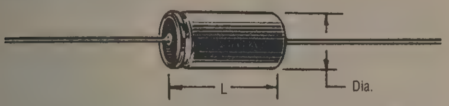
Axial Electrolytic Capacitors and Polyester Radial Leads

Aluminum Electrolytic Capacitors

Type SKA Axial Miniature



The SKA series is an axial lead, general purpose, miniature electronic capacitor. This series is suitable for those electronic products requiring small size. It is suitable for consumer electronic equipment, such as stereo radios, TV sets, etc. The aluminum case is enclosed in a vinyl sleeve. **Tolerance:** ±20%. **Operating Temperature Range:** –40 ~ +85°C.

TC Aluminum Electrolytic Capacitors

TG capacitors are single section metal tubulars with plastic insulating sleeve. Sizes are for bare unsleeved cans; add .015" to the diameter and .062" to the length to allow for plastic sleeve. TC capacitors have etched cathode construction and 2.25" min. tinned leads. **Specifications. Operating Temperature:** –40°C to +85°C. **Tolerance:** –10% to 75% up to 350 WVDC, –10% to +50% for 450 WVDC.

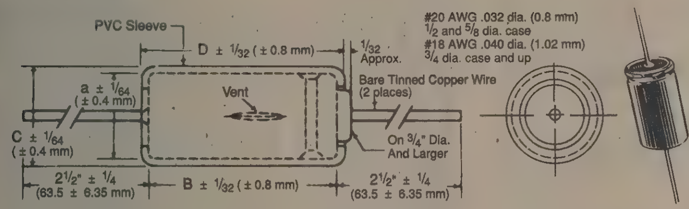
TCG Series



Long life, axial leads. The TCG is a small tubular axial version of the Mallory Type CG capacitor. The TCG features long life and low ESR and utilizes a PVC insulating sleeve as well as a safety vent on diameters .5 inches and larger. 7th digit of part number indicates tolerance. **Specifications. Capacitance Range:** 10 to 10,000 µF. **Voltage Range:** 10 to 450 WVDC. **Capacitance Tolerance:** T = –10%, +50%; U = –10%, +75%. **Operating Temperature:** –40°C to +85°C.

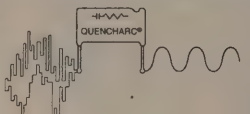
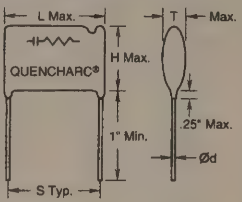
Q/QRL Series (QUENCHARC®) Metallized Polyester Arc Suppressor/Snubber Network

- ► **Noise and Arc Suppression**
- ► **RC Snubber Network**
- ► **Relay Contact Protection**
- ► **EMI/RFI Reduction**
- ► **Noise Reduction on Controllers/ Drivers**
- ► **Type QRL: UL/CSA Version**





"ARCING", "SPARKING", and "TRANSIENTS" often cause premature failures in relays, switches, thyristors, triacs, contactors, and related products. QUENCHARC® extends operating life when properly selected and applied. **General Specifications. Operating Temperature:** –55°C to +85°C at full rated voltage. **Voltage Range:** 200 VDC (125 VAC) to 600 VDC (250 VAC). **Capacitance Values:** 0.1, 0.5, 1.0 µF. **Resistor Values:** 22, 47, 100, 150, 200 ohms. **Tolerance at 100 KHz:** Capacitance — ±20%; Resistance: — ±10%. **Construction:** Metallized polyester in series with a carbon composition resistor. **Case:** Coated with a flame retardant epoxy. **Dielectric Withstand:** Units shall withstand a DC potential of 1.6 times the DC voltage rating. Testing conducted at +25°C. **Test Method and Performance. DC Life Test:** Units shall withstand a test potential of 125°C of the rated voltage for a period of 500 hours at 85°C. A failure shall consist of capacitance change >5% or a DF greater than original limits. **Long Term Stability:** The capacitance shall not change more than 2% when stored at ambient temperature and humidity for a period of two years or less.

Series 158X Metallized Polyester Suppressors

- ► **Capacitance: .01 µF to 1.0 µF (Other Cap Values Available On Special Order)**
- ► **Voltage: 250 VAC**
- ► **Temperature: –55°C to +125°C (With Voltage Derating Above +85°C)**
- ► **International Agency Approvals Including UL1414 and CSA**
- ► **Short Leads Available As Special Order Item. Add "S" to Part Number (Lead Configuration .138" Min.)**
- ► **10% Tolerance Available as Special Order Item by Adding "K" to Mfr.'s Type**

The Series 158X is a radial leaded metallized polyester, AC line suppression capacitor, housed in a flame-retardant pre-molded plastic case with epoxy resin fill. **Temperature Range:** –55°C to +125°C with voltage derating above 85°C. **Capacitor Range:** 0.1 µF to 1.0 µF. **Lead Configuration:** .591" min. length. Suggested applications are energy storage, filtering, pulse discharge, discrimination, and suppression.

Series 168 Metallized Polyester

- ► **Capacitance: .001 µF to 1.0 µF (Other Cap Values Available on Special Order)**
- ► **Voltage: 50 V, 63 V, and 100 V (250, 400 Voltages Available On Special Order)**
- ► **Temperature: –55°C to +125°C (With Voltage Derating Above +85°C)**

The Series 168 is a radial leaded metallized polyester self healing film capacitor. Non-inductively wound. Housed in a molded, flame-retardant case with epoxy fill. Temperature range is –55°C to 125°C with voltage derating above 85°C. Suggested applications are blocking, bypass, decoupling, smoothing, timing and tuning.

Monolithic Ceramic Capacitors

CK06

CK05

These Molded Case Monolithic Ceramic Capacitors are constructed to MIL-C-11015. **Tolerance:** ±10%. **Operating Temperature Range:** –55°C to +125°C. Capacitors are .09 ±.01" (2.29 ± .25 mm) thick; lead spacing is .2 ±.015" (5.08 ±.38 mm); lead length is 1.25" (31.75 mm) minimum. Made from ferroelectric, barium titanate material.

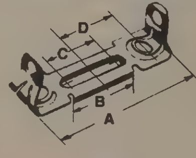
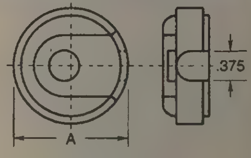
Mounting Accessories for PSU Series



Type HB



Type PL and PLA

Type HB Horizontal Mounting Bracket. HB brackets are used with PL or PLA end caps. The bracket is assembled to the motor or any suitable surface by two screws in line at any convenient position within the center-to-center dimension (C) shown in the chart. **Material:** .042 spring steel with black parkerized finish.

Stock No.	Mfr.'s Type	Dimensions (In.)				EACH

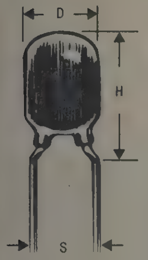
Tantalum and Radial Lead Electrolytic Capacitors

Epoxy Dipped Solid Tantalum Capacitors



Type TDC capacitors offer the long life electrical stability characteristics of solid tantalum at low cost. The tough epoxy coating provides uniform lead spacing and protection against mechanical damage and moisture. These capacitors are ideal for industrial and consumer applications where premium performance, minimum size, and low cost are essential. **Operating Temperature:** –55°C to +125°C (with voltage derating above 85°C). The TDC dip-coated solid tantalum capacitor has leads 0.187" maximum in length. A tolerance of ±20% is indicated by an "M" in the Mfr.'s type number; a tolerance of ±10% is indicated by a "K" in the Mfr.'s type number. **Leads Diameter:** .020" (.51 mm). **Leads Space S (Using Last 3 Letters in Mfr.'s Type):** NSE, NSF — .125" (3.17 mm); WSG — .250" (6.35 mm).

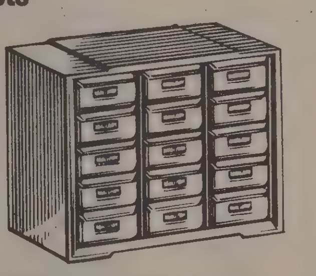
Capacitor Kits In Plastic Storage Cabinets



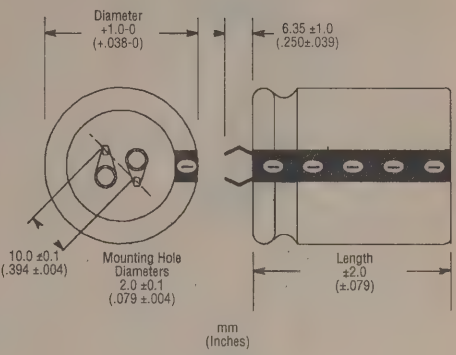
MONO151A Monolithic Capacitor Mallobin. A collection of Monolithic ceramic capacitors with voltages to 200 WVDC. Values from 10 pf to 1 µf.
852-2610. MONO151A .... **EACH 188.82**

TC151A. Assorted axial leaded aluminum electrolytic capacitors with voltages to 450 WVDC. Values from 20 µf to 200 µf.
852-2601. TC151A .... **EACH 66.15**

TDC151A. An assortment of epoxy dipped solid tantalum capacitors. Voltages to 50 WVDC. Values from .1 µf to 220 µf. **Tolerance:** ±10%.
852-2602. TDC151A .... **EACH 137.30**

TAC151A Solid Tantalum. An assortment of 78 axial leaded molded solid tantalum capacitors. Six each of 24 popular ratings from .1 µf to 47 µf. Voltages to 50 WVDC.
852-2620. TAC151A .... **EACH 180.00**

Radial Lead Snap-In Capacitors



This high capacitance general purpose aluminum electrolytic capacitor has radial snap-in leads. These are ideal for input filter in SMPS. PVC insulating sleeve. **Tolerance:** 20%. **Temperature Range:** –40 to +85°C.

Type LP Low Profile Snap-In

Aluminum electrolytic capacitors are designed for quick and easy snap-in insertion in PC board power supplies. Designed specifically for switching power supply applications. Can be utilized in other applications requiring high CV. Low ESR. High ripple capability. **Voltage:** 10 WVDC to 250 WVDC. **Tolerance:** ±20%. **Operating Temperature:** –40°C to +105°C. Lead spacing is 10 mm.

► **New Items Added — See RPE131 and RPE132**

These monolithic ceramic capacitors have industry standard sizes and an epoxy coating meeting UL94V-O. Leads are tinned copper clad steel wire. Additional values, voltages, temperature coefficients, tolerances and markings available, as well as additional lead spacing and tape and reel option available as custom order. Call for price and delivery.

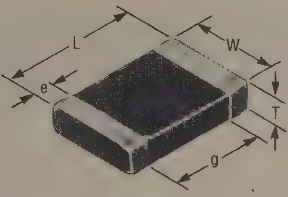
GRM Series Chip Capacitors



Non-polarized and miniature size chip capacitors have uniform dimensions and configuration. Flow and reflow solderable. Nickel barrier termination is highly resistant to metal migration. They have minimum series inductance.

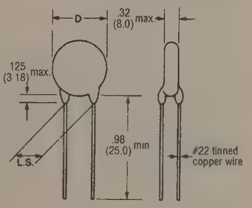
Safety Ceramic Disc Capacitors



Safety recognized ceramic disc capacitors are 125 VAC rated and have −25°C to +85°C temperature characteristics. Used for across the line or line by-pass applications. Available in ammo pack for automatic insertion as custom order. Call for price and delivery.

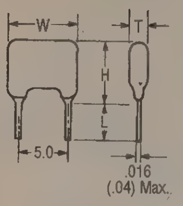
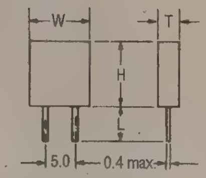
Piezo Electric Ceramic Resonators

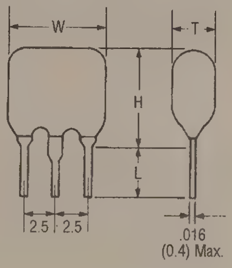
— NEW —



CSA Type



CSB Type



CST Type

Features of ceramic resonators include low cost, good stability, small size and rugged construction, and a wide frequency range. **Specifications. Frequency Range:** CSA Type — 1.26 to 32 MHz; CSB Type — 190 to 1250 KHz; CST Type — 1.80 to 25.99 MHz. **Frequency Tolerance:** ±0.5%. **Temperature Stability (−20°C to +80°C):** CSA Type — ±0.5%; CSB and CST Type — ±0.3%. **Time Stability (10 Years):** ±0.3%.

Kits

These kits are specifically designed to aid the design engineer in prototyping applications. Each kit contains a wide selection of commonly used values and sizes that meet a variety of circuit design requirements.

UVX Series Radial Capacitors

UVX miniature electrolytic capacitor for general purpose features reduced case size anti-solvent through 100 volts. The VX series is most suitable for electronic equipment where a smaller case size is required. The small case size makes it ideal for use with high speed automatic insertion equipment. Load life of 2000 hours at 85°C. Units with Ø 6.3 mm or more are provided with our unique safety case vent. **Capacitance Tolerance:** ±20% at 120 Hz. 20°C. **Operating Temperature Range:** –40° approximately +85°C.

TVX Series Axial Capacitors

TVX Compact Series miniature aluminum electrolytic capacitors provide higher component density in solid-state circuitry. Features further miniaturization of both body length and diameter for greater CV density when compared to conventional type aluminum electrolytic lines. **Capacitance:** ±20%. **Operating Temperature Range:** –40°C approximately +85°C.

UKL Series Radial Capacitors

UKL low leakage current electrolytic capacitor has anti-solvent feature and small size. The UKL series will exhibit only a slight increase in leakage current when subjected to no load at high temperature or shelved for long periods of time at normal temperature. Standard units have capacitance tolerance of ±20% at 120 Hz 20°C. The Nichicon safety vent is standard on capacitors with diameters ≥6.3 mm. **Operating Temperature Range:** –40°C to approximately +105°C. **Leakage Current:** After one minute of application at rated voltage, leakage current will be no more than 0.002 CV or 0.2 µA, whichever is greater. Other values, tolerances and voltages available as custom orders. Call for pricing and delivery. Manufacturer's literature available upon request.

Resistor Kits and Capacitor Kits

- ▶ Each Kit Contains the Top 30 Most Popular Resistors or Capacitors for Group Specified
- ▶ Cabinets Stack Together to Build a Component Storage Center
- ▶ One Piece Frame Is Lightweight and Virtually Unbreakable
- ▶ Keyhole Slots for Wall Mounting
- ▶ Frame Measures 9 1/8"W × 7 1/2"H × 6 1/2"D
- ▶ Contains 15 Drawers, Each Divided in Half

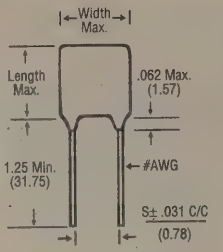
Series Capacitors

The CW-Series capacitors are designed to provide reliable temperature stable performance over an extremely wide temperature range in bypass, coupling and blocking operations. The CY- and CZ-Series capacitors are ideally suited for a wide range of non-critical general purpose bypass, coupling and filtering applications. **Note:** CN types have COG (NPO) temperature characteristic and are ideally suited for RC network, pulse and RF tuned circuit applications where extremely stable performance is required.



MONO-Kap® Ceramic Capacitors

UK Miniature Disc Capacitors

Philips Ultra-Kap capacitors provide many advantages when compared to ordinary ceramic capacitors. Their unique semiconductor design allows for the maximum in capacitance while retaining the miniature size required for today's low voltage applications. Dissipation factor at 1 kHz, 5-10%. **Tolerance:** ±20%. Tinned wire leads #22 AWG. **Weight:** 1 ounce.

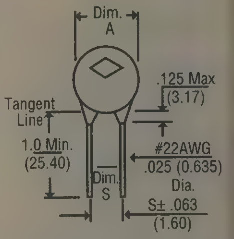
Capacitors



Philips General Purpose capacitors provide a wide choice of 1000 volt DC rated units for general purpose applications. These high dielectric ceramic discs offer small physical size, tighter tolerances and a rugged humidity resistant coating. Capacitors are primarily designed for non-critical coupling, bypass and filter applications found in all types of entertainment, industrial and medical equipment. **Capacitance Tolerance:** ±10%, (*) ±20% or (†) +100 –0% (GMV) or (‡) +80 –20% as listed. **Working Voltage:** 1000 volts DC except (‡) 500 DC. **Dielectric Strength:** 200% of rated working voltage. **Operating Temperature Range:** –55°C to +85°C. **Encapsulation:** Phenolic coated. Insulation **Resistance:** 10,000 megohms minimum. Tested at 500 volts DC maximum. Centralab diamond, capacitance value, capacitance tolerance or code letter (D = ±0.5 pf, K = ±10%, M = ±20%, P = +100 –0%) working voltage and EIA temperature characteristic code as space permits.

Low-Voltage Ceramics Disc Capacitors

Working Voltage: 50 VDC to 100 VDC. Tolerance of type CK is –20% to +80%. Tolerance of type DC is ±20%. **Dielectric Strength:** 250% of rated marking voltage. **Operating Temperature Range:** –55° to +80°C. All have Z5V characteristic +22% to –82% max. capacitance change from +25°C reading over temperature range of +10°C to +85°C. **Weight:** 2 oz.

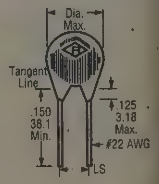
Series DD High-Voltage Disc Ceramics



Designed for non-critical coupling, by-pass and filter applications. **Operating Temperature Range:** –55° to +85°C. Tinned wire leads. **Encapsulation:** Phenolic coated. **Dielectric Strength:** 200% of rated working voltage. These high dielectric ceramic discs offer small size, tighter tolerances and a rugged humidity resistant coating. **Weight:** 2 oz.

- Molded Case Available In Four Case Codes (Also Available in Case Codes E and R As Special Order)
- Compatible with All Popular "High Volume" Automatic Pick and Place Equipment
- Optical Character Recognition Qualified
- Meets IEC Specification QC300801/US0001 and EIA 535BAAC
- 8 mm, 12 mm Tape Available Per EIA-481-1 and Reeling Per IEC 286-3; 13" (330 mm) Standard; 7" (178 mm) or Full Reels Available
- ±10% Tolerance

Performance/Electrical Characteristics. Operating Temperature: –55°C to +85°C (to +125°C with voltage derating.) **Capacitance Range:** 0.1 µF to 470 µF. **Capacitance Tolerance:** ±20%, ±10% standard. **Voltage Rating:** 4 WVDC to 50 WVDC. **Resistance to Solder Heat:** 260°C ±5°C for 30 ±.5 seconds. **Coefficient Thermal Expansion:** 75 × 10^6 inch/inch/°C. **Molded Body:** Semiconductor grade molding material. **Compliant Terminals:** 60/40 SnPb finish, standard. **Automatic Redundant Screening:** Capacitance, DF, DCL and ESR.

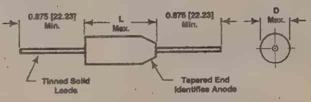
173D Series Tantalum Capacitors



Solid tantalum capacitors are designed for auto, industrial and consumer electronic equipment. Made of precision-molded thermosetting flame-retardant epoxy resin. Supplied lead taped. **Temperature Range:** –55° to +85°C. **Capacitance Tolerance:** ±10%. **Leakage Current:** Type suffix U, 0.5 µA; type suffix V, 0.7 to 1 µA; type suffix W, 1.4 to 2 µA; type suffix X, 2.4 to 5 µA. **Dissipation Factor:** (A + 25°C) 6 through 20 WVDC capacitors, 4 to 6%; 25 through 50 WVDC capacitors, 3 to 4%.

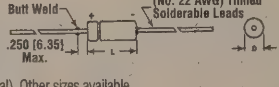
109D Series Sintered-Anode Tantalex® Tantalum Electrolytic Capacitors



109D series fills the basic requirements for applications in the industrial, automotive and telecommunications design field. Meet requirements of Military Specification, MIL-C 39006, Style CLR65 (E Seal). Other sizes available.

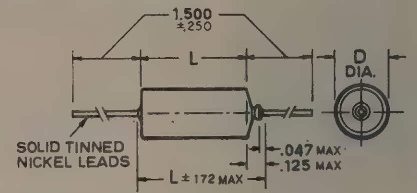
Type 150D Axial Solid Tantalum Capacitors



- Hermetically Sealed Metal Cases
- Recommended for Industrial, Military, and Commercial Applications
- Capacitors Listed Have Outer Plastic-Film Insulation
- Capacitors Listed Have Capacitance Tolerance of ±10%
- Operating Temperature Range: –80°C to +85°C; to +125°C with Voltage Derating

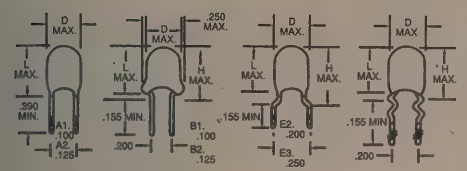
Type 199D Tantalex® Resin-Coated Solid-Tantalum Capacitors



Designed for use in entertainment and commercial equipment and many other minimum-cost applications. Priced competitively with any other capacitor of this type, domestic or offshore. Capacitors listed below are standard stock items; numbers ending with A1 have lead spacing of .100". Other lead styles available on special order. Drawing above shows those styles available. **Tolerance:** ±20% and ±10%; for ±5% tolerance, change 9th character in Mfr.'s Type from 0 to 5; prices available on request. **Operating Temperature Range:** –55°C to +85°C.

Type PS Orange Drop Dipped Tubular Capacitors

- **Double Dipped In Bright Orange Epoxy Resin — Beats Heat and Humidity**
- **Crimped Wire Leads for Correct Spacing When Mounted on Printed Wiring Boards**
- **Dual Dielectric (Polyester Film-Paper) Solidly Impregnated with Exclusive HCX — Produces Rock-Hard Capacitor Section**
- **Other Values and Voltages Available Upon Request**

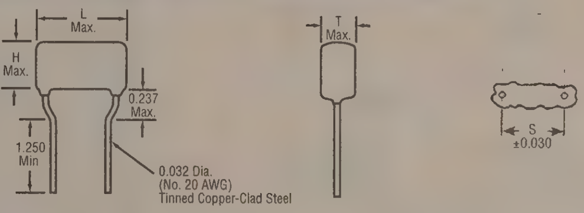
Type 225P Orange Drop® Polyester Capacitors



Type 225 capacitors are designed for PC boards and are furnished with radial leads to facilitate insertions. Used in TV sets, radios, instruments and commercial electronic equipment. Sections are wound from polyester film and thin gauge foil. Wax-free conformal epoxy coating protects against moisture. For operation up to 85°C. **Tolerance:** ±10%.

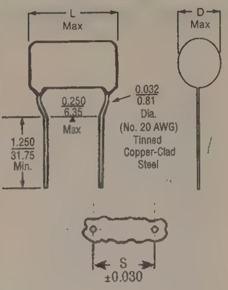
Type 715P Orange Drop Polypropylene Dipped Tubulars



- **Conformly Coated With Flame-Retardant Epoxy Which Provides Protection From Humidity and Mechanical Damage**
- **Furnished With 1.250" Long "Hockeystick" Crimped Leads**

Operating Temperature Range: –55° to +85°C; to +105°C with 50% voltage derating. **Capacitance Tolerance:** ±5%. **Dielectric Strength:** Unit rated up to 800 volts shall withstand a d-c potential of 250% of rated voltage for not more than 5 seconds. Units rated above 800 volts — 200%.

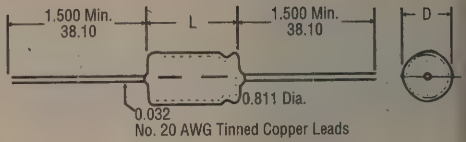
Type TE LITTL-LYTIC Axial Electrolytic Capacitors



- **Proven Dependable Performance in Industrial and Electronic Equipment With Either Transistor or Modified Electron-Tube Circuits**
- **All Terminal Connections Welded, Eliminating Possibility of "Open" or Intermittent Contacts Occasionally Found in Pressure Joints of Conventional Capacitors**
- **Superior in Size, Performance Characteristics, Shelf Life, Construction, Reliability**
- **Metal-Encased, With Plastic Outer Insulating Sleeve**
- **Excellent Circuit Performance When Used as Coupling Capacitors**
- **Minimum Drain and Long Battery Life When Used in Battery Bypass Applications**
- **Better Performance Under Life Test Than Most Miniature Aluminum Electrolytic Capacitors**

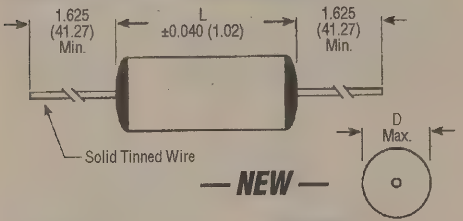
Type 632P Film Capacitors



— NEW —

- **Metalized Polycarbonate, Wrap-and-Fill**
- **Superior Performance**
- **High Efficiency**
- **High Stability**
- **High Reliability**
- **Rugged Construction**
- **Small Size**

Operating Temperature: –55°C to +125°C. **Capacitance Range:** 0.001 µF to 10.0 µF. **Capacitance Tolerance:** ±10%, ±5%. **DC Voltage Rating:** 50 WVDC to 400 WVDC. **Dissipation Factor:** 0.25% maximum.

Temperature Stable

Use where minimum capacitance change with temperature is an important consideration. Rated 1000 WVDC.

Hypercon® Ceramic Discs

Ultraminiature discs for transistorized circuitry, bypass and coupling. Especially suited for any low voltage use where high capacitance and low power factors are important.

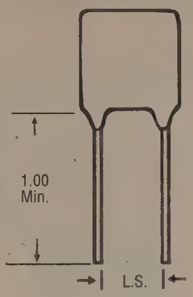
Monolythic Ceramic Capacitors

Conformal-coated radial lead capacitors. Capacitors listed are 500 WVDC to 100 WVDC. **Size:** .200" W × .250" H × .125" T. Lead length is 1.0" min. Additional values, voltages, tolerances, temperature characteristics, lead styles and sizes available as special order. Call for price and delivery. Manufacturer's literature available upon request.



Temperature — COG

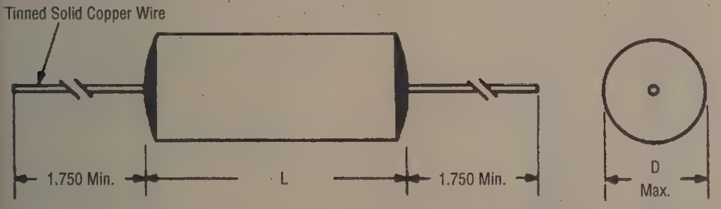
Metallized Polyester Film Capacitors



Economical capacitors with extensive ratings and rugged construction in a small size. Solid tinned wire leads are 1.75" long min. 10% tolerance. -55°C to +85°C operating temperature.

Type TVA ATOM Axial Tubular Electrolytic Capacitors

Polarized Single Units

Smallest standard tubular capacitors available. High dependability with lower leakage currents and long shelf life. Withstands high temperatures, ripple currents, and surge voltages. Capacitors rated at 100 WVDC or less operate at –40° to +85°C; above 100 WVDC, –20° to +85°C. Metal case with thermoplastic outer insulating sleeve. **Note:** Sizes subject to change without notice.

Type 39D Powerlytic Axial Electrolytic Capacitors

The 39D series is recommended for replacement applications and is designed for applications requiring large capacitance in small physical case size. Welds at all critical anode and cathode terminals eliminate riveted or pressure connections to assure freedom from open circuits even when operated in the microvolt or millivolt signal range. Improved molded phenolic end seals with pressure-sensitive safety vent. Service life of 10 years of more in normal circuit applications. Capacitors have outer plastic-film insulation. –20°C to +85°C operating temperature. **Capacitance Tolerance:** 10-75 WVDC — –10%, +75%; 250 WVDC — –10%, 50%. Other voltages, capacitance values, and specs available as custom order. Call for price and delivery. Manufacturer literature available upon request.

515D Series Radial Capacitors

These miniature radial lead aluminum capacitors feature high CV per case size, low cost, solvent resistant construction, and low profile ratings. **Capacitance Tolerance:** ±20%. **Operating Temperature:** –40°C to +85°C. Supplied with uncut leads. Additional values, voltages, packaging and lead configuration available as special orders. Also available in both tape and reel packaging and tape and ammo box packaging as special order. Call for price and delivery.

516D Series Axial Capacitors

These miniature axial lead aluminum capacitors feature high CV per case size, low cost, and solvent resistant construction. **Capacitance Tolerance:** ±20%. **Operating Temperature:** –40°C to +85°C. Additional values, voltages, packaging and lead configuration available as special orders. Call for price and delivery.

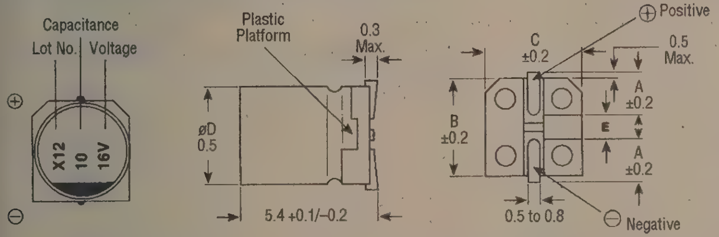
518D Series Aluminum Capacitors

— NEW —



- **Chip Type with 5.5 (.217") Height**
- **Designed for Surface Mounting on High Density PC Board**
- **Applicable to Automatic Insertion Machine Using Carrier Tape**
- **Load Life of 2000 Hours at +85°C**

Specifications. Operating Temperature: –40°C to +85°C. **Capacitance Range:** 1 µF to 100 µF. **Capacitance Tolerance:** ±20% @ 120 Hz, +20°C. **Voltage Rating:** 6.3 WVDC to 50 WVDC.

600D Series High Reliability Axial Capacitors

These high reliability miniature axial lead aluminum capacitors feature a wide temperature range, a unique Teflon end seal for long life, high vibration capability, a life test of 2000 hours @ +125°C and have an polyester insulating outer sleeve. They are a foil tantalum replacement. **Capacitance Tolerance (8th character):** F — –10% to +50%; G — –10% to +75%. Additional values, voltages, tolerances, and Military version (MIL-C-39018/01) as special order. Call for price and delivery.

672D Series Radial Capacitors

The 672D series is a miniature aluminum capacitor with radial leads. They feature minimal ESR change, high ripple current capability and are original SMPS output capacitors. **Capacitance Tolerance:** –10% to +100%. **Operating Temperature Range:** –40°C to +105°C. Supplied with polyester insulating sleeve with resin end seal and cut leads. Negative lead is 0.281" long and the positive lead is 0.375" long. Additional values and voltages are available as special orders. Call for price and delivery.

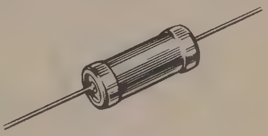
192P Pacer Filmite "E" Axial Capacitors



Extended foil film sections are terminated in end caps with wire leads, to assure the best possible non-inductive section. Protected by heat shrinkable plastic sleeve or epoxy coating. Designed for operation to 85°C. **Tolerance:** ±10%

Snap Lock Aluminum Capacitors

Ideally suited for use in input and output filters, power supplies, computer equipment and other industrial or commercial applications. The 80D series is a two pin snap-in/lock-in capacitor. The snap-lock terminals securely snap into and hold onto a PC board for soldering and physical stability. It has high ripple capability. Capacitors have PVC insulating sleeve with resin end seal to withstand halogenated cleaning solvents.* Leads are tinned copper-clad steel. The capacitance tolerance is –10% to +30%. The operating temperature is –40°C to +85°C. Other capacitance values, voltages, and sizes available as custom order. Call for price and delivery.

*Not available on 22 mm dia. size.

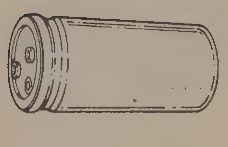
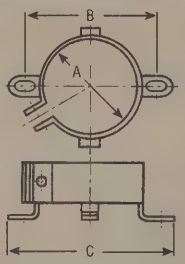
36D Series Powerlytic Electrolytic Capacitors





Excellent for use in power supply filters, computer related equipment, and other industrial or commercial applications. They have high capacitance per case size, high ripple current, low leakage current, long shelf life and operating life. Low screw insert terminals. **Operating Temperature:** 36D and 36DX — –40°C to +85°C; 36DE — –40°C to +95°C. **Capacitance Tolerance:** 10-100 VDC — –10% to +75%; 200-450 VDC — –10% to +50%. Other capacitance values, voltages, and sizes available as custom order. Call for price and delivery.

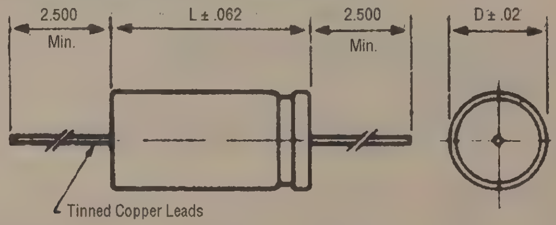
Type 53D Tubular Axial Electrolytic Capacitors



This general purpose capacitor has rugged construction and large CV ratings in an axial leaded capacitor. Replacement for the 39D series. Recommended for new designs. Service life of 10 years or more in normal circuit applications. Capacitors have outer PVC film insulation. –40°C to +85°C operating temperature. –10% to +50% capacitance tolerance. Other voltages, capacitance values, and specs available as custom order. Call for price and delivery. Manufacturer literature available upon request.

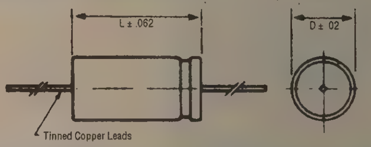
Type 500D General Purpose Miniature Aluminum Capacitors



General purpose miniature axial leaded electrolytic capacitors. Increased CV efficiency. **Operating Temperature:** Up to 250 VDC — –40°C to +85°C; Over 250 VDC — –20°C to +85°C. 20% capacitance tolerance. Other voltages, capacitance values, and specs available as custom order. Call for price and delivery. Manufacturer literature available upon request.

A COMPANY OF VISHAY DALE

Molded Inductors

Flame-retardant coating, precision performance, excellent reliability and sturdy construction. Epoxy molded construction provides superior moisture protection. Wide inductance range in a small package. IMS-5 offers electromagnetic shielding.

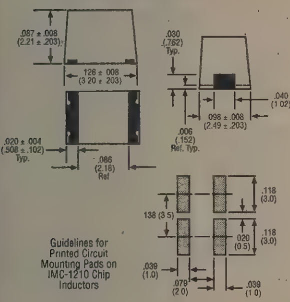
Molded Surface Mount Inductors

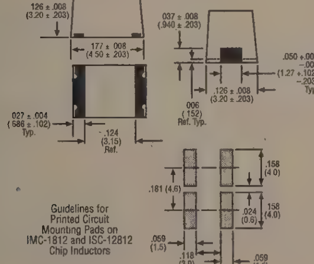
Molded construction provides superior strength and moisture resistance. Printed marking. Compatible with vapor phase and infra-red reflow soldering.

IMC-1210/ISC-1210



Guidelines for Printed Circuit Mounting Pads on IMC-1210 Chip Inductors

IMC-1812/ISC-1812



Guidelines for Printed Circuit Mounting Pads on IMC-1812 and ISC-12812 Chip Inductors

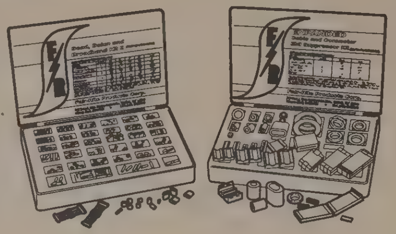
EMI Suppression Evaluation Kits



Engineering Evaluation Kits
In order to assist the design engineer concerned with EMI suppression, Fair-rite was the first ferrite manufacturer to offer engineering evaluations kits. These kits are designed to reflect the different mechanical and frequency requirements of all types of suppression applications. Each kit contains a sampling of suppression cores for use in the original design phase or in situations where a retrofit proves necessary. All are in clear plastic cases with blue foam packing.

Bead, Balun and Broadband Kit II
This kit is the latest version of the first engineering kit introduced in 1978. It has an assortment of 34 parts, consisting of small shield beads, bead on leads and multi-aperture cores. To obtain optimum performance over a broad frequency spectrum, samples are supplied in four Fair-Rite materials.
589-0001. 0199000011..........**EACH 80.00**

Expanded Cable and Connector EMI Suppressor Kit
This is our most popular engineering kit. As the name implies, this kit provides a broad sampling of suppression cores in 43 and 44 material, specifically designed to attenuate EMI between all types of cable connected systems. To assemble the split cable suppression cores, nylon cases and steel clips are included in this kit.
589-0002. 0199000005..........**EACH 80.00**

Expanded Bead-On-Lead EMI Suppressor Kit
Twenty-four wired beads in three basic design geometries are included in the evaluation kit. These beads are supplied in three suppressor materials — 73, 43, and 61.
589-0003. 0199000010..........**EACH 80.00**

Fair-Rite EMI Suppressor Retro Kit
This evaluation kit contains two sets each of ten different split cable suppression cores in 43 material, installed in their appropriate nylon cases. This evaluation kit will prove particularly useful in new and existing designs, that use flat or round connecting cables, where EMI attenuation is required.
589-0004. 0199000008..........**EACH 80.00**

Fair-Rite Surface Mount Bead Kit
This engineering kit of surface mount suppression cores, contains an assortment of ten SM Beads and two Common-Mode SM Beads in appropriate materials to provide maximum attenuation over a wide frequency range.
589-0005. 0199000014..........**EACH 50.00**

Surface Mount EMI Shield Bead

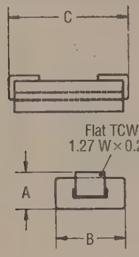


Fig. 1

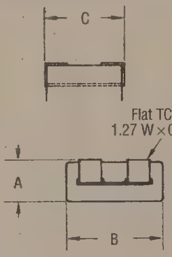

Fig. 2

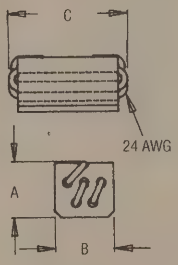

Fig. 3

These surface mountable ferrite beads in type 43 and 44 material are constructed with a solid flat copper conductor having a 30-60 μ inch nickel barrier and a minimum 95/5 tin/lead coating thickness of 200 μ inch. They offer a high current carrying capacity with low dc resistance compared with plated beads. Impedance values listed below are controlled to ±20% @ 100 MHz.

Stock No.	Mfr.'s Type	Fig.	Imp. (Ω) ±20% @ 100 MHz	Dimensions (In.)			PER PKG./100

Wound EMI Shield Beads

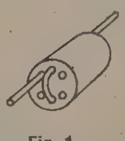

Fig. 1

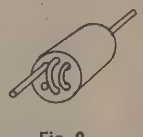

Fig. 2

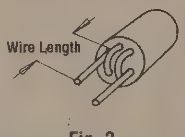

Fig. 3

These 6 hole ferrite beads wound with various configurations offer very high impedance in a small package. Supplied in type 43 material wound with #24 AWG tinned copper wire (95/5 tin/lead coating) maximum suppression is obtained between 25 and 250 MHz. **Wire Length:** 1.500" (38 mm) nominal.

EMI Suppression Cores with Cases

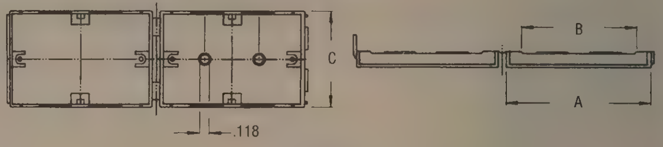

Fig. 1

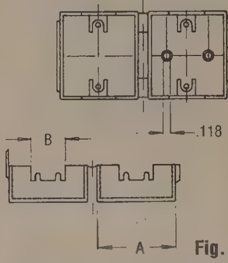

Fig. 2

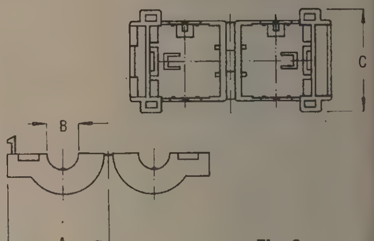

Fig. 3

These ferrite suppressors, designed to accommodate various size cables, are available for both flat ribbon cable and round bundled cables. The cases are designed to grip and center the ferrite suppressors on the cable. Ferrites are supplied in type 43 material (2 per unit) and the cases in nylon 6/6. Flammability rating by UL 94-V2. Impedance values listed below are controlled to ±20% @ 100 MHz.

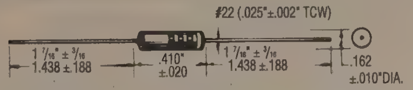
Subminiature Shielded RF Inductors



Epoxy molded and shielded for minimum coupling in high-density package. Meet electrical and environmental requirements of MIL-C-15305C, Grade 1 (resistance to moisture and immersion). Class B (–55° to +125°). For altitudes to 70,000 feet. **Tolerance:** ±10%. Less than 3% coupling. Low DC resistance. **Dielectric Strength:** 700 V RMS. **Size:** 0.162 ±.010 dia. × 0.410" ±.020 long. AWG #22 leads. **Weight Per 100:** 3½ oz.

RF Chokes With Axial Leads

These chokes cover an inductance range form 1 microhenry to 50 millihenries. Either single layer or 3-pi universal winding is used to insure low distributed capacity. Chokes are wounded on low-loss molded phenolic or powdered iron core forms and are impregnated with a moisture and fungus-resistant varnish. Leads are 1½" (38.1mm) long.

Single Layer Windings

Phenolic Core: 3/16" (4.76 mm) diameter × 3/4" (19.05 mm) long. **Tolerance:** ±10% –20%.

5500/5600 Series

High saturation flux density ferrite rods (5500) and ferrite bobbin (5600). Chokes are ideal for all EMI/RFI filtering applications. They are also suitable for energy storage inductors in switching power supplies. Covered with shrink tubing and varnish impregnated. Printed Circuit mounting.

BLM _ _A Series

- **Suitable for Flow and Reflow Soldering**
- **Wide Temperature Range**
- **High Z Characteristics**
- **For I/O Ports, DC Power Lines, and Signal Lines**

The BLM _ _ A Series ferrite beads provide outstanding electrical characteristics in packages as small as 0603. For noise applications covering a wide frequency range.

BLM _ _ B Series

- **Designed to Reduce Noise Above Operating Temperature**
- **High Impedance Characteristics**
- **Suitable for Flow and Reflow Soldering**
- **For Computers and Peripheral Equipment**
- **For Consumer Products**
- **For High Speed Circuits**
- **Suitable for Circuits with Unstable Ground**

The BLM _ _ B Series ferrite beads have developed to pass signal frequencies from 10 MHz to 100 MHz while exhibiting high impedance characteristics to reduce EMI noise above these specific frequencies.

BLM _ _ P Series

- **Suitable High Frequency Noise Suppression Over Wide Frequency Range**
- **Current Rating Up to 6 Amps**
- **Small Package Size — EIA STD 0603/0805/1206 and 1806**
- **Nickel Barrier Terminations Provide Excellent Solder Heat Resistance**
- **Low DCR**
- **For High Current DC Power Lines**
- **For Circuits Where a Stable Ground Is Unavailable**

The BLM _ _ B Series ferrite beads offer high frequency noise suppression with the capability of handling large currents for DC power line applications.

Bead Inductors

Ferrite beads are used for noise suppression in car radios, digital control equipment and for the prevention of spurious oscillation in radio frequency amplifiers. Ferrite bead inductors are devices which can effectively be used on printed circuit boards where high component density is essential. Applications include micro computer, switching regulators, digital control equipment, car radio, car stereos, etc. Tape and reel in axial and radial versions available as well as ammo pack as custom order. Call for price and delivery.

High Frequency Chip Inductors

These chip inductors consist of air-core chip inductors using subminiature alumina core as a bobbin. The self-resonant frequency characteristics yield the high Q and highly stable inductance at high frequencies that make these inductors ideal for use in the high frequency circuits of video and communications equipment. The outstanding solder heat resistance means both flow and reflow soldering methods can be used.

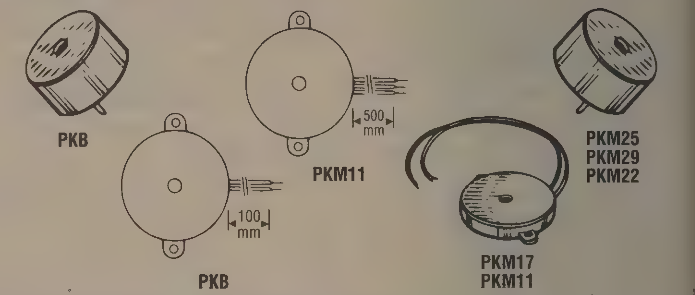
Piezo-Alarms



PC Mountable Piezo-Alarms with Internal Circuitry

These PC mountable piezo-alarms are completely self-contained requiring only a DC voltage source for operation. Providing the use with high audio outputs while requiring very low input power, they can be operated over a broad range of input voltages. Their small size, high reliability and low cost make them ideal for data processing equipment, electronic instrumentation, medical equipment, automatic control devices and cash registers.

Stock No.	Mfr.'s Type	Sound Level dB	Freq. (Hz)	Current (mA)	Oper. Volt (p-p)	EACH 1-99	EACH 100-249

Internal Drive Piezo-Alarms

These piezo-alarms are completely self-contained requiring only a DC voltage source for operation. Providing the user with surprisingly high audio outputs while requiring very low input power, they can be operated over a broad range of input voltages. -20°C to +60°C. Case material is Noryl and is rated UL-V1. Producing an extremely clear and penetrating sound which is audible through surrounding noises, the audio output reaches long distances. These units have compact size, light weight, no electrical noise, very low power consumption and operate over a broad voltage range. Wide application ranges including fire alarms, burglar alarms, gas detectors, automotive alarms, toys, games, machines, electrical appliances, automatic control devices, conveyors and medical equipment. 24 AWG leads.

Self-Drive Piezo-Alarms

As the use of microprocessors in consumer products has become increasingly popular, so too has the use of piezo-alarms as the accepted means of audio alarm generation. Their ability to be driven be ICs, small size, low cost and high reliability, make them ideal for such applications. These units are equipped with a feedback tab for use with self-oscillating circuit designs. By utilizing the feedback, the part's individual resonant frequency is found to optimize sound pressure level. All mechanical and electrical components are designed to be compatible with most standard PC board assembly and wave soldering techniques. These units feature a unit with low cost and high sound pressure level in a small size with low input voltage and low current consumption. Some of the many applications are clocks, office equipment, machine tools, toys, games, automatic controlling devices, instrumentation, calculators, home appliances and smoke alarms. **Operating Temperature:** –30°C to +70°C. **Operating Voltage:** 3 to 20 V.

*Also available as washable parts with tape covering the sound emitting hole and epoxy seal at the case bottom as custom order. Call for price and delivery.

External Drive Piezo-Alarms

These piezo-alarms have no "feedback" tab and is particularly suited for the generation of both single tones and the unusual sound effects that are possible with specifically designed driving circuits. These sounds include musical melodies, insect sounds, etc. All mechanical and electrical components are designed to be compatible with most standard PC board assembly and wave soldering techniques. Rugged construction, low cost and high reliability with variable tone outputs along with no EMI output make this unit extremely useful for musical toys, home appliances, communications equipment, computer peripherals and office equipment and instrumentation. This external drive unit has no internal circuitry.

B Series Filters

1 to 20 Amps; 115/250 Volts AC; 50-60 Hz

B Series RFI power line filters are general purpose low cost filters which provide effective line-to-ground RFI filtering in most applications. **Maximum Leakage Current (Line-To-Ground):** .5 mA at 115 VAC 60 Hz, 1.0 mA at 250 VAC 50 Hz. **Hipot Rating (1 Minute):** Line-to-ground — 2250 VDC; Line-to-line — 1450 VDC. **Operating Frequency:** 50-60 Hz. **Rated Voltage:** 115/250 VAC. Low leakage models and higher maximum line amp units available as custom order.

K Series Filters

1 to 20 Amps; 115/250 Volts AC, 50-60 Hz

K Series RFI filters are general purpose filters which provide line-to-line filtering in addition to normal line-to-ground attenuation of RFI. Particularly suited where pulsed, continuous and/or intermittent RF interference is present in your application. **Maximum Leakage Current (Line-To-Ground):** .5 mA at 115 VAC 60 Hz, 1.0 mA at 250 VAC 50 Hz. **Hipot Rating (1 Minute):** Line-to-ground — 2250 VDC; Line-to-line — 1450 VDC. **Operating Frequency:** 50-60 Hz. Low leakage models and higher maximum line amp units available as custom order.

R Series Filters

1 to 10 Amps; 115/250 Volts AC, 50-60 Hz

The dual-T filter design of the R Series makes these filters effective with low impedance motor loads. The 1- and 3-amp versions have an insertion loss as low as 54 dB at 150 kHz. These dual-section filters provide positive RFI control of line-to-line as well as line-to-ground noise. Small in size, designed for computer peripheral and a wide variety of other critical applications. **Maximum Leakage Current (Line-To-Ground):** .5 mA at 115 VAC 60 Hz, 1.0 mA at 250 VAC 50 Hz. **Hipot Rating (1 Minute):** Line-to-ground — 2250 VDC; Line-to-line — 1450 VDC. Low leakage models and higher maximum line amp units available as custom order.

H Series Filters

†

3 to 10 Amps; 115/250 Volts AC, 50-60 Hz

All H Series filters are for use in both patient care equipment and nonpatient equipment and meet UL 544 requirements. In addition, the 10EH4C incorporates a separate ground circuit inductor to isolate the equipment chassis from power line ground at RF frequencies. **Maximum Leakage Current (Line-To-Ground):** .2 µA at 120 VAC, 60 Hz; 5 µA at 250 VAC, 50 Hz. **Hipot Rating (1 Minute):** Line-to-ground — 1500 VAC; Line-to-line — 1450 VDC. **Operating Frequency:** 50/60 Hz. **Rated Voltage:** 120/250 VAC.

†All SEV Approved except 10EH Series.

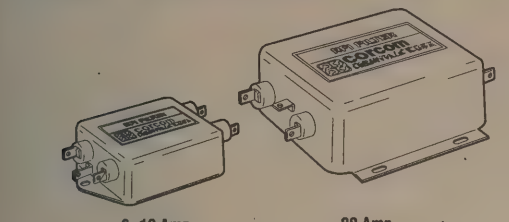
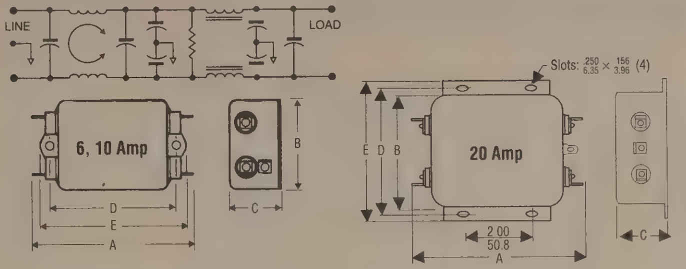
W Series

1 to 10 Amps; 115/250 Volts, 50-60 Hz





Typical Dimensions. Fastons: .250/6.35 (4) Holes: .07/1.8 Dia. Mounting Holes: .188/4.78 Dia. (2) Solder Tabs: .07 × .16/1.8 × 4.1

The W series filters will protect equipment from malfunctions due to conducted interference coming into the equipment from the line, especially line-to-line noise and transients. In addition, the W series filters combine line-to-ground interference rejection filters with additional circuitry designed to reduce line-to-line transients. They are also effective to control emissions in equipment using SCR and T2L circuits, for compliance with FCC Part 15, Subpart J, and VDE 0871, Level A, down 150 KHz. The W series provides an N=4 line-to-ground impedance for common mode and an N=5 impedance for line-to-line differential mode interference. They are designed for use when equipment impedance at RF frequencies is high. The two-stage construction provides excellent suppression at high frequency. The W series filters are particularly effective when applied in equipment using switching power supplies.

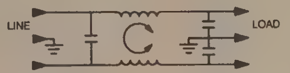
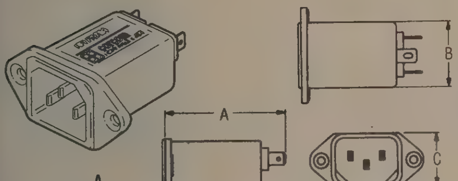
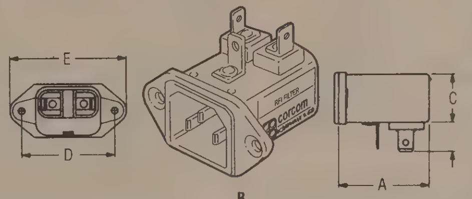
EEA Series Filters

1 to 10 Amps; 115/250 Volts, 50-60 Hz
Note: Specify line cord #GA400 below to mate with IEC connector.

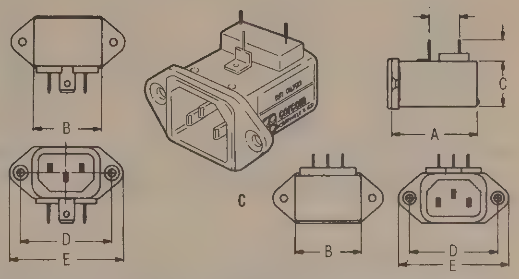




A



B



C

The EEA Series are a new generation of compact RFI filters with IEC socket. Totally new in design in both the internal structure and manufacturing process make this new series cost effective and compact. The EEA series supercedes the EF series by providing superior performance, particularly in the common mode at low frequencies. Mechanically, its slimmer size makes it compatible with all similar filters in the market. Quarter inch fastons in line in the EEA1 offer versatility when behind the panel room exists. The EEA2 with the quarter inch fastons at a right angle to the IEC connector allow for a shorter tip-to-tip length. The P style models are PC board mountable offering compact size and direct to board connection. Models with 4-inch wire leads available as custom order parts. **Maximum Leakage Current (Line-to-Ground):** 0.25 mA at 120 VAC 60 Hz; 0.42 mA at 250 VAC 50 Hz. **Hipot Rating (1 Minute):** Line-to-ground — 2250 VDC; Line-to-line — 1450 VDC. Uses line cord GA400 below.

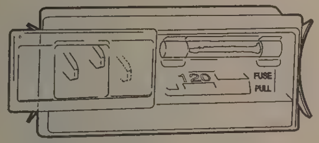
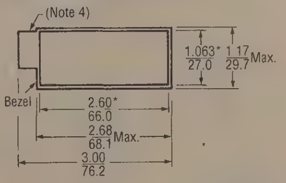
J Series — Voltage Selecting and Fused Connector

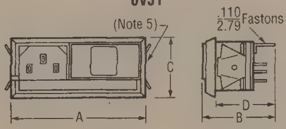
6 Amps; 100-240 Volts AC, 50-60 Hz
Note: Specify line cord GA400 above to mate with IEC connector.



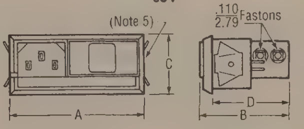
Mounting Diagram
Recommended Panel Cutout

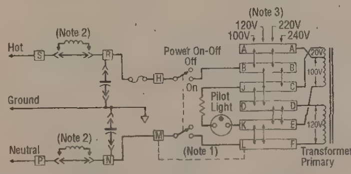


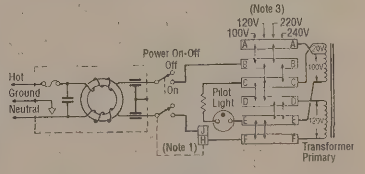
6VJ1



6J4







Note 1. Jumper required if only SPST Power Switch is used Note 2 Jumpers required if no input filtering is used. Note 3: Use only 120V and 240V positions for 2-volt selection units
Note 4: Fuse cover door shown in open position. Note 5: Standard units mount in panel thickness of .060-.090".

J Series Voltage Selecting and Fused Connector is designed for the equipment manufacturer who markets a product worldwide. While incorporating a fuse holder and a standard IEC power line connector, the J Series also features a unique voltage selector card which enables an easy means to change transformer primary connections. Integral fuse holder, line side, accepts .25" × 1.25" fuse. Meets UL/IEC requirements per CEE publication 22 Type VI. Connector back terminals suitable for soldering, wire wrapping or crimp-on lugs such as MOLEX #2123. **Maximum Leakage Current (Line-to-Ground):** at 250 VAC 50 Hz, 5 microamps (6VJ1); 0.5 mA (6J4). **Hipot Rating (1 Minute):** Line-to-ground — 2000 VAC (6VJ1) and 2250 VDC (6J4); Line-to-line — 2150 VDC (6VJ1) and 1450 VDC (6J4). Construction meets IEC 161 category 10/70/21. The J1 version is unfiltered while the J4 model houses a built-in filter.

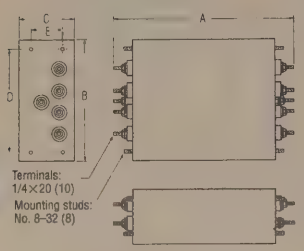
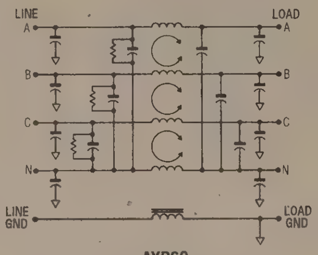
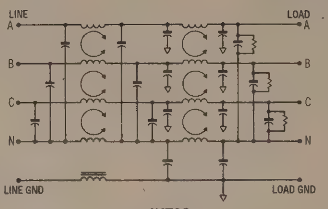
A Series 3-Phase RFI Power Line Filters





AYP6C



AYT6C

- ▶ Effective For Both Balanced and Unbalanced Three Phase Loads
- ▶ Ground Choke Included
- ▶ Made to IEC 380 Specifications
- ▶ Shielded Construction
- ▶ Both Common Mode and Differential Mode Suppression From 50 kHz to 30 MHz

The A series 3-phase filters are designed for 3-phase, four wire, WYE applications providing filtering in each of the three lines plus the neutral and ground line. These standard, high performance RFI power line filters may be used on a 3-phase DELTA system. The dual stage AYT provides higher performance while the single stage AYP is good for lower noise environments. The mounting brackets and the end bell kits are sold separately. The end bell mounting kit is available in two sizes. Maximum leakage current, each line-to-ground at 120 VAC/60 Hz is 1.4 mA and at 250 VAC/60 Hz is 3.4 mA. Phase-to-phase rated voltage is 440 VAC. Phase to neutral/ground is 250 VAC.

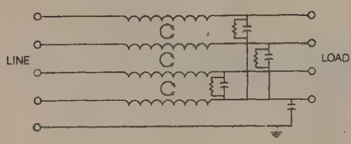
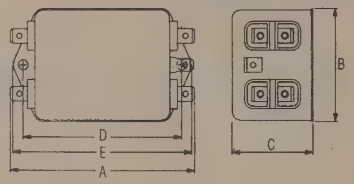
AYO Low Current 3-Phase RFI Filters





The AYO series RFI filters are designed for 3-phase, four wire, WYE applications providing filtering in each of the three lines plus neutral. These lower current RFI filters provide filtering to industrial 3-phase applications. The maximum leakage current in each line to ground 120 VAC/60 Hz is 2.0 mA on the 3, 6, and 10 amp models and 3.5 mA on the 20 amp model. For 250 VAC/60 Hz, it is 3.0 mA on the 3, 6, and 10 amp models and 5.5 mA on the 20 amp model. The rated voltage phase-to-phase is 440 VAC and phase-to-neutral is 250 VAC.

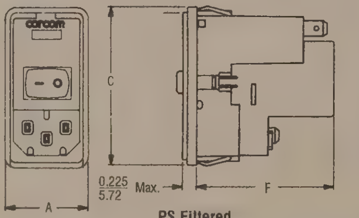
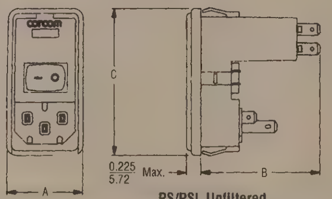
P Series Adaptable Power Entry Modules

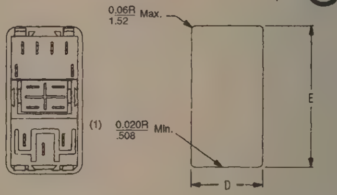
- ▶ IEC Power Line Connector
- ▶ Both North American and European Fusing Capabilities
- ▶ Optional DPST On/Off Switch
- ▶ Snap In or Mounting Ears

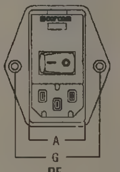


PS Filtered



PS/PSL Unfiltered





PE

The P series power entry module offers full flexibility of design in the most compact package. The Chameleon has two filter options (7th character in part number). The S models offer protection for general purpose applications where line-to-ground and line-to-line noise must be controlled and are designed to meet low leakage requirements of SEV and VDE portable equipment. The H models offer susceptibility protection without leakage current associated with the line-to-ground capacitors and are designed to allow equipment to meet UL544 for patient care and non-patient care equipment. These power entry modules provides a dual voltage selector which is integrated with the fuse holder. P series product with an "S" in the fifth digit are specifically designed for jumper type applications associated with switching mode power supplies. P series product with an "X" in the fifth digit are designed for dual primary transformer applications. The fuse holder can hold one or two 1/4" × 1 1/4" or 5 × 20 mm fuses. Maximum leakage current, each line-to-ground at 120 VAC/60 Hz in H models is 2 μA, and in S models is 0.25 mA. For 250 VAC/60 Hz the H models maximum is 5 μA and the S models maximum is 0.50 mA. Terminals are 0.187" × 0.032" faston tabs. For those models with a switch, the switch is double insulated and rated for 10,000 operations at full load with a 51 amp in-rush capability. A conversion clip is provided for single fuse operation. Extenders are available to fit existing panel cutouts as special order items.

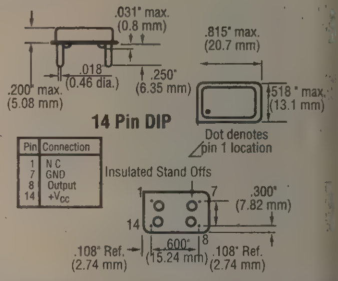
Clock Oscillators — TTL Compatible



Pin	Connection
1	N C
7	GND
8	Output
14	+V$_{CC}$

Specifications

- Package: 14 Pin DIP
- Frequency Range: 250 KHz to 80 MHz
- Frequency Stability*: ±100 ppm
- Temperature Range: Operating — 0° to +70°C
- Input: Current (Max.) — 60 mA - 250 KHz to 2.999 MHz, 35 mA - 3 MHz to 31.999 MHz, 45 mA - 32 MHz to 80 MHz, Symmetry — 40 to 60% Normal, 45 to 55% Tight @ 1.4 VDC; Voltage — 5 VDC ±0.5 VDC
- Output: Rise and Fall Time — ±15 ns Max. - Under 9 MHz, ±10 ns Max. - 9 MHz to 32 MHz, ±6 ns Max. - 32 MHz to 80 MHz; Logic "0" — 0.4 V Max., Sink to 16 mA; Logic "1" — +2.4 V Min., Source 0.4 mA
- Output Load: 1 to 10 TTL Loads

Mechanical

- Gross Leak Test: All Units 100% Leak Tested in Deionized H_2O; Mass Spectrometer Leak Rate Less Than 2×10^{-8} Atoms cc/sec. of Helium
- Seal Strength: 9 kgs Max. Force Perp. to Top and Bottom
- Bend Test: Will Withstand Max. Bend 90° Ref. to Base 2×
- Marking Ink: Epoxy, Heat Cured
- Solvent Resistance: Isopropyl Alcohol, Trichloroethane, Freon

Environmental

- Temperature Cycle: ±5 ppm Max., 0 to 120°C, 3 Cycles, 2 Hours Max. Each, 25 ±2°C Ref
- Shock: 1000Gs 0.35 m Sec, Half Sine Wave, 3 Shocks Each Plane
- Vibration: 10+55Hz, 1.50 mm D.A., 55-2000 Hz, 35Gs
- Duration: 12 Hours
- Humidity: 85% Relative Humidity, at +85°C, 250 Hours
- Hermetically Sealed Package

*Frequency stability inclusive of room tolerance, temperature stability over 0°C to +70°C, ±10% power supply variation, aging, shock and vibration.

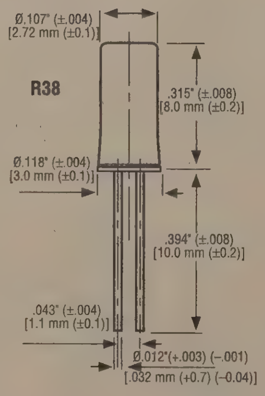
Tuning Fork Quartz Crystal Units 32.768 KHz



Specifications

- Holder Type/Item: R38
- Nominal Frequency 24°C: 32.768 KHz ±20 ppm
- Turnover Temperature: 24°C ± 4°C
- Parabolic Curvature Constant: –0.035 ppm/°C Typ.
- Quality Factor: 80,000 Typ./50,000 Min.
- Equivalent Series Resistance R_1: 18K Ω Typ.
- Motional Capacitance C_1: 0.0035 pF Typ.
- Shunt Capacitance C_0: 1.7 pF Typ.
- Capacitance Ratio: 490 Typ.
- Motional Inductance L_1: 7 mH Typ.
- Aging (First Year): ±3 ppm
- Operating Temperature Range: –10°C to +60°C
- Storage Temperature Range: –30°C to +100°C

Type R38-32.768. Tuning fork quartz crystal units.
996-2000. R38-32.768. **1-24**........**EACH .50** **25-49**..**EACH .35**

Also Available:

- Microprocessor Crystal Units HC-49 Short (AT Strip)
- Microprocessor Crystal Units Surface Mount — TT-SMD

- Clock Oscillators — Dual Output
- Clock Oscillators — Enable/Disable
- Clock Oscillators — ECL Compatible
- Clock Oscillators — HCMOS Compatible
- Voltage Controlled Crystal Oscillators — VCXO
- Temperature Compensated Crystal Oscillators — TCXO

- Monolithic Crystal Filters

- Ceramic Resonators — 200 to 800 KHz, 2.000 to 12.000 MHz

Raltron manufactures one of the most complete product lines of frequency management components including high quality crystal units, oscillators, filters, and ceramic resonators both through-hole and surface mount.

Because the product line is so complete, the inventory so large, Raltron and Allied can offer pricing that is always competitive, and often far lower than the competition.

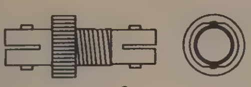
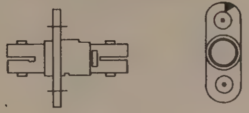
ST* Connectors

A

B



C



D

The 3M™ ST* Connector product line provides high repeatability and low light loss for premises, LAN and telco applications. The improved 3M connector design is compatible with the AT&T ST* connector product line as well as the Premise Distribution System (PDS) components and other ST* connector products. The 3M products are supplied with a high quality PC finish on zirconia ceramic ferrules.

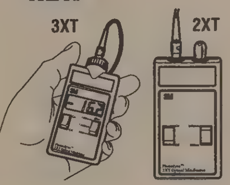
Photodyne™ 2XT Optical Mini-Source and 3XT Optical Mini Meter — *NEW* —



The 3M brand Photodyne™ 2XT Optical Mini-Source and 3XT Optical Mini-Meter can be combined to provide complete optical power measurement capabilities. Using the latest in cost-effective design technology, the units perform a variety of measurements:

- ► **Attenuation Testing**
- ► **Return Loss Measurement**
- ► **Link Conformance Testing**
- ► **Fiber Identification**
- ► **Single-Mode or Multiple Use**
- ► **Compact, Lightweight**

Mini-Optical Sources

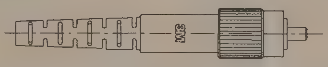
617-8400. 8350. "Epoxy" SC/FC PC3 Termination Kit	EACH	**1549.37**

FC/PC3 Connectors



The new 3M brand FC/PC Connector has been designed to combine the best features of the 3M FC/PC 1 (field mountability) and the 3M FC/PC 2 (pull-proof design) into one versatile connector design that is fully compatible with all FC Connectors adhering to the NTT specification. The FC/PC 3 incorporates 3M pre-radiused PC zirconia ceramic technology to provide high optical performance and minimize reflected power to –50 dB on factory polished cable assemblies. The ferrule is independent of the backbone so that a pull on the jacketed connectorized cable will not cause the ferrule to break optical contact with a second ferrule in a connection.

FC/PC3 Connector

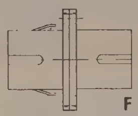
SC Connectors

E



F

3M has simplified the design of the SC connector to enhance performance and cable retention, and provide a readily field mountable connector. The connector is fully compliant to the NTT, JIS, ISO/IEC, and TIA/EIA component and ISO/IEC, CENELEC, ANSI, TIA/EIA-568A and BICSI system and cabling level standards. The 3M SC Connector has a rectangular push-pull coupling mechanism for easy insertion and high repeatability.

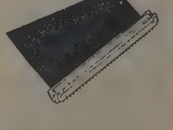
.100" × .100" PCB Connectors



Fits standard .100" × .100" header layout. Two row style uses less board area than 4-row design. **Accommodates Wire Sizes:** 26 AWG solid or stranded; 28 AWG solid or stranded; 30 AWG solid. **Current Rating:** 1 amp. **Insulation Resistance:** >1 × 10^9 ohms @ 500 VDC. **Temperature Rating:** –55°F to +105°F.

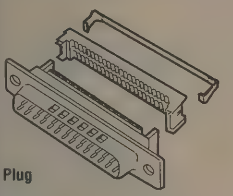
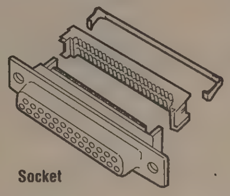
"D" Subminiature Connectors





Connectors are fully compatible with all .050" spaced flat cables with 26 and 28 AWG solid/stranded or 30 AWG solid wire. The low profile tin-plated metal shell ensures long-term reliability and EMI/ESD reduction. Pins and wiping leaf are plated with 30 µ gold. **Mounting Style:** 6000 Series — through hole; 6003 Series — 4-40 threaded insert.

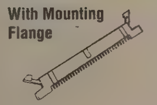
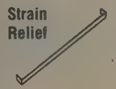
.100" × .100" Plug Connectors





Plug connectors are made of polybutylene terephthalate, with a flammability rating; UL 94-VO. Connectors accommodate 26-28 AWG, solid or stranded, or 30 AWG wire. (Adhesive cover comes with connector; strain reliefs, ejector latches, and polarization keys optional.)

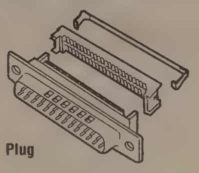
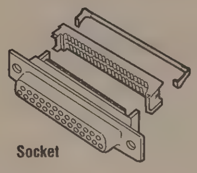
Series 89
D-Sub Connectors





- ► Pre-Assembled One-Piece Body
- ► For 26 and 28 AWG Solid or Stranded
- ► UL 94V-0, Gray
- ► Mounting Style: Through-Hole
- ► Contact Plating: Wipe Area: 15 µ" Average Gold Over Nickel
- ► Accepts .050" Flat Ribbon Cable and Discrete Wire

These standard-performance D-Sub Connectors are designed to reduce costs and save assembly time.

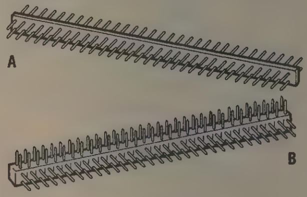
2 mm Pin Strip Headers



- ► Industry Standard Compatible
- ► High Temperature Dielectric
- ► IR, Vapor, and Wave Solder Compatible
- ► Maximizes Use of PC Board Space
- ► Mates With Boardmount and Wiremount Products
- ► End-to-End and Side-to-Side Stackable
- ► Contact Plating: 30µ" Gold

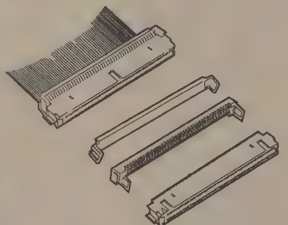
Mini Flat Cable Connectors

.050" × .100" Mini Wire Mount Sockets with Strain Relief



- ► Rugged Tripolarized Mating System
- ► Hill-n-Dale Design Provides Integral Strain Relief
- ► Insert Molded BeCu Contacts for Superior Strength and Reliability
- ► Flammability Rating: UL 94V-0
- ► Color: Gray
- ► Contact Material: Beryllium Copper
- ► Wire Accommodation: 30 AWG Solid
- ► UL File No.: E68080
- ► CSA File No.: LR 40971

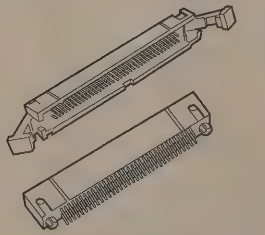
.050" × .100" Mini, Latch/Eject Headers Straight, Four Wall



- ► 50 Mil × 100 Mil Doubles Board Density
- ► Latch and Eject for Rugged Applications
- ► Tripolarization to Mini Socket — High Walls to Protect Pins
- ► Two Row Design Saves Board Space
- ► Color: Gray
- ► Flammability Rating: UL 94V-0
- ► Contact Material: Copper Alloy
- ► UL File No.: E68080
- ► CSA File No.: LR 40971

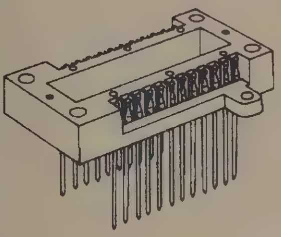
ZIP DIP Sockets



Designed for applications where field replacement or programming of DIPs is required. The patented ZIP (zero insertion pressure) feature uses screwdriver rotation of a cam for security against vibration or accidental unloading. Leads are on .100" centers.

Intra Connectors

The Intra-Connector allows access to previously inaccessible lines. In use, the connector is interjected between mating system connectors to provide external pin contacts that can be probed individually or connected to another cable assembly; pins also can be used to facilitate daisy chaining from a single connector end.

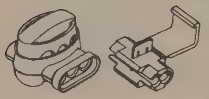
IDC Electrical Connectors



No strip, no twist — just squeeze. These IDC connectors have productivity built right in, reducing wire waste on the job. No special tools are needed. Make quick work of tap, inline and pigtail connections. Connectors are constructed of flame retardant materials. For use on copper conductors only.

Electrical Spring Connectors

Scotchlok™

The original color-coded wire connectors, featuring three-part construction with live spring action for outstanding performance. Flexible vinyl insulator won't cut or abrade wire. Steel inner shell allows for spring expansion/contraction to compensate for heat rise. Flared design aids wire insulation.

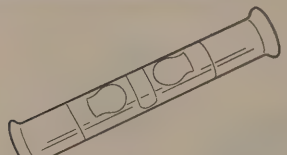
Solder Splice Connectors



- **Aerospace**
- **Automotive**
- **Military**
- **Appliance**
- **Marine**
- **Off-Road Vehicles**

A unique one-step system for reliable splicing, the 3M Solder Splice Connector represents a breakthrough in wire splicing and connecting technology. In one easy step, multiple wires can be soldered, insulated and environmentally sealed. This system does not require a crimp tool, just a standard heat gun designed for solder-type connectors. The 3M Solder Splice is ideal for harness fabrication in a variety of industries. Series 200X is insulated with a flame retardant, heat shrinkable sleeve of 3M's new flexible THV fluoropolymer. Series 100X has an outer layer tube of tinted, translucent, polyolephin, heat shrinkable tubing lined with hot melt sealant, which provides both insulation and a moisture seal.

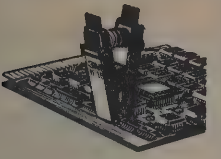
SOIC* Test Clips



Now normally hard-to-access SOICs can be connected to test probes quickly and easily without the risk of shorting out chips or damaging other board components. SOIC test clips are available in different pin sizes to accommodate a wide range of requirements. Industry standard .025" square contact pins on .050" centers are staggered to permit easy attachment of IDC socket connectors or wire wrapping and help prevent shorting of adjacent probes. With these smaller test clips, you can stack SOICs as close as .050" end-to-end. Like our other test clips, the SOIC series features heavy duty helical compression springs that provide firm, positive contact pressure, an insulating contact comb to prevent accidental shorts and a patented wiping action to ensure integrity in testing. The steel hinge pin and tough glass-filled polyester body, UL rated 94V-0, provide long service life. Available in gold or alloy 764, SOIC test clips from 3M offer solutions for all your test and prototype needs.

*SOIC (Small Outline Integral Circuits).

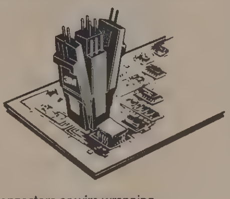
PLCC* Surface Mount Test Clips



Our Surface Mount Test Clip is truly the state-of-the-art for testing Plastic Leaded Chip Carrier (PLCC) style integrated circuits. The unique action wedge design — with all four sides opening simultaneously — provides a faster and easier attachment to the PLCC. The helical compression spring and insulating contact combs ensure integrity in contact when testing. Our narrow body design allows components to be tested with as little as .100" lead-to lead spacing, side stackable at .200" lead-to-lead spacing. Probe access points are immediately visible for fast and safe individual lead testing, while staggered contact rows on .100" centers allow for easy probe attachment and help prevent accidental shorting of adjacent probes. Industry standard .025" square contact pins permit easy attachment of female socket connectors or wire wrapping.

*PLCC (Plastic Leaded Chip Carrier).

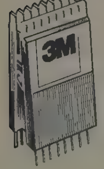
DIP Test Clips



The narrow-nose design makes it easy to attach on high-density boards, fits onto ICs with only 0.1" between leads and adjacent components. "Duck bill" contacts are flat, won't roll off IC leads. Open-nose construction enables probe at IC leg. Pin rows are offset for easy attachment of probes. "Contact comb" construction separates contacts with precision. No shorts. Heavy duty, industrial-grade springs for firm contact pressure. Steel pivot pin. The standard models have "nail-head" leads which keep probes and test leads from sliding off. The connector–compatible models have headless leads .025" long to allow attachment of cable assemblies. Leads are .031" in diameter on .100" centers on both models.

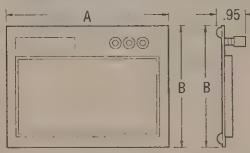
Solderless Breadboards (300 Series)



- **Simply Plug in Components and Interconnect with Ordinary 22-Gauge Solid Wire; Time Consuming Soldering Is Eliminated and All Components Can Be Used Again and Again**
- **Alpha-Numeric Identification Along the Strips Allows for Fast and Easy Layout Designs and Project Applications; Every Tie-Point Position on the Strip Can Quickly Be Identified By a Letter and Number Combination**
- **3M Jumper Wires Are Included**
- **DIPs of all Sizes and a Wide Variety of Discrete Components with Lead Diameters of Up to .032" Can Be Used**
- **The Sturdy Metal Base Plate Serves as a Ground Plane to Help Minimize Noise and Voltage Spikes in Today's High-Speed Circuits**
- **By Jumping Across the Center Area, Full-Length Distribution Buses Can Be Created Vertically**
- **Use the 5-Way Binding Posts for Easy Connection to Ground, Power Supply, and Other External Equipment**

3M Series 300 Breadboards incorporate state-of-the-art techniques in design and fabrication to yield a circuit-building system with unparalleled flexibility and reliability. A voltage distribution system is integrated with the basic component breadboarding matrix, and 5-way binding posts provide the interface for connections from the power supply, signal generators or other external equipment. All models incorporate the 3M laboratory-proven multi-tie-point terminal design for convenient, solderless, plug-in circuit building. Each terminal position contains electrically connected tie-points spaced on a continuous .100" matrix to accept any component with .100" lead spacing as well as components whose leads can be dressed to fit. The surface of the steel base is high gloss baked enamel for protection. Rubber feet prevent sliding during bench work..

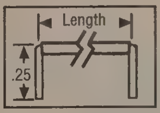
Jumper Wires



- **For Quick, Neat Circuit Connections**

Speed your circuit building even more. Each wire is stripped ¼" and bent 90° on both ends for easy insertion. All Jumper Wires are PVC insulated #22 AWG solid, tinned copper and are recommended for use with all solderless breadboarding units from ESM.

Coaxial Ratchet Crimp Tool Kit

Model 24-8802K standard crimp tool kit for Aim and Cambridge connectors includes all parts listed. **24-9958P Tool with Die.** For RG-58, RG-58 TFE, RG-141, RG-142, 223, 400, RG-303, and RG-55. Crimps 3 piece BNC-TNC and Mini UHF Connectors. **Die Size:** .213 and .060. **99-9959 Die.** For RG-59, 62, RG-450 Proflex, and RG-8X. Crimps 3 piece BNC-TNC and Mini UHF connectors. **Die Size:** .255 and .060. **99-9858 Die.** For RG-58, RG-59 TFE, and RG-58 TFE. Crimps two piece BNC-TNC connectors. **Die Size:** .320 and .211. **99-9859 Die.** For RG-59 and RG-62. Crimps two piece BNC-TNC connectors. **Die Size:** .320 and .250.

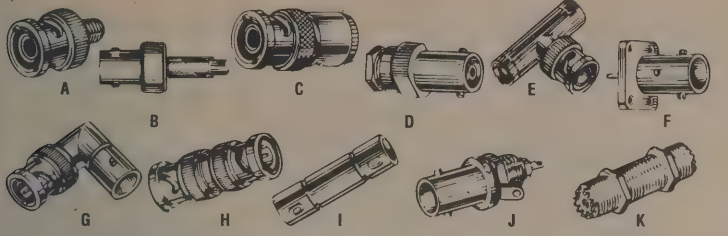
Coaxial and Audio Connectors, Patch Cords, Jumpers and Extension Cables ALECTRON

Coaxial Connectors



BNC Bayonet-Coupled Connectors

Rated: 500 volts peak; 500 volts (RMS) dielectric. **Impedance:** 50 ohms, VSWR, 1.25:1 maximum (straight plug and jack). Cable retention strength equal to cable braid. Center contact is soldered; braid may be soldered or crimped. Delrin dielectric. Connector is brass, center pin is silver plated; other parts nickel-plated. **Note:** These connectors are made to commercial standards — not for MIL use.

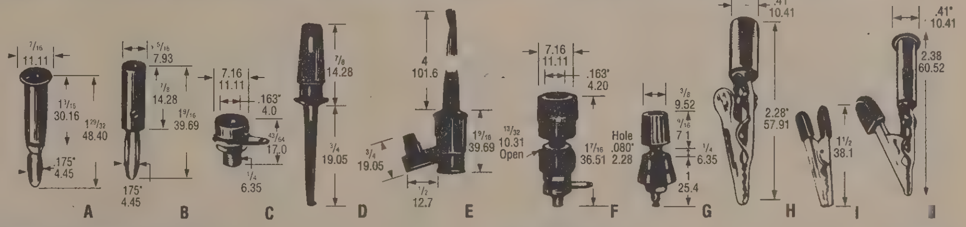
Banana Plugs and Jacks, Grabbers, Binding Posts and Alligator Clips



Banana Plugs and Jacks

All are machined of top-quality materials and carefully inspected. Plugs have sufficient spring tension to assure good holding power and low contact resistance. **Note:** These connectors are made to commercial standards — not for MIL use. Figure A and B mate with Figure E, F, or G.

DIN Rail Mount Terminal Blocks

Standard terminal blocks feature a universal foot for mounting on 35 mm or 32 mm DIN rail. Ground Blocks are designed for either 35 or 32 mm rail, as indicated by the suffix in the Mfr.'s Type No. High density design features screw-cage clamps for reliable connections. **Material:** Polyamide 6.6. **Ratings:** 600 V or 300 V. UL, CSA, IEC/VDE.

Select the appropriate terminal block for your application from TABLE I using the SELECTOR ILLUSTRATION (SI#) shown opposite. Choose the accessories required for each terminal block selection from TABLE II, also using the SELECTOR ILLUSTRATION.

Marking Tags

Give a professional look to every job, large or small, standard or special with Altech's comprehensive Marking System. Marked terminal blocks increase wiring efficiency, save installation time and make wire hook-up, system modifications and troubleshooting quick and easy.

SB and BR

Push-on tags are available in two widths and fit most DIN rail mount and panel mount terminal blocks. They can be inserted individually or in strips of ten to speed installation. BR Tags are extra large for multiple digits or large markings. They are available blank for hand marking or imprinted. Standard tags are white with black imprint, marked consecutively or with identical numbers, horizontal (FW) or vertical (FS). Refer to Table I on page 160 to determine which tag can be used on each terminal block type. A package contains 10 strips of 10 tags.

TM

Top marking strips snap onto the tops of terminal block assemblies to provide a wide surface for multi-character markings. They can also be used as protective covers for internal jumpers. Strips are supplied blank for hand marking or computer imprinted labels. Supplied in .5 m (19.7") lengths, which cut easily.

Ferrules

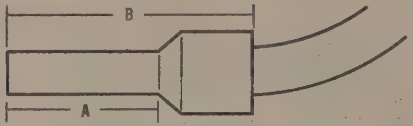

Fig. 1 — Insulated

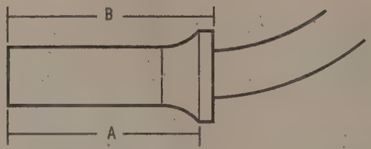

Fig. 2 — Uninsulated

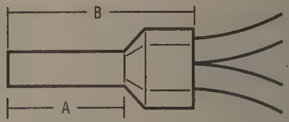

Fig. 3 — Dual Wire Insulated

Insure reliable electrical connections and prevent fraying and breaking of wire strands when terminating conductors in screw clamp terminal blocks. Insulated ferrules have molded-on plastic sleeves and prevent conductor breakage due to bending, wire stress or vibration.

Dual wire insulated ferrules provide reliable connection of multiple wires into the same terminal block clamp and simplify jumping between terminal blocks. All ferrules are packaged in 100/piece standard packs.

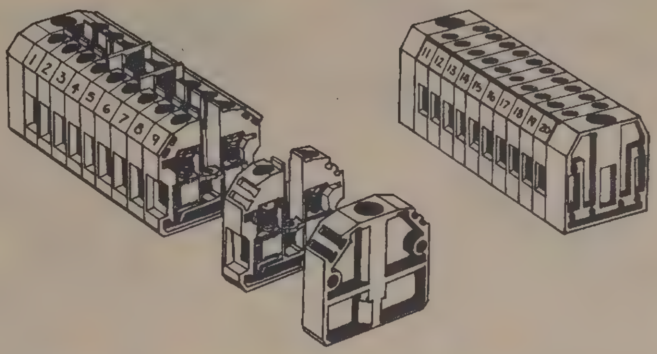
Panel Mount Terminal Blocks



- ► **High Density, 50 or 60 Terminations Per Foot**
- ► **Screw-Cage Clamp**
- ► **Accepts Standard Marking Tags**

Compact and convenient to use where space is a constraint. Cost effective sectional design allows for changing requirements. Order preassembled or easily snap together single pole components to form multipole assemblies. Mounting sections snap onto ends of assembly or between terminal block components to provide additional mounting points.

BKA assemblies accept external jumpers while RKB4 assemblies feature an internal bussing provision to distribute power selectively or throughout the assembly.

BKA2.5 Terminal Block Components (1 Pole) and Assemblies (2 Poles and Up)

300 V, 20 A, 22-12 AWG. **Pole Spacing:** 5 mm (.197"). 22 mm (.87") wide × 23 mm (.91") high.

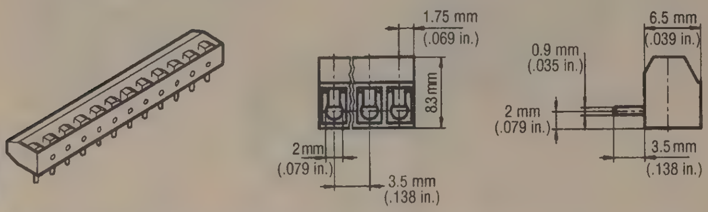
Printed Circuit Board Terminal Blocks

Fixed — Tubular Screw Clamp Design

- Front, Top Wire Entry
- Up to 15 A, 300 V, 28-14 AWG
- Modular and Single Mold
- Standard Color: Gray

Use for cost sensitive applications where infrequent wire terminations are expected. UL, CSA, IEC/VDE.

Top Wire Entry



AK555. 3.5 mm (.138") pin spacing, 6 A, 300 V, 28-16 AWG.
6.5 mm (.26") high, with wire protector. Subminiature design provides small footprint and the highest circuit density available. 0.9 mm (.035") dia. round pins. **Color:** Gray.

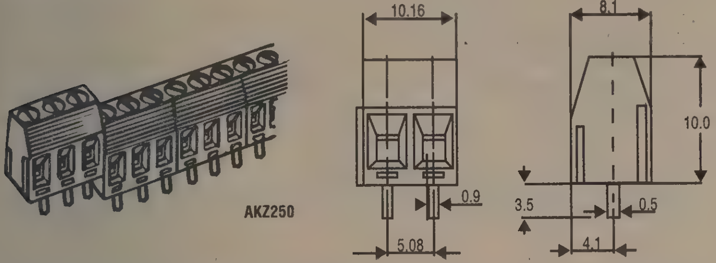
Printed Circuit Board Terminal Blocks

Fixed — Screw-Cage Clamp Design

- ► Front, Top, 45° Wire Entry
- ► Up to 15 A, 300 V, 26-12 AWG
- ► Single, Double Levels
- ► Modular Construction

Ideal for industrial applications where frequent wire terminations occur. UL, CSA, IEC/VDE.

Front Wire Entry



AKZ250. 5.08 mm (.200") pin spacing, 10 A, 300 V, 26-14 AWG†.
10 mm (.39") high. 0.5 × 0.9 mm (.019 × .035") rectangular pins. **Color:** Green. †UL®/CSA Pending.

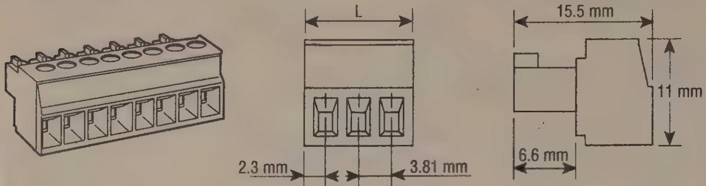
Printed Circuit Board Terminal Blocks

Mini Pluggable — Screw Cage Clamp Design

- ► **Single Mold Construction**
- ► **Low Profile Design**
- ► **Standard Color: Green**

Miniature two piece, plug and header designs speed and simplify board and device replacement where space is limited.

Horizontal and vertical Mini Headers offer different wire entry options and enhance plug accessibility. Closed end design helps prevent misplugging. Optional keying is available.



Mini Plug
AKZ1550 Plug. 3.81 mm (.150") pole spacing. 8 A, 300 V, 28-16 AWG.
Wire entry in same direction as plug-in. Mate with STLZ1550 and STLZ1555 mini headers. **Color:** Green.

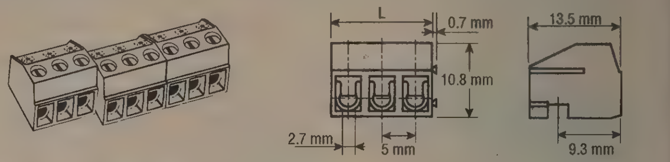
Printed Circuit Board Terminal Blocks

Econo Pluggable — Tubular Screw Clamp Design

- ► **10 A, 300 V, 22-14 AWG**
- ► **Standard Color: Gray**

Cost effective plug and header design for light duty applications where infrequent multiple wire-to-board connections will be made. UL, CSA, IEC/VDE. Please contact Altech for pole positions not shown.

Straight open pin headers feature break-away construction and are supplied in lengths up to 24 poles.



AK130 Plug. 5 mm (.197") pin spacing. 10 A, 300 V, 22-14 AWG.
Wire entry perpendicular to plug in direction, modular construction, interlock 2 and 3 pole modules to create multipole assemblies. 10.8 mm (.43") high. **Color:** Gray. Mate with STL130, STL132 straight pin headers (right angle headers are available).

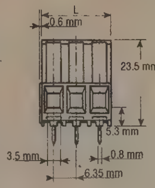
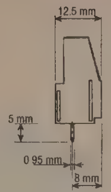
Printed Circuit Board Terminal Blocks High Current

Fixed — Screw Cage Clamp Design

For wire to board connections in AC power applications where a high current connection (up to 30 amps) is required and where frequent terminations occur. Popular 1/4'' and 3/8'' pin spacings provide replacements for outdated PC board barrier strips.

AKZ840 Front Wire Entry

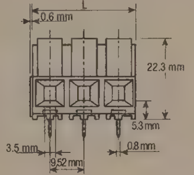


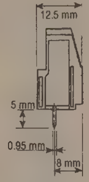


AKZ840. 6.35 mm (.197") pin spacing, 30 A, 300 V, 22-10 AWG.
23.5 mm (.93") high × 12.5 mm (.49") deep; .8 × .95 mm (.032 × .037") rectangular pins. **Color:** Green.

Stock No.	Mfr.'s Type	Poles*	Part No.	Length mm (In.)	EACH	
					1-99	100-499
502-8600	AKZ840/2	2	35.302	12.70 (0.50)	**1.06**	**.95**
502-8602	AKZ840/3	3	35.303	19.00 (0.75)	**1.59**	**1.43**

AKZ841 Front Wire Entry





AKZ841. 9.52 mm (.375") pin spacing, 30 A, 300 V, 22-10 AWG.
22.3 mm (.88") high × 12.5 mm (.49") deep; .8 × .95 mm (.032 × .037 in.) rectangular pins. **Color:** Green.

Stock No.	Mfr.'s Type	Poles*	Part No.	Length mm (In.)	1-99	100-499
502-8604	AKZ841/2	2	35.352	19.00 (0.75)	**1.15**	**1.04**

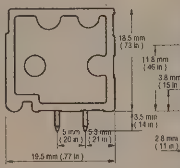
*Multipole assemblies up to 16 poles are available or assemble using 2 and 3 pole modules.

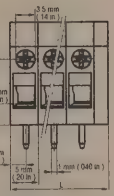
Fixed — CAM Clamp Design

- **Front and Top Wire Entry Versions with Wire Entry and Screws on the Same Plane**
- **Interlocking Sectional Design**
- **Dual Pins for Increased Solder Joint Strength**
- **Multi Pole Assemblies Supplied with End Plate Installed**
- **Standard Color: Green**

Precision machined CAM forces wire against contact pin for a highly efficient and reliable connection. Because clamp screw and wire entry are on the same plane, wire entry and screwdriver access are optimized. Ideal when positioning circuit board directly behind opening in panel, chassis or housing.

Front Wire Entry





AK2200. 5 mm (.197") pin spacing. 15 A, 300 V, 22-12 AWG.
18.5 mm (0.728") high, 0.8 × 1.0 mm (.032 × .039") rectangular dual pins. **Color:** Green.

†Sold as 20 pole break apart assembly, includes one end plate.

Printed Circuit Board Terminal Blocks

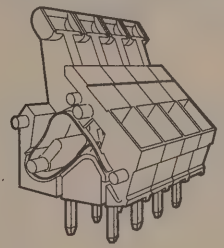
Fixed — Spring Clamp Design

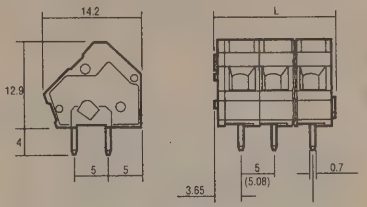
- **45° Wire Entry**
- **Standard Color: Light Gray**
- **Sectional Design**

Ideal for industrial applications where frequent wire terminations occur. UL, CSA, IEC/VDE.

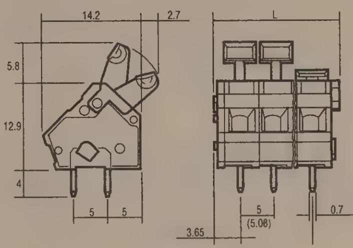
Spring Clamp is screwless simplifying wire termination and saving time. Strip wire, open spring clamp, insert wire, close clamp. Sectional design, order multiple assemblies (up to 50 poles) or easily snap together single pole terminals and end plate. 5 mm (.197") nominal pin spacing, adjustable to 5.08 (.200"). Stainless steel spring. **Standard Color:** Light Gray.

Three Methods of Clamp Actuation: AK3000 — Without actuator lever, using a 3 mm (.118") wide screwdriver tip; AK3001KD — With actuator lever, push on lever with screwdriver tip to open clamp; AK3001FD — With finger operator actuator lever, push on lever with finger to open clamp.

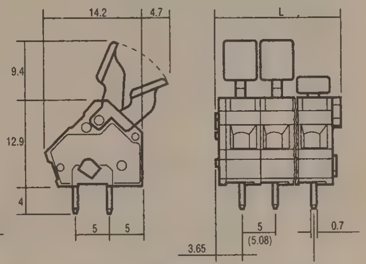




AK3000



AK3001KD



AK3001FD

AK3000. 5.0/5.08 mm (.197/.20") pin spacing. 10 A, 300 V, 22-12 AWG.
12.9 mm (.51") high, 0.7 mm (.03") square pins. **Color:** Light Gray.

Printed Circuit Board Terminal Blocks

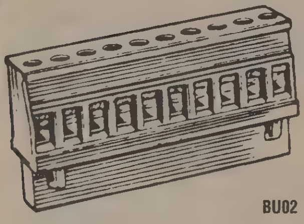
Industry Standard Pluggable — Screw-Cage Clamp Design Plugs

Wire Entry

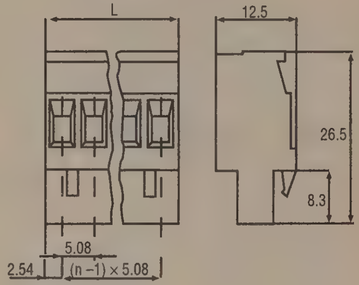
- ► Perpendicular to Plug-In
- ► Same Direction as Plug-In
- ► Same Plane as Screws and Same Direction as Plug-In

For industrial applications and/or applications where frequent wire terminations occur. Single mold offers maximum strength. Plugs mate with shrouded headers listed on page 169. UL, CSA, IEC/VDE.

Wire Entry Perpendicular to Plug-In



BU02



BU02 Plug. 5.08 mm (.20") pin spacing. 15 A, 300 V, 22-10 AWG.
Vertical construction with grip top makes insertion and removal easy. Wire entry perpendicular to plug-in direction on locking tab side. Mate with STLZ950, STLZ955, STLZ970, STLZ975 and AKZ990 headers. **Color:** Green.

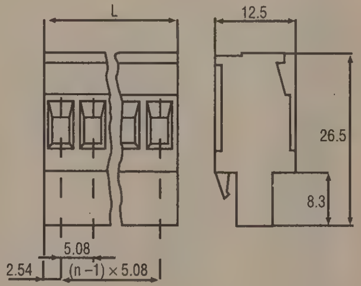
BU04



BU04 Plug. 5.08 mm (.20") pin spacing. 15 A, 300 V, 22-10 AWG.
Vertical construction with grip top makes insertion and removal easy. Wire entry is opposite locking tab side. Mate with STLZ950, STLZ955, STLZ970, STLZ975 and AKZ990 headers. **Color:** Green.

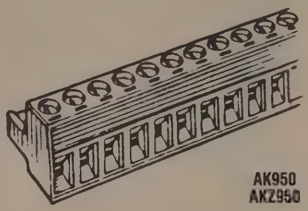
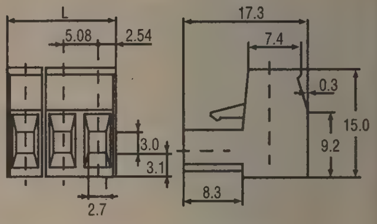
Wire Entry Same Direction as Plug-In



AK950
AKZ950



NOTE: Dimensions shown are for AKZ950.

AK950 Plug. 5 mm (.197") pin spacing. 15 A, 300 V, 22-12 AWG.
Wire entry in same direction as plug-in. Mate with STL950 and STL955 headers. **Color:** Green.

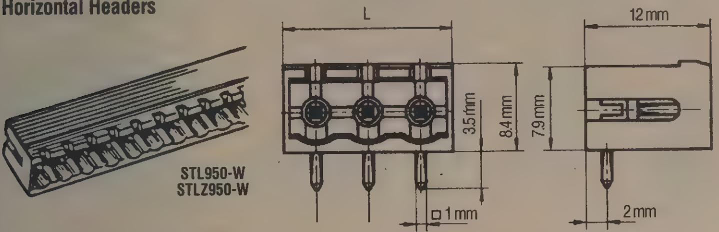
Headers for Screw-Cage Clamp Design Plugs

- ► **Vertical, Horizontal 45°**
- ► **Open or Closed End**
- ► **Single or Double Level**

Shrouded headers for screw-cage clamp design plugs are industry standard compatible. Single mold construction. Headers mate with plugs on previous page. UL, CSA, IEC/VDE.

Horizontal Headers



STL950 Headers. 5 mm (.197") pin spacing.
Closed ends. 1.0 × 1.0 mm (.039 × .039") square pins. **Color:** Green. Mate with AK950 plug.

F

Ribbon Cable to Discrete Wire Modules — Fig. A

Interface between multiwire flat cables with up to 64 conductors and discrete wires. No special tools are required. Supplied with short strain relief ejector latches (long latches available). Terminal blocks are individually marked to correspond to the numbers on the header pins. 3 A, 250 VAC, 22-12 AWG. DIN rail mount, panel mount available.

Stock No.	Mfr.'s Type	Part No.	Poles	Length (L) mm (In.)	EACH

Sub D Modules — Fig. B

Interface between high density connectors with up to 50 poles and discrete wires. No special tools are required. Equipped with male or female connectors. All terminal blocks are individually marked to correspond to the numbers on the connector pins or sockets. 4 A, 250 VAC, 22-12 AWG. DIN rail mount, panel mount available.

Miniature Relay Modules with Relays — Fig. C

Traditional relay interfaces in a high density package. Protect equipment devices and components from feed-back and cross-system overvoltages by isolating electrical and electronic circuits. Bussed or isolated coil circuits. Supplied with relays or with sockets only. Indicator and DC protection diodes. Available up to 220 VDC, 330 VAC with coil circuits. Contact circuits rated 260 V, 8 A (SPDT) or 6 A (DPDT) or 15 A (SPDT isolated only); 22-12 AWG. DIN rail mount, panel mount available.

Stock No.	Mfr.'s Type	Part No.	Contact Form	No. of Relays	Length (L) mm (In.)	EACH

I/O Opto Carriers — Fig. E

Mount standard optocoupler input/output (I/O) modules in a high density arrangement for logic output to field devices, or for input of field data to the controller. Altech I/O carriers can accept up to 16 industry standard .6" (15.24 mm) I/O modules in any combination — input, output, AC or DC from most manufacturers. 1, 2, and 4 isolated position versions with 5, 15 and 24 VDC logic; and 4, 8 and 16 bussed versions with 5 to 24 VDC. DIN rail mount, panel mount available.

Diode Modules — Fig. F

Wire individually labeled diodes into existing circuits for freewheeling, DC inductive kick suppression (commutating), reverse DC polarity protection, etc. Used bussed diodes for distribution of logic VCC or ground, or gather and decouple electrical signals for lamp testing or collective fault messages. Use as commutating diodes across inductive loads such as DC relays, solenoid valves, actuator magnets, etc. to suppress voltage surges. Standard modules include series connection diode circuits in 1 A versions, and diode gates with bussed anodes or cathodes. DIN rail mount, panel mount and 3 A diodes available. Can be ordered as Component Carriers without diodes.

Standard Sex CPC Connectors

Plug

Square Flange Receptacle

Free-Hanging Receptacle

CPC Connectors provide a substantial savings in weight and cost through the use of a plastic shell and a wide variety of pin and socket contacts. The various sizes and densities are supplied unloaded (without contacts). Recognized under the component program of Underwriters Laboratories, Inc. for 250 V service. UL File No. E28476. CSA Certified File No. LR 7189.

Series 1. Standard density, multimate contacts for normal unsealed operations. **Materials:** 94 V-1 rated, heat stabilized, fire resistant, self extinguishing black thermoplastic. **Contacts not included — order as a separate item. Note:** Maximum wire insulation dia. is .100 (2.54) except for arrangement 23-24 which will accept insulation dia. of .150 (3.81) max.

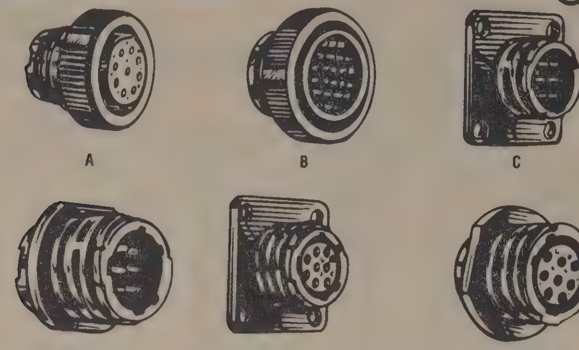
Series 2 — High Density



High density connectors for normal unsealed applications. These connectors accept Size 20DM (screw machined) and Size 20DF (precision formed) pin and socket contacts with a .040" (1.02 mm) diameter that are also used in D-Sub Connectors. Contacts can be either crimp or solder cup types and are sold separately. Cable Clamps are the same as for the same size of Series 1. **Contacts, crimp tools, and insertion/extraction tools are listed with D-Subs on page 175.**

Series 4

Combination of standard and power density connectors for normal unsealed applications. Accept size 16 multimate and the power contacts. Combine the signal and coaxial capabilities of Series 1 with the power circuit capabilities of Series 3 connectors. **Contacts are sold separately.** The tools, contacts, and accessory items used in Series 1 and Series 3 are used in Series 4. No additional items are required.

AMP® Power Lock Connectors have hermaphroditic housing and contact designs. The hermaphroditic housings are also modular in design and permit the clustering of connectors of the same series. Housings are made of impact resistant thermoplastic with stainless steel locking springs for contact stability. Terminals are available in strip and loose piece form with a material choice of silver, or gold plated copper. Contacts for Series I Connectors accept a wire size range of 18-12 AWG and contacts for Series II Connectors accept a wire size range of 10-6 AWG. Both insert easily into housings where integral locking springs provide positive retention.

AMP Power Lock Connectors can be adapted to most high current applications and may be used as free-hanging, surface mounted and thru-panel mounted connectors, or when posted contacts are used, they can be used on printed circuits.

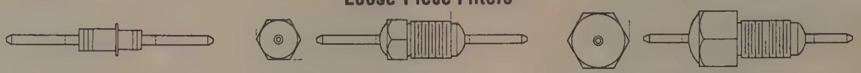
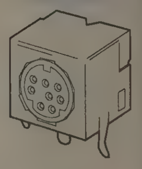
Loose-Piece Filters



Right Angle Mini-DINs



All AMP® QuietLine filter products offer proven, rugged performance to eliminate unwanted EMI/RFI. They assist in meeting design requirements of FCC Part 15 (A & B), VDE, and VCCI requirements, and are intermateable with standard industry interfaces.

Distributed Element Filters
Current Rating (Max.): Load current (in connector), #20 contact — 7.5 amps (loose-piece filters — 15 amps); RF current — 0.3 amps. **Operating Voltage (Max.):** 100 VDC at –25°C to +85°C. **Dissipation Factor:** 0.1 max. **Dielectric Withstanding Voltage:** 250 VDC for five seconds. **Insulation Resistance (Min.):** 500 megohms, minimum at 100 VDC, 2 minutes and +25°C. **Direct Current Resistance:** .002 ohms max. **Filter Sleeve:** Ferrite and ceramic.

Tubular Capacitive Filters
Current Rating (Max.): Load current, #20 contact — 5 amps; RF current — 0.3 amps. **Operating Voltage (Max.):** 100 VDC at –25°C to +85°C. **Dissipation Factor:** 0.1 max. **Dielectric Withstanding Voltage:** 250 VDC for five seconds (contact manufacturer on higher voltages). **Insulation Resistance (Min.):** 1 gigaohms at 100 VDC, 2 minutes and +25°C. **Direct Current Resistance:** .002 ohms max. **Filter Sleeve:** Ceramic.

Capacitive Array on Ferrite
Operating Voltage: AMPLIMITE® connectors — 100 VDC max.; mini-DIN connectors — 30 VDC max. **Dielectric Withstanding Voltage:** 250 VDC. **Insulation Resistance:** 100 megohms, min.

Ferrite Only
Operating Voltage: AMPLIMITE® connectors — 100 VDC max.; mini-DIN connectors — 30 VDC max. **Dielectric Withstanding Voltage:** 250 VDC. **Insulation Resistance:** 100 megohms, min.

Plug/Receptacle D-Sub Adapters

Distributed Element Filters
Material and Finish. Shell: Steel, tin plated. **Insert:** UL rated 94VO thermoplastic. **Contact:** Pin-brass, socket-phosphor bronze, plated .000015 (0.00038) min. gold in contact area, plated tin/lead on termination end.

Loose-Piece Filters

Quiet Line loose-piece filters are especially suited to the cost/performance requirements of commercial electronic equipment. Typical applications include mobile radios, transducers, microprocessors, computer peripheral equipment and communication equipment.

Eyelet Style
Recommended Mounting Hole: $.117^{\pm.002}$ ($2.97^{\pm0.05}$) (#32 drill). **Material and Finish. Contact:** Copper alloy 260, plated .000015 (0.00038) min. gold per MIL-G-45204, Type I, Grade C over .000070 (0.00178) min. nickel per QQ-N-290. **Eyelet:** Copper alloy per QQ-B-626 plated .000015 (0.00038) min. gold per MIL-G-45204, Type I, Grade C over .000070 (0.00178) min. nickel per QQ-N-290. **Solder:** SN10 per QQ-S-571. **Filter:** Ferrite and ceramic.

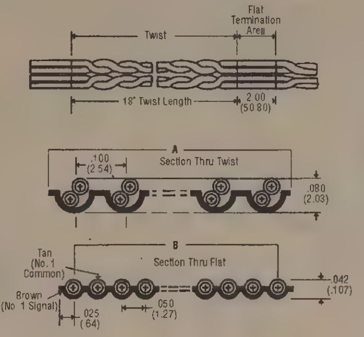
AMP-TWIST™ .050 Centerline Color Coded Twisted Pair PVC, Cable Insulation



Mechanical Specifications. Conductor: 28 AWG (7 × 36) tinned copper. **Insulation:** .010" (.254 m) nom. wall color coded PVC. **Substrate:** .010" (.254 m); nom. wall clear PVC. **Pitch:** Twisted pair centers — .100" nom. (2.54 m); Conductors centers — Flat .050" ±.005" (1.27 ±0.13 m). **Pairs:** 1/2" nom. lay — adjacent pairs have opposite direction lay. **Construction:** 18" of twisted pairs, 2" of flat section. **Color:** Brown, red, orange, yellow, green, blue, violet, grey, white, black, with common tan, repeat. **UL File No.:** E53793. **UL Style:** Dual rated 2693 and 2697. **Temperature Rating:** –20°C to +105°C UL. **Flammability Rating:** UL — VW-1.

Electrical Specifications. Voltage Rating: 300 V RMS. **Current Rating:** 1 amp. **Conductor Resistance:** 68 ohms/1000 ft. (304.8 m). **Insulation Resistance:** >1 × 10¹⁰ ohms; 10 ft. (3.048 m). **Impedance (Balanced):** 115 ohms. **Impedance (Unbalanced):** 100 ohms. **Capacitance @ 1 MHz:** 16 pF/ft. (52 pF/m). **Inductance @ 1 MHz:** .24 µH/ft. (.79 µH/m). **Propagation Delay:** 1.6 ns/ft. (5.25 ns/m).

Coaxial Connectors

AMP® BNC RF connectors have bayonet-lock coupling. AMP's exclusive single and dual crimp terminations insure positive insulation grip and require absolutely no soldering. They provide termination at the lowest overall applied cost. **Rating:** 500 volts (RMS). **Frequency:** 0-2.5 GHz for single crimp; 0-2 GHz for 75 ohm; 0-4 GHz for all others. **Style:** Mil Type or Commercial (Com.). **Crimping tools for the connectors are listed on page 189.**

BNC 50 or 75 Ohm, Straight Crimp Plugs

Standard single (S), dual (D), and hex (H) crimp termination plugs. Contact plating is gold (G), silver (S), or tin (T). Body plating is nickel (N) or silver (S). The dielectric is polyethylene (PE), polymethylpenlene (PM), polypropylene (PP) or teflon® (T).

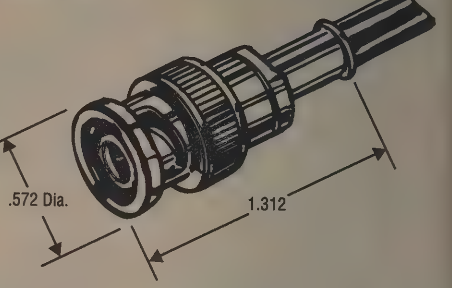
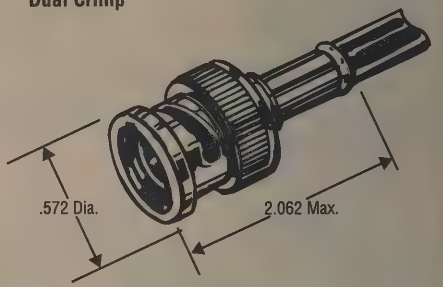
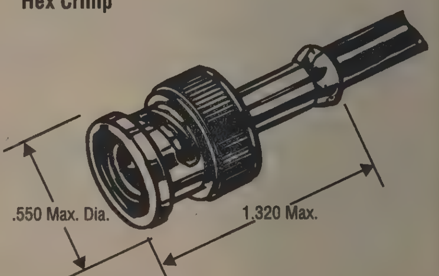
Single Crimp



Dual Crimp



Hex Crimp



Coaxial Connectors

AMP® BNC RF connectors have bayonet-lock coupling. AMP's exclusive single and dual crimp terminations insure positive insulation grip and require absolutely no soldering. They provide termination at the lowest overall applied cost. **Rating:** 500 volts (RMS). **Frequency:** 0-2.5 GHz for single crimp; 0-2 GHz for 75 ohm; 0-4 GHz for all others. **Style:** Mil type or commercial (Com.). **Crimping tools for the connectors can be located on page 189.**

BNC Right Angle Plugs (50 or 75 Ohms)

Standard single (S), dual (D), and hex (H) crimp termination plugs. Contact plating is gold (G). Body plating is nickel (N). The dielectric is polymethylpenlene (PM) or teflon® (T).

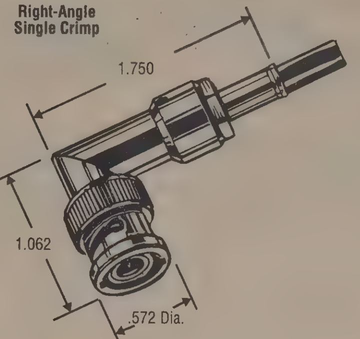
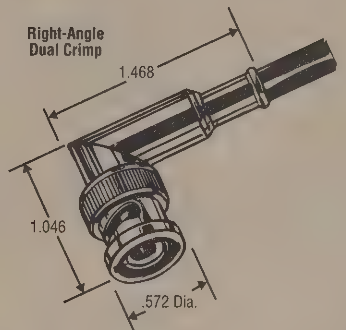
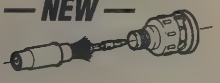
Right-Angle Single Crimp



Right-Angle Dual Crimp



— NEW —



Consumer Series BNC Plugs

► **Plating — Contact - Gold; Body - Nickel; Dielectric — Thermoplastic**

New low-cost alternative to AMP's full line of commercial and military-style BNC connectors. The sleek, lightweight plastic collars come in black, red, green, blue and computer grey for easy circuit identification without any additional assembly. Fully intermateable with standard BNC jacks.

SMB Product Facts

- ► SMB Offers Snap-Fit Coupling for Quick Connect/Disconnect
- ► Choice of Commercial or MIL-Type Connectors
- ► 50 and 75 Ohm MIL-Type Connectors Available
- ► Screw Machined Components for Highest Performance
- ► Straight Plugs and Jacks are Completely Crimp Terminated
- ► Fast Easy Cable Assembly
- ► Low VSWR
- ► Standard Military, Commercial or AMP Tooling
- ► MIL-Type Connectors Offer Consistent Mating and Unmating Forces
- ► Dielectric: Teflon

Commercial MATE-N-LOK® Connectors

Panel Mount Connectors

- ► Easy Cavity Identification
- ► Locking Devices are Integral Part of Design, Connector Halves will Hold Together Under Severe Conditions of Vibration and Shock
- ► Built-In Contact Stabilization and Self-Aligning Features
- ► Hot Side Egg Crate Design for Safety
- ► Precision Molded to Exacting Tolerance
- ► Recommended Panel Thickness, .025"-.065" (.064-1.65 mm)
- ► Natural Color UL 94V-2 Rated Nylon — Fully Polarized
- ► UL Rated for 250 V AC or DC

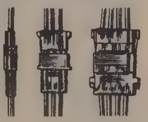
Free Hanging Connectors



This version of the MATE-N-LOK® Connector provides all the quality features of the panel mount, yet was designed for free-hanging installations. The 2, 3, and 4 circuit configurations feature detent locking housings while the 6, 8, and 10 circuit configurations utilize positive lock housings. A single circuit connector is available with an option of detent or positive lock housings. The multiple circuit connector is available with an option of detent or positive lock housings. The multiple circuit configurations are polarized to assure proper electrical connections.

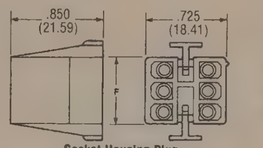
Recommended Panel Cut-Out



Socket Housing Plug

- ► Positive Lock
- ► Dual Row
- ► UL 94V-2 Nylon, Natural

Mounting Information: 1. Recommended panel thickness "E" is .040"-.100" (1.02-2.54 mm) and is dependent on "T" and "R"; 2. The pin housing must be inserted in a rocking manner; 3. The panel must be punched so that the housing enters the panel in the same direction as the punch. **Note:** Motor mount housings may be used in flat panels.

MR (Mini. Rectangular) Connectors

The housings are brick red in color (UL 94V-0 rated) and have .165" contact-to-contact spacing. Housings have molded-in polarization. Plugs and caps fit the same mounting hole. Contacts accept 26-18 AWG wire with insulation diameters from .025"-.115". UL recognized File E28476 and CSA certified LR7189 for 250 V and 105°C operation.

- ► Innumerable Keying Combinations
- ► Pins and Sockets Can Be Intermixed In The Same Housing
- ► Positive Polarization
- ► Rear Cavity Identification
- ► Pin or Socket Contact Can Be Hot
- ► Positive Locking Housings
- ► Insulation Capability To .200 (5.08) Diameter
- ► Removable, Crimp Snap-In Contacts
- ► Low Contact Mating Force
- ► Harness to PC Board Capability Using Pin or Socket Header Assemblies
- ► Contacts are on .250 (6.35) Centerline Spacing
- ► Recognized Under Component Program of Underwriters Laboratories Inc. File No. E28476
- ► CSA Certified File No. LR 7189
- ► Tested By VDE Under Their Test Report #14397-1431-1003
- ► Rated for 600 VAC or DC
- ► Not Recommended For Interrupting Current
- ► Dual Locking Lances Provide Optimum Contact Stability

This series of connectors provides a highly reliable and economical means of grouping multiple-lead connectors in today's computer, computer/peripheral equipment and business machines.

MTA-100 Post Headers — .100" Centers

Discrete wire to board — 2-piece interconnection. Insulation displacement wire termination. **MTA Post Headers:** .100" Centers. **Insulation:** Polyester. UL94V-0 rated. Natural color. **Posts:** Tin-plated copper alloy. Meets the material requirements to Table 23.1 of UL 1410 Standards for Television Receiver and Video Products*. UL Recognized File No. E 28476. CSA Certified File No. LR17189.
*Wire-to-post connectors only.

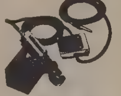
Tools for MTA-100

The pistol grip tool can terminate up to 600 wires per hour. The T-handle tool is useful for prototype, maintenance, and repair.

Type 58074-1. Pistol grip handle only.
512-9082. 58074-1 .... **EACH 53.92**
Type 58246-1. Head for MTA-100.
512-9084. 58246-1 .... **EACH 113.66**
Type 59803-1. Maintenance T-handle tool, MTA-100.
512-9088. 59803-1 .... **EACH 19.55**

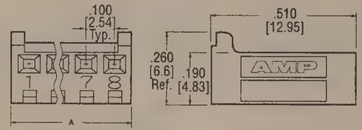
Bench Mount Power Assembly



The bench mount power assembly is actuated by compressed air. Includes a foot switch. Terminates 1000 wires per hour typically. Modular head sold separately

512-9081. 58338-1 .... **EACH 302.13**

CST-100 Crimp Housings — .100" Centers



- **Low Cost Wire-to-Board Interconnections**
- **High Current Rating**
- **Wide Wire Range for Single Contact**
- **Mates with MTA and Similar Competitive Notched Headers**
- **Anti-Overstress Feature Prevents Damage to Contact**
- **Locking Ramps and Polarizing Tabs Are Standard**
- **Recognized Under the Component Program of Underwriters Laboratories Inc. File No. E28476**
- **Certified by Canadian Standards Association File No. LR7189**

Material: UL94V-0 rated, type 6/6 nylon, natural color.

*Contact Plating: 1=Duplex C — .000030 gold on contact area, .000100-.000200 tin-lead on solder area, with entire post underplated .000050 nickel; 2=Duplex D — .000015 gold on contact area .000100-.000200 tin-lead on solder area, with entire post underplated .000050 nickel; 3=Tin-Lead/Nickel — .000100-.000200 tin-lead over .000050 nickel on entire post.

Double Row MT Receptacle Connectors

Housings are preloaded with standard pressure contacts on .100' × .100" centers. The contacts are insulation displacement for termination of discrete wires or ribbon cable with conductors separated. Crimp, snap-in contacts can be used interchangeably with the insulation displacement contacts. Connector covers are sold separately. **Specifications. Housing:** Black thermoplastic, flame retardant. **Contacts:** Copper alloy; duplex plated .000030µ" gold on the contact area, .000050µ" min. tin-lead on termination area, with entire contact underplated .000050µ" nickel. **Rating:** 3 amperes for single contact in free air. UL recognized, CSA certified. **Operating Temperature:** –65°C to +105°C. Mate with posts .222"-.273" in length.

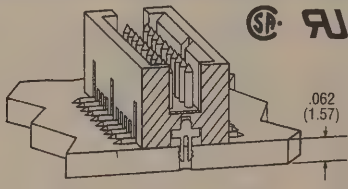
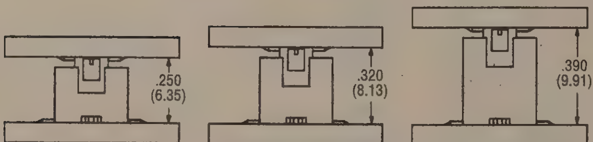
AMPMODU 50/50 Grid Surface-Mount Connector System



Header



Mating Heights

With Standard Holddowns

The AMPMODU 50/50 Grid Connector System features polarized surface-mount headers and receptacles on a .050 × .050 (1.27 × 1.27) centerline grid. Board-to-board stack heights of .250 (6.35), .320 (8.13) and .390 (9.91) are available. This system is ideal for parallel stacking applications for computers, computer peripheral·equipment, communication systems, medical instrumentation and environmental control systems as well as other high density applications.

Mod. IV Wire-Applied Housings

For termination of discrete wires. Receptacles mate with .025" square or round posts. Contacts are sold separately — order from the contacts listed below. Single and double row housings listed below are on .100" centerlines. **Contact Current Rating:** 3 amperes. **Housing Material:** Black thermoplastic — flame retardant. UL recognized, CSA certified.

Single Row — .100" Centers

Sold without contacts — See Mod. IV contacts below.

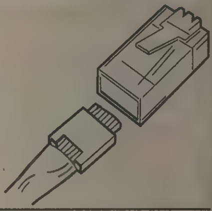
Category 5 High Performance Modular Plugs



Exceeds EIA/TIA 568A and TSB-40A requirements for Category 5 Four-Pair (RJ45) UTP Applications. AMP's load bar concept allows the conductors to be oriented into the load bar, trimmed and then simply slid into the connector housing. These plugs are designed to accommodate 24 AWG stranded conductors with a maximum conductor insulation diameter of .039 inches (.99 mm) and cable jacket outside diameters in the range of .200 to .215 inches.

IBM Style Token Ring Data Connector

Designed for the mechanical interface requirements of IEEE 802.5 specification local area networks. The connector is used to terminate 2 twisted pairs of data conductors. This connector mates with another identical connector. Cable termination is by insulation displacement. Cable braid is held between a ferrule and the connectors' integral grounding shield. Termination of the conductors requires only a pair of slip joint pliers. Remove the appropriate posts for the desired cable exit direction. Completed connectors can be snapped into a panel cut-out or used as free-hanging.

Standard Connector Kits

IBM Cable Type: 1, 2, 6. **Cable Exit:** 45°, 90°, or 180°.

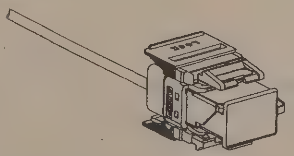
EMC Data Connector



- ► **For Type 1A, 2A, 6A Cable**

The original specifications for 150 ohm shielded (Type 1) cables and the AMP Four-Position Data Connector supported signals up to 20 MHz. As LAN speeds have increased, these specifications needed to be extended to provide stable performance at higher frequencies. The Telecommunications Industries Association/Electronics Industries Association (TIA/EIA) has proposed extended specifications for 150 ohm shielded cables and connectors up to 300 MHz. These proposals are being incorporated into pending new specifications TIA/EIA TSB 53 and PN-2840. All of the FOUR plus products presented comply with these specifications.

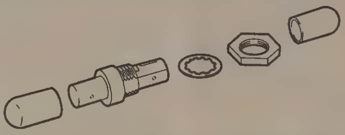
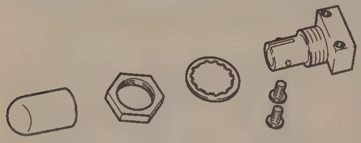
ST Style Coupling Receptacle



Alignment sleeve is used for singlemode or multimode applications. Joins two ST connectors in free hanging or panel mount applications. Includes lock washer, nut, and two dust caps.

Stock No.	Mfr.'s Type	Sleeve Material	Application	EACH	
				1-24	25-49
512-6506	501381-1	Plastic	Multimode	5.04	4.68
512-6565	504021-1	Metal	Single/Multimode	6.29	5.60
512-6507	502750-1	Ceramic	Single/Multimode	12.53	11.63

ST Style Active Device Receptacle



Join ST connectors to LEDs or detectors in TO-18, TO-46, or TO-52 packages. Mount to PC board or through panel. Packaged with lock washer, nut, alignment ring, mounting screws, and dust cap. Nickel plated, die cast zinc.

Stock No.	Mfr.'s Type	Description	EACH	
			1-24	25-49
512-6570	501474-1	Standard; Height — .410"	5.98	5.56
512-6508	502585-2†	Low Profile; Height — .280"	5.86	5.44

†502585-2 is not threaded and does not include lock washer or nut.

LIGHTCRIMP™ Connectors — Epoxyless

ST Style

SC Style

Epoxyless connectors terminate fiber cables the easy way, with no epoxy mess or curing. Crimp on the connectors with the special tool and polish, in less than two minutes. **Insertion Loss:** Singlemode — .2 dB average; Multimode — .2 dB average.

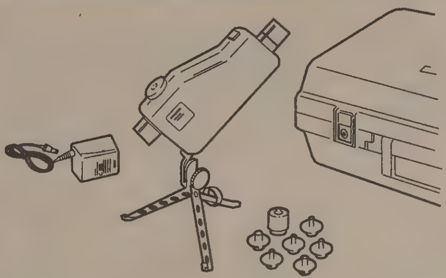
Inspection Microscope Kit (110 V)



The Inspection Microscope is designed specifically for visual examination of terminated or cleaved ends of singlemode and multimode fibers in both field and laboratory applications. This portable, hand-held unit provides 100-power magnification for optimum detection of flaws. It operates on AC or battery power. The complete microscope kit includes a handy carrying case, tripod stand, AC adapter and all adapters needed to inspect the following connectors — FSMA; FSD; ST Style; FC Type; D4 Type.

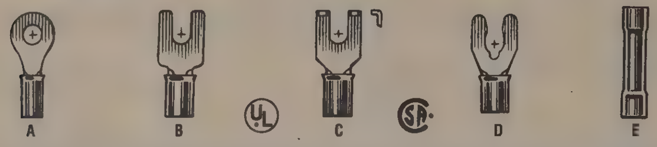
Terminals and Splices



PIDG® (Pre-insulated Diamond Grip) Terminals. These terminals feature color-coded nylon sleeves, funnel ramp entry, serrated inner barrel, a copper sleeve over the barrel, and tin-plated terminals for corrosion resistance. Terminals meet or exceed the requirements of MIL-T-7928, Type II, Class 1 and 2. 300 V max., 150°C max. **Bulk packages available, contact your local Allied sales office.**

Ring Tongue Terminals (Fig. A)

Nylon insulation, tin-plated copper terminals.

Pre-Insulated Sealed Terminals and Splices (Heat Shrinkable)

Environmentally sealed to prevent corrosion from fluids and vapors. Color coded nylon heat-shrinkable sleeves impart exceptional strain relief to the insulation and wire. Heavy duty clear insulation permits visual inspection.

PLASTI-GRIP® Terminals and Splices

Terminals are constructed of high conductivity copper and are tin-plated. Spring spade tongue terminals are constructed of phosphor bronze and are tin-plated. Color-coded vinyl insulation sleeves with a funnel entry for easy wire insertion. UL and CSA rated for 600 V max. (1000 V fixture or sign.) and 90°C. **Bulk packages available, contact your local Allied sales office.**

SOLISTRAND® Uninsulated Terminals and Splices

Constructed of fine grade high conductivity copper (spring spade terminals are constructed of phosphor bronze) and tin-plated. These feature a brazed seam, dimples or serrations inside the barrel and a bell-shaped barrel entrance. Meets or exceeds the requirements of MIL-T-7928, type 1, class 1 and 2. UL listed and CSA certified. **Bulk packages available, contact your local Allied sales office.**

DIPLOMATE® (DL) DIP Sockets and Test Probe Receptacles

AMP

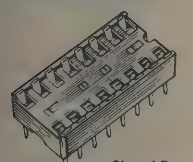
The DIPLOMATE® socket family provides high quality at low cost with superior handling characteristics. It is available with dual wiping contacts in tin or gold plating over beryllium copper or economical phosphor bronze. The large target area of the contacts and tapered side ramps in the housing insure easy entry of a DIP package. Internal anti-overstress walls prevent contact damage. The housings are compatible with commercially available automatic insertion equipment for socket-to-board or DIP-to-socket applications. These stackable housings feature a "True Closed Bottom" design which prevents solder or flux wicking at class 1 conditions of EIA 486.

Standoffs provide board clearance for proper cleaning after soldering. Sockets are available with straight solder tails for clinching and are "true positioned" for automatic insertion into the PC board. Solder tails with retention feature, for self-retention in the PC board during handling and flow soldering, are available for hand insertion.

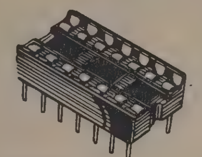
Housings are constructed from self-extinguishing glass-filled polyester, 94V-0 rated material and meet the material requirements of Table 23.1 of UL 1410 Standard for Television Receivers and Video Products.

The DIPLOMATE® (DL) DIP and SIP socket family meets the requirements of EIA RS415, MIL-S-83734 and the most stringent specifications of main-frame computer manufacturers.

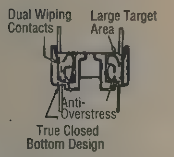
Dual Leaf DIP

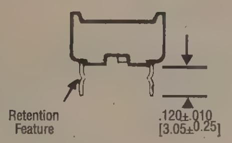


Closed Frame



Open Frame





Accepts .008–.015 thick × .030 wide rectangular leads.

Performance Characteristics. Rating: 250 VAC. **Contact Resistance:** 20 milliohms max. (initial), 30 milliohms max. (after test). **Dielectric Withstanding Voltage:** 1000 VRMS min. **Insulation Resistance:** 5000 megohms min. **Capacitance:** 0.5 picofarad max. **Operating Temperature:** –55°C to +105°C (tin), –55°C to + 125°C (gold). **Vibration:** 10-2000-10 Hz in 20 minutes at .06 (1.52) or 15 Gs for 3 sweeps in each of 3 axes. **Shock:** 100 Gs sawtooth, 6 shocks. **Engaging Force:** 340 grams (3.33 N) max. (.013 (0.33) pin). **Separating Force:** 25 grams (.24 N) (.008 (0.2) pin.

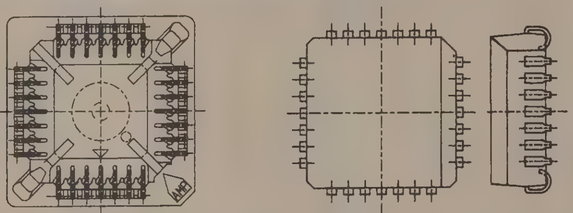
Low Insertion Force, Low Profile Surface Mount PLCC Sockets



New to the AMP® family of Low Profile Plastic Leaded Chip Carrier (PLCC) sockets for surface mounting is this line of Low Insertion Force Sockets. A unique contact design allows the PLCC device to be easily inserted into the socket. Sockets will accommodate plastic "J"-leaded devices made to JEDEC Specifications MO-047AA-AH (square packages and MO-052-AE (rectangular packages)).

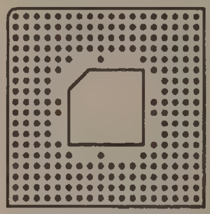
LIF PGA Socket for Motorola's 68360 QUICC Controller



The AMP® Socket, an 18 × 18, 241 position version with standard cavity, is a true low force product. Preloaded, long, dual beam contacts with staggered-row heights provide both sufficient normal force and low insertion/extraction forces.

68 Position Pin Headers and Accessories

Right-angle pin headers, available in standard, raised and stacked standard profiles, provide attachment to the host equipment and feature three levels of sequencing. Both standard and raised profile pin headers offer thru-hole and surface-mount lead configurations for top or bottom mounting. Stacked standard profile pin headers permit 136 circuit connections with thru-hole lead configurations for top mounting. An organizer on the 68- and 136-position headers and 4-sided post lead-in aids in the placement of the headers on the PC board. The true position of the leads is held to 0.30 (.012). This allows a small hole size, 0.84 (.033), to be used in the PC pattern, which gives the designer flexibility in routing signal paths. Guide rails and card guides facilitate the insertion and removal of the memory cards. Pin headers find wide use in such equipment as: computer, office, photographic, communications, industrial, test and medical, and pay.

AMP® FLEXI-BLOCK™ terminal block assemblies can be custom-made in seconds. Any number of blocks, assembled on tape can be pulled from a convenient, stackable dispenser carton. Cutting the desired number of blocks and the required length of track can be accomplished with a handy cutting tool or a hacksaw. The track, GE NORYL EN 265, conforms to curved surfaces. Both the track and the blocks are self-extinguishing. To complete a proper assembly, after selecting the size blocks with appropriate electrical capacity, track is cut to the length of the required number of terminal blocks, plus two extra spaces to accommodate end stops. After the strip of terminal blocks is slid onto the track, insertion of an end stop in each end completes the assembly. Predrilled holes in the track allow quick mounting on flat or curved surfaces. In addition to direct application of wire ends under screw heads, plates with FASTON tabs or jumper tabs can be installed on size #6 and #8 FLEXI-BLOCK™ assemblies.

#6 Blue FLEXI-BLOCK™ and Accessories

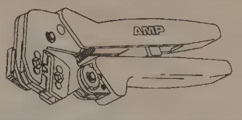
PRO-CRIMPER™ II Hand Tools and Dies



- ► Ratchet Control Provides Complete Crimping Cycle
- ► Emergency Ratchet Release
- ► Angled Head Provides a Comfortable Hand and Wrist Position
- ► One Tool with Interchangeable Die Sets Can Crimp Many Different Types of Connectors
- ► Accommodates Multiple Terminal Sizes in One Die Set
- ► Precision Construction of Durable High-Carbon Steel
- ► Extra Strength Pivot Pins Provide Greater Durability
- ► Produced Under a Quality Management System Certified to ISO 9001

D-Subminiature Kits

AMPLIMITE® HDP-20 Subminiature D RS-232 Repair Kit

AMP
Multiposition Repair Kit with Crimp Tool

Designed for quick, reliable repairs on site. The kit is packaged in a sturdy metal carrying case for ease of job-to-job portability. **Each Kit Contains:** 100 socket contacts; 100 pin contacts; 6 (25 pos.) receptacles; 18 (25 pos.) plugs; 14 (25 pos.) cable clamps; 1 insertion/extraction tool; and 1 crimp tool.

512-9122. 787053-2. Kit with crimp tool ....**EACH 144.53**
512-9056. 787053-1. Kit without crimp tool ....**EACH 111.74**

AMP
Multiposition Repair Kit with Crimp Tool

AMPLIMITE® HDP-20 Subminiature D Multi-Position Repair Kit

Designed to cover on site repairs of the more popular Subminiature D connector applications. **Each Kit Contains:** 100 socket contacts; 100 pin contacts; 3 of each receptacle (9, 15, 25, and 37 pos.); 6 of each plug (9, 15, 25, and 37 pos.); 6 of each cable clamp (9, 15, 25, and 37 pos.); 1 insertion/extraction tool; and 1 crimp tool.

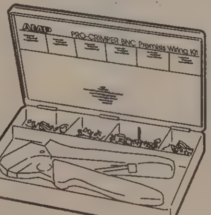
512-9123. 787054-2. Kit with crimp tool ....**EACH 193.29**
512-9057. 787054-1. Kit without crimp tool ....**EACH 160.50**

Modular Plug Hand Tool Kit

Kit consists of a hinged-top clear plastic case, with a cushioned compartment for the low-cost SUPER CHAMP® Service hand tool and six smaller compartments containing an assortment of popular size modular plugs (2, 4, 6, and 8 pos.).

512-9058. 224685-1 ....**EACH 61.98**

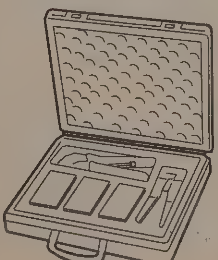
BNC Premise Wiring Kit



AMP
PRO-CRIMPER BNC Premise Wiring Kit

Includes PRO-CRIMPER™ II hand tool, BNC plugs 5 RG-58, 10 RG-59/62, 5 RG-58 plenum and RG- 59/62 plenum sizes; adapters — 2 jack-to-jack and 2 "T".

512-8477. 58477-1 .....**EACH 114.00**



Local Area Network Kit

Includes 8 position Modular Plug Professional Hand Tool, PRO-CRIMPER™ II frame, fiber optic connector die sets, coaxial connector die sets, and carrying case.

512-9825. 58513-1..........**EACH 629.00**

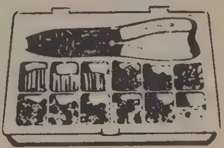
BNC Coaxial Connector Kits

Each of the following kits contains 20 connectors and a SUPER CHAMP® crimp tool in a steel box with compartments.

512-9821. 314971-1. BNC kit for RG-58 cable ....**EACH 107.83**
512-9822. 314972-1. BNC kit for RG-59/62 cable ....**EACH 107.83**
512-9823. 314973-1. UHF kit for RG-58, 59, 62 cable ....**EACH 107.83**

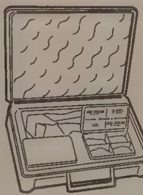
Terminal Kits with Hand Tool

PLASTI-GRIP® Terminal Kit



Steel case contains 20 different types of basic terminals and a SUPER CHAMP® crimp tool. Includes 500 terminals and splices most often used, wire sizes 22-10 AWG.

512-9201. 604200-1........**EACH 90.34**



PIDG® and PLASTI-GRIP® Terminal Kit with PRO-CRIMPER™ II Hand Tool

Includes hand tool, 225 insulated ring and spade terminals in 12-10, 16-14, and 22-16 AWG wire sizes.

512-9236. 55823-1.................................**EACH 83.79**

Heat Shrink Tubing Kit

Kit contains 103 pieces of tubing in assorted colors, 3/32 to 1/2 dia. × 4" length. Packaged in a sturdy plastic hinged lip case.

512-9824. 607243-1 ....**EACH 46.28**

Ordering Information

1. Select the insert and configuration. The table of insert configuration identifies the size, number of contacts, and contact wire size. The letter "P" identifies pin (male) contacts and the letter "S" identifies socket (female) contacts.
2. Select the receptacle shell. For wall (thick)—Series 3100A; for unmounted—Series 3101A; for box or panel—Series 3102A. Series 3102A isn't threaded on the back and is used when a cable clamp isn't required.
3. Select the plug shell. Straight—Series 3106A; straight, quick disconnect—Series 3107A; straight, split backshell—Series 3106B; right angle—Series 3108A; right angle, spilt backshell—Series 3108B.
4. Select the shell finish. Drab olive cadmium plate is standard. To order shells with a clear cadmium finish (bright metal) add (639) to the end of the connector part number. Black zinc (621) and Electroless Nickel (689) finishes are also available.
5. Miscellaneous. Amphenol suggests that the connector on the power source side of the connection contain socket contacts to reduce chance of short circuit or accidental injury.
6. Putting it together. If you have selected socket contacts for the insert in the receptacle, then the insert in the mating plug must contain pin contacts. For ease in ordering, the listings that follow have the mates for the receptacles on the same line.
7. Accessories. All shells except 3102A are threaded for a cable clamp. Cable clamps are available from Allied in drab olive, black zinc (621), electroless nickel (689), and clear cadmium finish (639), except electroless nickel (689) finish has replaced clear cadmium (639) finish on type 3057 cable clamps..
8. **Warning.** (A) You must select a plug shell to mate with a receptacle. (B) Pins mate with sockets. If you select socket contacts for the receptacle, please designate pin contacts for the plug.

Receptacles mate with plugs on the same line in the table on the next page.

Formerly MIL-C-5015 Types A and B

UL Approved - File No. E11 5497

CSA Certified - File No. LR69183

See Page 217 for Dimension Table. MS Receptacles mate with MS mating plugs that are on the same line in the table below. *Standard shells have cadmium plating with drab olive chromate finish. In shell sizes 12S, 14S, 16, 16S, 18, 20, 22, 24, and 28, clear chromate over cadmium plating (639), black zinc over zinc plating (621), or electroless nickel plating (689) are also available. Add the shell finish identification to the end of part number to specify a shell finish other than drab olive. * notes the shell styles that are available with all four of these finish choices. Pricing shown is for standard drab olive and for clear chromate over cadmium plating (639) finishes. Prices for finishes (621) and (689) are higher.

Formerly MIL-C-5015 Types A and B

UL Approved - File No. E11 5497

CSA Certified - File No. LR69183

See Page 217 for Dimension Table. MS Receptacles mate with MS mating plugs that are on the same line in the table below. Standard shells have cadmium plating with drab olive chromate finish. In shell sizes 12S, 14S, 16, 16S, 18, 20, 22, 24, and 28, clear chromate over cadmium plating (639), black zinc over zinc plating (621) or electroless nickel plating (689) are also available. Add the shell finish identification to the end of the part number to specify a shell finish other than drab olive. * notes the shell styles that are available with all four of these finish choices. Pricing shown is for standard drab olive and for clear chromate over cadmium plating (639) finishes. Prices for finishes (621) and (689) are higher.

Formerly MIL-C-5015 Types A and B

UL Approved - File No. E11 5497 CSA Certified - File No. LR69183

See Page 217 for Dimension Table. MS Receptacles mate with MS mating plugs that are on the same line in the table below. *Standard shells have cadmium plating with drab olive chromate finish. In shell sizes 12S, 14S, 16, 16S, 18, 20, 22, 24, and 28, clear chromate over cadmium plating (639), black zinc over zinc plating (621), or electroless nickel (689) plating are also available. Add the shell finish identification to the end of the part number to specify a shell finish other than drab olive. * notes the shell styles that are available with all four of these finish choices. Pricing shown is for standard drab olive and for clear chromate over cadmium plating (639) finishes. Prices for finishes (621) and (689) are higher.

MS Receptacles

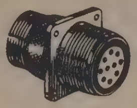
97 Series Rear Release Crimp Type



See Page 217 for Dimension Table.

UL, CSA Recognized. High speed termination, closed entry. Reduces fatigue failure at wire contact junction. Intermateable and intermountable with 97 Series and MIL-C-5015 type shell styles, both plugs and receptacles. Utilizes Standard 97 Series bright cadmium plated shells and insert configurations. Designed for use with stamped and formed type crimp contacts. The size 16 contact design features insulation crimp support. Use with standard hardware for 97 Series connector. Order accessories with (639) plating deviation to match connector plating. **Specifications. Standard Shell Finish:** Clear chromate over cadmium plate. **Inserts:** Molded 94V-O UL rated material. **Contacts:** Copper Alloy formed, silver plated; gold plating also available. **Wire Sizes:** 12-30 AWG. UL File #E115497. CSA File #LR69183. **Operating Temperature Range:** –55°C to +125°C. **Contacts sold separately. (See Contacts and Tools below.)**
